Real UiPath UiPath-ADPv1 Exam Environment with Our Practice Test Engine

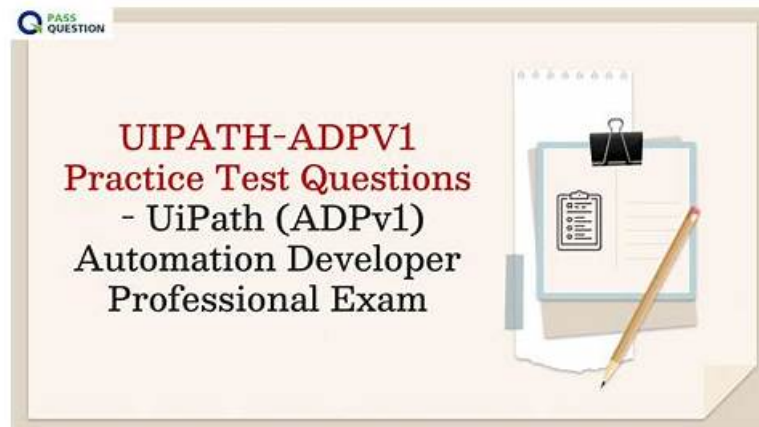

What's more, part of that TestKingFree UiPath-ADPv1 dumps now are free: https://drive.google.com/open?id=19hU9zIARiwA9QQXE5BJPq9emB7zT93EV

TestKingFree is an authoritative study platform to provide our customers with different kinds of UiPath-ADPv1 practice torrent to learn, and help them accumulate knowledge and enhance their ability to pass the exam as well as get their expected scores. There are three different versions of our UiPath-ADPv1 Study Guide: the PDF, the Software and the APP online. To establish our customers' confidence, we offer related free demos for our customers to download before purchase. With our UiPath-ADPv1 exam questions, you will be confident to win in the UiPath-ADPv1 exam.

Our UiPath-ADPv1 study guide provide you with three different versions including PC、App and PDF version. Each version has the same questions and answers, and you can choose one from them or three packaged downloads of UiPath-ADPv1 training materials. In addition to a wide variety of versions, our learning materials can be downloaded and used immediately after payment. We believe you will understand the convenience and power of our UiPath-ADPv1 Study Guide through the pre-purchase trial.

How TestKingFree will Help You in Passing the UiPath-ADPv1?

TestKingFree customizable & advanced UiPath-ADPv1 online test engine can create a real exam simulation environment to help to prepare for your UiPath UiPath-ADPv1 exam test. The intelligence and humanization can inspire your desire for UiPath-ADPv1 exam test study. Besides, the UiPath-ADPv1 online test engine is suitable for all the electronic devices without any installation restriction. We know that time is very precious for everyone in the society. While TestKingFree UiPath-ADPv1 Online Test engine can help you study efficiently. Now, you see, with the UiPath-ADPv1 online test engine, you can get a score after each test, thus you will know your error and enhance your weakness. Besides, you can set the frequency of occurrence of the questions you made mistake. With the high study efficiency and valid UiPath-ADPv1 exam torrent, passing the UiPath-ADPv1 actual test is no longer a problem.

UiPath UiPath-ADPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	• UiPath Studio Fundamentals: In this section, the focus is given to the understanding of Robotic Process Automation (RPA) concepts; it covers UiPath Studio and its components, Working with the UiPath user interface, project creation, management, and version control.
Topic 2	• Debugging and Testing: This section is about utilizing logging and debugging tools and adopting unit testing and test automation strategies.
Topic 3	• Design and Development: This section covers designing workflows using sequences, flowcharts, and state machines, building reusable components with libraries, exception handling and debugging techniques, etc.

Topic 4	• UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q20-Q25):

NEW QUESTION # 20
When building an automation for a car rental company as part of a larger project initiative, a developer should follow the high-level steps:
1. log in to the company's desktop application.
2. For each Queue Item:
a. Navigate to the Reservations section from the Requests section.
b. Add the reservation data to the Reservations section.
c. Close the current reservation.
3. Log out and close the company's application.
What step should be mocked from the end-to-end test case in order to retrieve test data?

- A. InitAllApplications
- B. SetTransactionStatus
- C. GetTransactionData
- D. Process

Answer: C

Explanation:
The GetTransactionData step should be mocked from the end-to-end test case in order to retrieve test data. Mocking is a technique of substituting a part of the system with a fake counterpart, usually for testing purposes1. The GetTransactionData step is responsible for fetching the next transaction item from the queue and assigning it to the TransactionItem argument2. By mocking this step, the developer can avoid interacting with the actual queue and provide a predefined transaction item for testing. This can make the test more predictable, focused, and isolated from external dependencies.
Option A is incorrect, because the SetTransactionStatus step should not be mocked, as it is used to update the status of the current transaction item in the queue, which is an important part of the end-to-end test case2. Option C is incorrect, because the Process step should not be mocked, as it contains the core business logic of the automation, such as navigating to the Reservations section, adding the reservation data, and closing the current reservation2. Option D is incorrect, because the InitAllApplications step should not be mocked, as it is used to log in to the company's desktop application, which is a necessary precondition for the end-to-end test case2.

NEW QUESTION # 21
Suppose you have the following workflow that verifies if the text value of an element is equal to "Work Items":
□
The configuration for the Verify Control Attribute and Get Text activities is shown below:
□
The element and its selector are highlighted in the image below:
□
Taking into consideration that the page shown above will be present on screen at execution time, what will be the result of the Verify Control Attribute activity?

- A. Verification will not be executed.
- B. Verification will be passed.
- C. Verification will be failed because the actual value is different than expected value.
- D. An exception will be thrown because there is no variable set in the Save to property of the Get text activity.

Answer: B

Explanation:
The workflow in question uses a 'Verify Control Attribute' activity to check if the text value of a UI element is equal to "Work

Items". The Get Text activity is used to retrieve the text from the specified UI element, and the result of this activity is compared against the expected value "Work Items".

From the provided information, the 'Verify Control Attribute' activity has been set up with the Expression "Work Items" and the Operator set to Equality. The 'Get Text' activity is configured to extract the text from the UI element with the visible text "Work Items", as indicated by the selector shown in the image.

Since the actual value of the UI element's text is "Work Items" (which matches the expected value in the 'Verify Control Attribute' activity), and provided that the 'Get Text' activity successfully retrieves this value, the verification will pass. The configuration indicates that the activity should take a screenshot only if the verification fails (TakeScreenshotIfFailed is set to True), which will not be the case here.

Therefore, assuming that there are no other issues such as incorrect selectors or unexpected changes to the UI element at execution time, the result of the 'Verify Control Attribute' activity will be a pass.

NEW QUESTION # 22

Which of the following options is correct regarding the below Object Repository tree structure?

- A. One Screen
  Two Applications
  Five UI Elements
- B. One Screen
  Two Applications
  Two UI Elements
- C. One Application
  Two Screens
  Five UI Elements
- D. One Application
  Two UI Elements
  Five Screens

Answer: C

Explanation:

Based on the provided screenshot of the Object Repository tree structure in UiPath, the correct hierarchy and count of elements are as follows:

There is one Application, which is "ACME 1.0.0".

Within this application, there are two Screens: "Dashboard" and "Login".

Under the "Dashboard" screen, there are three UI Elements: "User Options", "Users Data".

Under the "Login" screen, there are two UI Elements: "LoginButton", "Password", "Username".

Therefore, the correct option regarding the tree structure displayed would be:

C: One Application Two Screens Five UI Elements

This option correctly identifies one application (ACME 1.0.0), two screens (Dashboard, Login), and five UI elements (User Options, Users Data, LoginButton, Password, Username).

NEW QUESTION # 23

Starting with UiPath Studio version 2022.10, what happens to dependencies that lack Windows compatibility when they are converted in a project?

- A. They are automatically resolved.
- B. They are removed from the project.
- C. They are marked as unresolved.
- D. They are replaced with compatible alternatives.

Answer: C

Explanation:

Starting with UiPath Studio version 2022.10, dependencies that lack Windows compatibility are marked as unresolved when they are converted in a project. This means that the project cannot be executed until the unresolved dependencies are manually resolved by the developer. This is done to ensure that the project can run on both Windows and Linux platforms without compatibility issues.

NEW QUESTION # 24

What do the percentages from the Test Explorer panel represent?

- A. Passing percent.
- B. Coverage percent.
- C. Correctness of the code percent.
- D. Percent of test data run.

Answer: A

Explanation:

The percentages from the Test Explorer panel represent the passing percent of the test cases that are executed.

The Test Explorer panel shows the status of each test case, the total number of test cases, the number of passed test cases, the number of failed test cases, and the passing percent. The passing percent is calculated by dividing the number of passed test cases by the total number of test cases and multiplying by 100. For example, if there are 10 test cases and 8 of them pass, the passing percent is 80%. References: Test Explorer

NEW QUESTION # 25

......

It is not easy for you to make a decision of choosing the UiPath-ADPv1 study materials from our company, because there are a lot of study materials about the exam in the market. However, if you decide to buy the UiPath-ADPv1 study materials from our company, we are going to tell you that it will be one of the best decisions you have made in recent years. As is known to us, the UiPath-ADPv1 Study Materials from our company are designed by a lot of famous experts and professors in the field.
