Qlik Sense System Administrator Certification Exam - February 2021 Release Sample Questions (Q15-Q20):

NEW QUESTION # 15

A system administrator must set up a backup strategy for a Qlik Sense shared persistence environment. This multi-node environment consists of one node and two consumer nodes.

Which three steps are required? (Choose three.)

- A. Back up the repository database on the central node
- B. Back up the certificates on the consumer nodes using MMC
- C. Back up the log and app data on the nodes
- D. Back up the log and app data in the file share
- E. Back up the certificate of the central node using MMC

Answer: A,D,E

NEW QUESTION # 16

A system administrator should ensure that only members of the Active Directory "Developers" group have access to their personal workflows and are able to build applications in Qlik Sense.

The administrator then creates the rule, but other users can still see their personal workflows and are able to create applications.

What's the cause of the problem?

- A. The default security rule for creating applications is enabled
- B. Security rules are corrupted
- C. The functionality of creating applications is disabled for the "Developers" group
- D. Security rules do not affect work stream

Answer: A

NEW QUESTION # 17

An organization install Qlik Sense June 2019 Patch 2 to fix a critical issue. After the installation is complete, a different but more critical defect is identified. The system administrator needs to roll back to Qlik Sense June 2019 Patch 1.

Which steps should the system administrator take to complete this task?

- A. Use the Control Panel from Windows to remove the Patch 2 installation
- B. Uninstall Qlik Sense, reinstall Qlik Sense, install Patch 1
- C. Re-run the installer for Patch 2 and select Custom
- D. Stop all services, install Patch 1 and restart all services

Answer: A

NEW QUESTION # 18

What is the primary function of the Qlik Sense Log Monitor app?

- A. To manage and monitor license allocations
- B. To monitor and analyze system logs for troubleshooting
- C. To monitor the performance of reload tasks
- D. To track app usage and user activity

Answer: B

NEW QUESTION # 19

The system administrator creates a connection to PostgreSQL through windows 64-bit ODBC as System DSN. When you set up the ODBC connection on Qlik Sense Server, you notice that it does not appear.

What's causing the problem?

- A. The 64-bit option on the connection was not selected
- B. The appropriate ODBC driver has not been installed
- C. The user and password of the ODBC connection has not been entered
- D. OLE DB connection not created required

Answer: B
