

Realistic IBM Latest C1000-173 Braindumps Free PDF

What's more, part of that PDFVCE C1000-173 dumps now are free: https://drive.google.com/open?id=1SE9d08iqbF7zLStOGsECGpPt_huNF8XD

The IBM Cloud Pak for Data v4.7 Architect certification exam is one of the top-rated career advancement C1000-173 certifications in the market. This IBM Cloud Pak for Data v4.7 Architect certification exam has been inspiring candidates since its beginning. Over this long period, thousands of IBM Cloud Pak for Data v4.7 Architect exam candidates have passed their C1000-173 Certification Exam and now they are doing jobs in the world's top brands.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Plan for a Cloud Pak for Data Implementation: This section of the exam measures the skills of an Implementation Consultant and covers determining which Cloud Pak for Data services to deploy based on organizational needs. It involves sizing the Kubernetes• OpenShift cluster appropriately for workload demands and planning backup and restore strategies to ensure data protection. Planning for high availability and disaster recovery is essential to maintain uninterrupted service. Multi-tenancy requirements must be understood to support multiple user groups securely on shared infrastructure. Migration requirements need assessment to transition existing data and workloads smoothly.
Topic 2	<ul style="list-style-type: none">• Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.

Topic 3	<ul style="list-style-type: none"> • Architect with Analytic Services: This domain targets a Data Analytics Architect and focuses on designing solutions using analytic components of Cloud Pak for Data. Architecting with DataStage involves creating data integration and ETL pipelines. Data Refinery architectures prepare and cleanse data for analysis. Db2 Big SQL solutions address querying large distributed data sets with SQL, facilitating analytics across diverse data sources.
Topic 4	<ul style="list-style-type: none"> • Architect with Data Source Services: This domain measures expertise of a Data Integration Architect and includes architecting solutions with data replication technologies to synchronize data across systems. IBM Data Virtualization architecture enables access to and querying of disparate data sources without data movement. Architecting with watsonx.data focuses on building intelligent data lakes and query engines. Architecting with Db2-related services involves designing scalable data management and processing architectures using IBM's Db2 platforms.

Valid C1000-173 Real Test & C1000-173 Valid Test Simulator

C1000-173 questions and answers are written to the highest standards of technical accuracy by our professional experts. With our C1000-173 free demo, you can check out the questions quality, validity of our IBM practice torrent before you choose to buy it. You just need 20-30 hours to study with our C1000-173 practice dumps, and you can attend the actual test and successfully pass. The C1000-173 vce torrent will be the best and valuable study tool for your preparation.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which Watson Assistant service captures telephone voice interactions for use by a cognitive agent or as a transcription for analytics processing?

- A. Voice Agent
- **B. Voice Gateway**
- C. Voice Transcriber
- D. Voice Analyzer

Answer: B

Explanation:

Watson Assistant integrates with telephone systems through the Voice Gateway service. Voice Gateway captures real-time telephone voice interactions and can route them to a Watson Assistant chatbot or forward them for transcription and analytics. It enables cognitive agents to interact over voice channels and supports integration with SIP-based telephony systems. Voice Agent, Analyzer, and Transcriber are not standard Watson Assistant components within Cloud Pak for Data.

NEW QUESTION # 47

What is a Data Refinery flow in Cloud Pak for Data?

- A. A data storage location.
- **B. An ordered set of data operations.**
- C. A machine learning model.
- D. A visualization tool.

Answer: B

Explanation:

A Data Refinery flow in Cloud Pak for Data is an ordered set of data operations (transformations) that are applied to tabular data. It is used to cleanse, shape, and prepare data for analysis or machine learning. Users can apply filters, joins, aggregations, and custom expressions. It is not a storage location (A), ML model (B), or a visualization tool (D), though visual previews of transformed data are available.

NEW QUESTION # 48

Which type of OpenShift route configuration supports client certificate authentication?

- A. Re-encrypt
- B. Edge
- C. Passthrough
- D. Re-encrypt with a custom certificate

Answer: C

Explanation:

Passthrough route configuration on OpenShift is the only route type that preserves the original TLS connection from the client to the backend service. This is essential for supporting client certificate authentication, as the certificate must be passed directly to the application without termination or inspection at the router level. Edge and Re-encrypt routes terminate the TLS connection at the OpenShift router or re-encrypt it with a new certificate, making them unsuitable for mutual TLS (mTLS) or client certificate scenarios.

NEW QUESTION # 49

In deciding between managed and self-managed OpenShift for Cloud Pak for Data, what are key factors to consider?

- A. Compliance requirements
- B. Desired level of control over the environment
- C. In-house technical expertise
- D. Cost considerations

Answer: B,C,D

NEW QUESTION # 50

How does IBM Data Virtualization aid in the creation of a Data Fabric?

- A. It is a replication tool that brings data from all sources together in one location.
- B. It allows data engineers to customize access to data across multiple data sources, then publish the resulting objects in a catalog.
- C. It suspends access to a data source once a usage threshold is exceeded.
- D. It uses AI to predict where data will be used and relocated data for the best performance.

Answer: B

NEW QUESTION # 51

.....

PDFVCE will give you confidence to pass IBM C1000-173 test. Our Exam Preparation Material provides you everything the candidates will need to get the C1000-173 certification. Our IBM C1000-173 will provide you with exam questions with verified answers that reflect the actual exam. These questions and answers will help you to do preparation for taking a certification examination. High quality and Value for the C1000-173 Exam: 100% guarantee to Pass Your IBM C1000-173 exam and get your certification.
