P.S. Free 2026 NLN NEX dumps are available on Google Drive shared by Actual4Exams: <https://drive.google.com/open?id=1pPGRuWGGqpmwdVdjminH5CHCwI2-ZILF>

Our Software version of NEX exam questions can carry on the simulation study, fully in accordance with the true real exam simulation, as well as the perfect timing system, at the end of the test is about to remind users to speed up the speed to solve the problem, the NEX Training Materials let users for their own time to control has a more profound practical experience, thus effectively and perfectly improve user efficiency, let them do it keep up on NEX exams.

The NLN NEX topics or syllabus are updated with the passage of time. To pass the NLN NEX exam you have to know these topics. The NLN NEX certification exam trainers always work on these topics and add their appropriate NLN NEX exam questions and answers in the NEX exam dumps. These latest Nursing Entrance Exam (Math, Science and Verbal) NEX exam topics are added in all NLN NEX exam questions formats. You also get the opportunity to download the latest NEX PDF Questions and practice tests up to three months from the date of NLN NEX exam dumps purchase. So rest assured that with NLN NEX real dumps you will not miss even a single NLN NEX exam questions in the final exam. Now take the best decision of your career and enroll in Nursing Entrance Exam (Math, Science and Verbal) NEX certification exam and start this journey with Nursing Entrance Exam (Math, Science and Verbal) NEX practice test questions.

Pass Guaranteed High-quality NLN - Free NEX Vce Dumps

A lot of effort, commitment, and in-depth Nursing Entrance Exam (Math, Science and Verbal) (NEX) exam questions preparation is required to pass this NLN NEX exam. For the complete and comprehensive Nursing Entrance Exam (Math, Science and Verbal) (NEX) exam dumps preparation you can trust valid, updated, and NEX Questions which you can download from the Actual4Exams platform quickly and easily.

NLN Nursing Entrance Exam (Math, Science and Verbal) Sample Questions (Q142-Q147):

NEW QUESTION # 142

A nurse needs to administer 0.75 liters of IV fluid over 3 hours. What is the flow rate in milliliters per hour?
(1 liter = 1,000 milliliters)

- A. 300 mL/hr
- B. 200 mL/hr
- C. 250 mL/hr
- D. 150 mL/hr

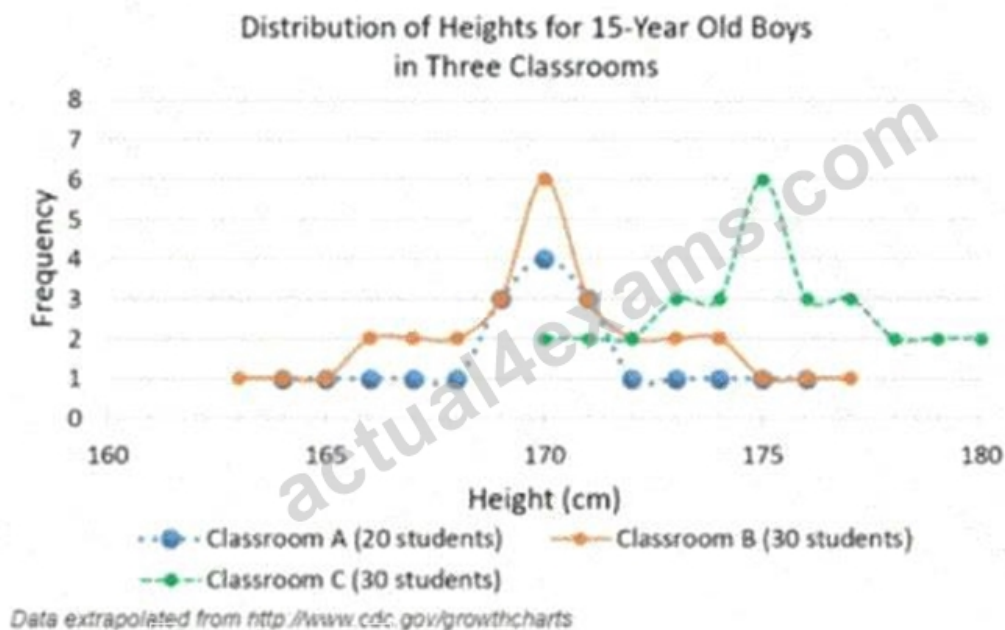

Answer: C

Explanation:

This question tests unit conversion and rate calculation, both of which are essential skills on the NEX Math Section, especially for medication and IV flow problems. First, convert liters to milliliters because flow rates are typically expressed in milliliters per hour. Since 1 liter equals 1,000 milliliters, multiply 0.75 liters by 1,000 to get 750 milliliters. Next, determine the flow rate by dividing the total volume by the total time. The fluid is administered over 3 hours, so divide 750 milliliters by 3 hours. This calculation gives 250 milliliters per hour. Therefore, the correct answer is option C. Option A results from dividing incorrectly, option B reflects underestimation, and option D would be correct only if the volume were larger. NEX exam questions often focus on proper setup of unit conversions before performing calculations. Always convert units first, then divide by time to find a rate.

NEW QUESTION # 143

The graph displays the distribution of the heights of 15-year-old boys in three classrooms.

What is the mean height of the boys in these classrooms?

- A. 171.9
- B. 17.0
- C. 175.0
- D. 170.0

Answer: A

Explanation:

This question assesses interpretation of a statistical graph and understanding of the mean (average). The mean height represents the weighted average of all data points across the three classrooms. From the plotted distributions, the center of mass of the combined data lies just under 172 cm. Option D, 171.9 cm, most accurately represents the mean height shown by the data. Option A (170.0) is too low, option C (175.0) is too high, and option B (17.0) is clearly incorrect due to unit misinterpretation. On the NEX exam, graph-based questions often test estimation and interpretation rather than exact calculation, especially when raw data values are not individually listed. The correct approach is to identify the overall balance point of the distribution.

NEW QUESTION # 144

A scientist removes the pancreas from laboratory rats. In a few days, what would most likely be observed?

- A. A decrease in urine volume
- **B. An increase in blood glucose levels**
- C. No effect on the rats
- D. Alkylosis of the blood

Answer: B

Explanation:

The pancreas produces insulin, which regulates blood glucose levels. Without insulin, glucose cannot efficiently enter cells, leading to hyperglycemia. Removing the pancreas would therefore cause blood glucose levels to rise. This concept is directly related to diabetes physiology and is a common topic on the NEX Science exam.

NEW QUESTION # 145

Which of the following bones form the ball-and-socket joint of the upper extremity?

- A. Scapula, clavicle
- B. Humerus, clavicle
- **C. Scapula, humerus**
- D. Ribs, humerus

Answer: C

Explanation:

The ball-and-socket joint of the upper extremity is the shoulder joint. This joint is formed by the head of the humerus (the ball) fitting into the glenoid cavity of the scapula (the socket). This structure allows for a wide range of motion, including flexion, extension, abduction, adduction, and rotation. The ribs do not participate in this joint, and the clavicle connects the scapula to the sternum but does not form the ball-and-socket articulation. Understanding joint structure and function is important for anatomy questions on the NEX Science exam. The shoulder joint's design allows greater mobility than stability, which explains why shoulder dislocations are relatively common.

NEW QUESTION # 146

The table below shows the average daily requirements of essential amino acids in the diet at various stages of human life.

Daily Mg Needed per Kg of Body Mass				
Essential Amino Acids	Infants	Toddlers	Children	Adults
Histidine	28	*	*	8-12
Isoleucine	70	31	28	10
Leucine	161	73	44	14
Lysine	103	64	44	12
Methionine & cystine	88	27	22	13
Phenylalanine & tyrosine	125	69	22	14
Threonine	87	37	28	7
Valine	93	38	25	10

Which of these amino acids is required in the greatest amount in the diet of toddlers?

- A. Valine
- B. Phenylalanine and tyrosine
- **C. Leucine**
- D. Lysine

Answer: C

Explanation:

This question requires interpreting data from a table, a common skill tested on the NEX Science exam.

Looking specifically at the column for toddlers, the amino acid with the highest listed requirement (measured in milligrams per kilogram of body mass per day) is leucine. Although lysine, valine, and phenylalanine with tyrosine are also required in significant amounts, leucine has the highest numerical value for toddlers. Leucine is an essential amino acid that plays a critical role in growth, tissue repair, and muscle protein synthesis, which are especially important during early childhood when rapid growth occurs.

Because toddlers are in a phase of accelerated development, higher amounts of certain amino acids are required compared to adults. The key to answering this question correctly is careful comparison of the numerical values within the toddler column, not overall trends across all age groups.

NEW QUESTION # 147

.....

It is browser-based; therefore no need to install it, and you can start practicing for the NLN NEX exam by creating the Nursing Entrance Exam (Math, Science and Verbal) (NEX) practice test. You don't need to install any separate software or plugin to use it on your system to practice for your actual Nursing Entrance Exam (Math, Science and Verbal) (NEX) exam. Actual4Exams NEX web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.
