

1z1-076 valid study questions & 1z1-076 exam preparation & 1z1-076 pdf vce training

DOWNLOAD the newest TorrentExam 1z1-076 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=18xbiebdDNezWJdQR89I4avVnACH3VxiU>

TorrentExam is growing faster and many people find that obtaining a certificate has outstanding advantage over other peer, especially for promotion or applying for a large company. TorrentExam helps fresh people enter into this area and help experienced workers have good opportunities for further development. Thus our passing rate of best 1z1-076 Study Guide materials is nearly highest in this area. That's why we grows rapidly recent years and soon become the pioneer in 1z1-076 qualification certificate learning guide providers. Our 1z1-076 study guide will be your best choice to help you clear exam certainly.

You can acquire a sense of the 1z1-076 software by downloading a free trial version before deciding whether to buy it. This Oracle 1z1-076 practice exam software lets you identify your strengths and shortcomings, allowing you to concentrate on those aspects of your Oracle Database 19c: Data Guard Administration (1z1-076) test preparation that could use some work.

1z1-076 Latest Test Materials - 1z1-076 Pass4sure Pass Guide

Our products boost 3 versions and varied functions. The 3 versions include the PDF version, PC version, APP online version. You can use the version you like and which suits you most to learn our 1z1-076 study materials. The 3 versions support different equipment and using method and boost their own merits and functions. For example, the PC version supports the computers with Window system and can stimulate the real exam. Our products also boost multiple functions which including the self-learning, self-evaluation, statistics report, timing and stimulation functions. Each function provides their own benefits to help the clients learn the 1z1-076 Study Materials efficiently. For instance, the self-learning and self-evaluation functions can help the clients check their results of learning the Oracle Database 19c: Data Guard Administration study materials.

Oracle 1z1-076 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Using Flashback Database in a Data Guard Configuration: This topic covers the configuration and advantages of using Flashback Database in a Data Guard setup, as well as the process of enabling fast-start failover for seamless role changes.
Topic 3	<ul style="list-style-type: none">Enhanced Client Connectivity in a Data Guard Environment: This topic focuses on enhancing client connectivity in a Data Guard setup and implementing failover procedures for seamless client redirection. It also covers application continuity to ensure uninterrupted operations during role transitions.

Topic 4	<ul style="list-style-type: none"> Creating a Data Guard Broker Configuration: This section delves into the practical aspects of creating and managing a Data Guard broker configuration, including command-line and Enterprise Manager approaches.
Topic 5	<ul style="list-style-type: none"> Managing Physical Standby Files After Structural Changes on the Primary Database: The topic covers managing structural changes in the primary database and their impact on physical standby files.
Topic 6	<ul style="list-style-type: none"> Monitoring a Data Guard Broker Configuration: The topic covers the use of Enterprise Manager and DGMGRL to monitor Data Guard configurations and explains the various data protection modes available.
Topic 7	<ul style="list-style-type: none"> Creating a Logical Standby Database: This topic guides users through the process of creating and managing a logical standby database, including SQL Apply filtering.
Topic 8	<ul style="list-style-type: none"> Oracle Data Guard Basics: This topic covers the essential architecture and concepts of Oracle Data Guard. It includes sub-topics such as the physical and logical standby database comparison, benefits of Data Guard, and its integration with multi-tenant databases.
Topic 9	<ul style="list-style-type: none"> Backup and Recovery Considerations in an Oracle Data Guard Configuration: In this topic, Backup and recovery procedures in a Data Guard configuration are discussed, including RMAN backups, offloading to physical standby, and network-based recovery.
Topic 11	<ul style="list-style-type: none"> Managing Oracle Net Services in a Data Guard Environment: The section focuses on Oracle Net Services and its role in Data Guard networking setup.
Topic 12	<ul style="list-style-type: none"> Patching and Upgrading Databases in a Data Guard Configuration: This section provides guidance on patching and upgrading databases in a Data Guard environment, along with performance optimization techniques and monitoring considerations.
Topic 13	<ul style="list-style-type: none"> Performing Role Transitions: Here, the concept of database roles is explained, along with the steps for performing switchovers, failovers, and maintaining physical standby sessions during role transitions.

Oracle Database 19c: Data Guard Administration Sample Questions (Q43-Q48):

NEW QUESTION # 43

Which three are true regarding prerequisites for a logical standby database as a disaster recovery solution?

- A. Ensure that no BFILE LOB data types are contained in the primary database.
- B. Ensure that flashback is enabled on the primary database.
- C. Ensure that supplemental logging is enabled on the primary database.
- D. Do not perform any nologging operations on the primary.
- E. Ensure that no ROWID data types are contained in the primary database.

Answer: A,C,D

NEW QUESTION # 44

Which three actions are performed by the START PLAN procedure of the DBMS ROLLING package?

- A. starting media recovery on all the Leading Group Standby databases
- B. creating a guaranteed restore point on the primary database
- C. building a LogMiner dictionary on the primary database instance
- D. converting the designated physical standby database into a logical standby database
- E. switching the primary database to the logical standby role
- F. creating a guaranteed restore point on the standby databases

Answer: B,C,F

Explanation:

The DBMS_ROLLING package facilitates a rolling upgrade process across a Data Guard configuration. The START PLAN procedure in particular handles several critical actions, including:

Creating a guaranteed restore point on the standby databases (B): This ensures that the standby databases can be reverted to their state before the rolling upgrade process in case of any issues.

Building a LogMiner dictionary on the primary database instance (C): This is necessary for logical standby databases to interpret redo data during the SQL Apply process.

Creating a guaranteed restore point on the primary database (D): Similar to the standby databases, this ensures that the primary database can be reverted to a known good state if necessary.

NEW QUESTION # 45

Which three are prerequisites for enabling Fast-Start Failover?

- A. The Fast-Start Failover target standby database may receive REDO either synchronously or asynchronously when the configuration operates in Maximum Performance mode.
- **B. The Fast-Start Failover target standby database must receive REDO synchronously when the configuration operates in Maximum Availability mode.**
- C. A static service name must be configured only for the Fast-Start Failover target standby database.
- **D. Flashback Database must be enabled on the Fast-Start Failover target standby database.**
- **E. Flashback Database must be enabled on the primary database.**

Answer: B,D,E

NEW QUESTION # 46

Examine the Data Guard configuration:

DGMGRL> show configuration;

Configuration - Animals

Protection Mode: MaxAvailability

Databases:

dogs - Primary database

cats - Snapshot standby database

sheep - Snapshot standby database

Fast-Start Failover: DISABLED

Configuration Status:

ORA-01034: ORACLE not available

ORA-16625: cannot reach database "dogs"

DGM-17017: unable to determine configuration status

ou wish to perform a failover to sheep. Which command, or sequence of commands, should you issue to the broker before executing failover to sheep; using the broker?

- A. DGMGRL> convert database sheep to physical standby;
DGMGRL> edit configuration set protection mode as maxperformance;
DGMGRL> convert database sheep to physical standby;
- B. DGMGRL> convert database cats to physical standby;
- **C. DGMGRL> convert database sheep to physical standby;**
- D. DGMGRL> convert database cats to physical standby;
- E. None, because you can directly failover to a Snapshot Standby Database.

Answer: C

NEW QUESTION # 47

You created two remote physical standby databases using SQL and RMAN.

The primary database is a four-instance RAC database and each physical standby database has two instances.

Roles-based services are used for client connectivity and have been defined in the Grid Infrastructure.

Consider these operational requirements:

- * The ability to manage multiple standby databases with a single tool
- * The simplification of switchovers, failovers, reinstatements, and conversions to and from snapshot standby databases
- * The automation of failovers to a specified target standby database

Which TWO tools can be used to fulfill these requirements?

- A. RMAN
- B. Enterprise Manager Cloud Control
- C. SQL*Plus
- D. CRSCTL
- E. GDCCTL
- F. SRVCTL
- G. DGMGRL

Answer: B,G

Explanation:

Enterprise Manager Cloud Control provides a graphical interface to manage multiple standby databases, simplify switchovers and failovers, and automate failover processes to a specified target standby database. It offers a comprehensive view and control over the Data Guard configuration, making complex operations more manageable.

DGMGRL is a command-line tool specifically designed for managing Data Guard configurations. It allows the administration of multiple standby databases, simplifies the execution of switchovers and failovers, reinstatements, and conversions to and from snapshot standby databases, and supports the automation of failover processes to a specified standby database.

Other options like RMAN, SQL*Plus, CRSCTL, SRVCTL, and GDCCTL do not provide the same level of integrated management functionality for Data Guard environments as Enterprise Manager Cloud Control and DGMGRL.

NEW QUESTION # 48

.....

We believe that you can buy our 1z1-076 demo PDF torrent without any misgivings, Firstly, we have a strong experts team who are devoted themselves to research of the technology, which ensure the high-quality of our 1z1-076 Dump guide, TorrentExam offers Oracle Database 19c: Data Guard Administration 1z1-076 free Updates. It is no exaggeration to say that the value of the certification training materials is equivalent to all exam related reference books.
