1Y0-204 exam dumps vce free download, Citrix 1Y0-204 braindumps pdf

Our 1Y0-204 study quiz are your optimum choices which contain essential know-hows for your information. If you really want to get the certificate successfully, only 1Y0-204 guide materials with intrinsic contents can offer help they are preeminent materials can

satisfy your both needs of studying or passing with efficiency. For our 1Y0-204 Exam Braindumps contain the most useful information on the subject and are always the latest according to the efforts of our professionals.

Citrix Virtual Apps and Desktops 7 Administration Sample Questions (Q37-Q42):

NEW QUESTION # 37

Scenario: A Citrix Administrator configured the following policies in a Citrix Virtual Desktops Site environment, in descending priority order.

1. "Marketing Office A" has a filter on Marketing users. 'Client Network Drives' is disabled; 'Client Fixed Drives' is enabled.
2. "Marketing Office B" has a filter on Marketing users' internal IP. 'Client Network Drives' is disabled; 'Client Fixed Drives' is enabled.
3. "Accounting" has a filter on Accounting Users. 'Client Network Drives' is enabled; 'Client Fixed Drives' is NOT configured.
4. "Baseline" is configured without a filter. 'Client Network Drives' and 'Client Fixed Drives' are both disabled.

Based on these policies, what will Accounting users be able to access?

- A. Client fixed and network drives
- B. Neither the client network drive nor the client fixed drive
- C. Client network drives only
- D. Client fixed drives only

Answer: C

Explanation:

According to the policy priority and filtering, the Accounting users will match the policy "Accounting", which has 'Client Network Drives' enabled and 'Client Fixed Drives' not configured. The policy "Baseline" will not apply because it has a lower priority. Therefore, the Accounting users will be able to access only the client network drives, and not the client fixed drives. This is confirmed by the Citrix documentation on policy filtering and precedence.

NEW QUESTION # 38

Which three statements are correct regarding Citrix printing? (Choose three.)

- A. Citrix printing does NOT assign each printer a unique namespace within a given session.
- B. Citrix printing allows administrators, but NOT users, to print to any other users' active session client printers.
- C. The Citrix Print Manager Service monitors session events, such as logon and logoffs or session termination.
- D. The Citrix Print Manager Service handles requests by impersonating the actual session user.
- E. Citrix printing sets the default security descriptor for auto-created printers to ensure client printer security.

Answer: C,D,E

Explanation:

* B. Citrix Print Manager Service: Monitors session events like logon, logoffs, and session termination to manage printing tasks within the session.

* C. Security Descriptor: Sets the default security descriptor for auto-created printers, enhancing the security of client printers in a session.

* E. Impersonation: The Citrix Print Manager Service processes print requests by impersonating the session user, ensuring that the user's permissions are applied to the printing process.

NEW QUESTION # 39

Scenario: A Citrix Administrator is managing a Citrix ADC SDX running eight Citrix ADC instances. The administrator first needs to upgrade the firmware on the instances. However, the administrator is concerned that it needs to be done all at once.

What upgrading flexibility does SDX provide in this scenario?

- A. The Citrix ADC instances have to be upgraded at the same time.
- B. The Citrix ADC instance can be upgraded on an individual basis, allowing all instances to run different firmware versions.
- C. The Citrix ADC instance can be upgraded at the SDX management level, allowing all instances to be upgraded at once.
- D. It is NOT possible to upgrade the Citrix ADC instances to different firmware versions.

Answer: B

Explanation:

According to the Citrix documentation¹, the Citrix ADC SDX appliance allows administrators to upgrade the Citrix ADC instances on an individual basis, without affecting the other instances or the SDX appliance. This allows the instances to run different firmware versions and provides flexibility and convenience for the administrator.

NEW QUESTION # 40

Which Citrix Director view will allow a Citrix Administrator to view data on the current CPU, as well as memory and disk latency for a machine running the Virtual Delivery Agent (VDA)?

- A. Machine Utilization
- **B. Resource Utilization**
- C. Load Evaluator Index
- D. Capacity Management

Answer: B

Explanation:

The Resource Utilization view in Citrix Director accesses historical trend information of CPU, memory, and disk latency for each machine running the VDA. This view helps the administrator to monitor the resource consumption and performance of the machines.

NEW QUESTION # 41

A Citrix Administrator configured the Responder policy to redirect the request for root page to the home page. However, after executing the command, the webpage access entered a loop, as shown in the second screenshot. Click on the 'Exhibit' buttons to view the screenshots.

```
>
>
> add responder action rs_redirect_home_act redirect "\ http://server1.training.lab/home.php
\" -responseStatusCode 302
Done
> add responder policy rs_redirect_home_pol HTTP_REQUEST_VALID res_redirect_home_act
Done
> bind lb vserver lb_vsrv_www -policyName rs_redirect_home_pol -priority 100 -
gotoPriorityExpression END -type REQUEST
Done
>
>
```

How will the administrator rectify this issue?

- A. Change Responder Policy expression to `http.REQ.URL.Contains("/")`
- **B. Change Responder Policy expression to `http.REQ.URL.EQ("/")`**
- C. Change Responder Action expression to `http.REQ.URL`
- D. Change Responder action expression to `"/"`

Answer: B

Explanation:

According to the Citrix Virtual Apps and Desktops 7 Administration On-Premises and in Citrix Cloud course, the Responder policy expression determines which requests are redirected by the Responder action. The expression `http.REQ.URL.EQ("/")` matches only the requests for the root page, and not any other pages. This prevents the redirection loop that occurs when the Responder action expression is also the root page. The other options are incorrect because they either match all requests or none.

NEW QUESTION # 42

.....

If you buy our 1Y0-204 study tool successfully, you will have the right to download our 1Y0-204 exam torrent in several minutes, and then you just need to click on the link and log on to your website's forum, you can start to learn our 1Y0-204 question torrent. We believe the operation is very convenient for you, and you can operate it quickly. At the same time, we believe that the convenient purchase process will help you save much time. More importantly, we provide all people with the trial demo for free before you buy our 1Y0-204 Exam Torrent and it means that you have the chance to download from our web page for free; you do not need to spend any money.
