C_ACDET_2506 Exam Vce Free - C_ACDET_2506 Study Demo

What is the selling point of a product? It is the core competitiveness of this product that is ahead of other similar brands. The core competitiveness of the C_ACDET_2506 exam practice questions, as users can see, we have a strong team of experts, the C_ACDET_2506 study dumps are advancing with the times, updated in real time, so that's why we can with such a large share in the market. Through user feedback recommendations, we've come to the conclusion that the C_ACDET_2506 learning guide has a small problem at present, in the rest of the company development plan, we will continue to strengthen our service awareness, let users more satisfied with our C_ACDET_2506 study dumps, we hope to keep long-term with customers, rather than a short high sale.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 3	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q52-Q57):

NEW QUESTION # 52

When you have created a new custom field and marked it as reportable, saved and published your changes, but the field does not show up in reports. How can you resolve the issue?

- A. Custom fields must be created in the same module where reports are generated.
- **B. Run the "Retrieve flexible fields metadata for reporting" task under Reporting Manager.**
- C. Wait 2 hours for the schema to refresh automatically.
- D. You did not assign the custom field to the appropriate report category.

Answer: B

Explanation:

After publishing a custom reportable field, the "Retrieve flexible fields metadata for reporting" task must be run to update the reporting schema with the new field metadata. Without this manual step, the reports do not recognize the new field despite it being published. The system does not perform automatic timed refreshes of the schema. Module location or report category assignment is not a prerequisite for report visibility in SAP Ariba's analytics.

NEW QUESTION # 53

A customer requests a dynamic list from CSV. Which field type supports that?

- A. Single-Select Enum
- B. Computed Field
- **C. Flex Master Data-based field**
- D. Hyperlink

Answer: C

Explanation:

The Flex Master Data (FMD)-based field type supports dynamic lists sourced from CSV uploads. FMD fields act like advanced picklists that can contain thousands of values, imported via CSV templates defining the master data structure and entries. These fields are searchable, scalable, and ideal for large or frequently changing datasets.

Single-select enumerations are static lists manually defined and cannot import large CSV datasets. Computed fields calculate values dynamically based on expressions and are not designed for listing selectable values.

Hyperlink fields store URLs, unrelated to selection lists.

FMD fields are the preferred approach when a customer requires large or frequently updated lookup lists in sourcing projects or contracts.

NEW QUESTION # 54

During the configuration of a new custom field, after it's been saved but before the field has been published, you realize that you set the wrong field type. What is the next step you should take to resolve the issue?

- A. Delete the field and create a new field with the same name and the intended field type
- B. Change the field type by selecting the intended type in the dropdown and Save
- C. Clear and recreate the field with the same field name and the intended field type
- D. Mark the field as Hidden, and create a new field with a slightly different name and the intended field type

Answer: A

Explanation:

Once a custom field has been saved, its field type cannot be changed—even if the field has not yet been published. The correct approach is to delete the incorrect field and create a new one with the intended type, optionally using the same name to maintain naming consistency. Clearing or hiding the field does not solve the issue, and the system does not allow type changes via the UI once saved. This approach is standard in SAP Ariba field management to avoid data integrity issues.

NEW QUESTION # 55

Which Activate phase is tied to performing configurations in your SAP Ariba Strategic Sourcing suite solution?

- A. Deploy
- B. Realize
- C. Configure
- D. Setup

Answer: B

Explanation:

The Realize phase is where the core configuration activities happen. During Realize, the project team sets up system parameters, creates templates, defines master data fields, and configures business processes in the SAP Ariba Strategic Sourcing suite. This phase includes building, unit testing, and preparing the system for user acceptance testing. Deploy is focused on cutover and go-live, while Configure and Setup are not formal SAP Activate phases for Ariba.

NEW QUESTION # 56

Users are able to publish a contract workspace without populating the Supplier field. What action can be performed on the Supplier field to force population before publishing?

- A. Configure a visibility condition
- B. Configure a validity condition
- C. Enable Require value before publish
- D. Enable Required

Answer: C

Explanation:

SAP Ariba provides a specific property in the Advanced tab called "Require value before publish", which ensures that a field must be populated prior to the contract workspace being published. Enabling this option on the Supplier field enforces this mandatory behavior during the publish action. The standard "Required" checkbox only enforces field completion in the UI during data entry but does not prevent publishing if the field is empty. Visibility conditions control whether the field is displayed, not whether it is required at publish. Validity conditions enforce value correctness but not presence at publish time. This feature enhances data completeness at critical lifecycle points.

NEW QUESTION # 57

.....

By unremitting effort to improve the accuracy and being studious of the C_ACDET_2506 real questions all these years, our experts remain unpretentious attitude towards our C_ACDET_2506 practice materials all the time. They are unsuspecting experts who you can count on. Without unintelligible content within our C_ACDET_2506 study tool, all questions of the exam are based on their professional experience in this industry. Besides, they made three versions for your reference, the PDF, APP and Online software version. They do not let go even the tenuous points about the C_ACDET_2506 Exam as long as they are helpful and related to the exam. And let go those opaque technicalities which are useless and hard to understand, which means whether you are newbie or experienced exam candidate of this area, you can use our C_ACDET_2506 real questions with ease.
