Valid C-S4CPB-2508 Test Pdf | Valid C-S4CPB-2508 Guide Files

With the SAP C-S4CPB-2508 practice test, users can reduce stress, and improve their confidence to succeed. The desktop-based SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C-S4CPB-2508) practice test software is compatible with Windows only. But the web-based C-S4CPB-2508 Practice Test is compatible with all operating systems.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q32-Q37):

NEW QUESTION # 32

How does an implementation consultant support customer experts during Fit-to-Standard workshops? Note: There are 2 correct answers to this question

- A. Determine set up instructions for customer-driven integrations.
- B. Demonstrate SAP Best Practice business processes in the starter system
- C. Highlight areas that require configuration or customization decisions.
- D. Conduct end-user training on active scope items.

Answer: B,C

Explanation:

During the Fit-to-Standard workshops, an implementation consultant supports customer experts by doing the following:

- * Demonstrate SAP Best Practice business processes in the starter system. The consultant shows the customer experts how the standard processes work in SAP S/4HANA Cloud Public Edition and how they fit their business needs1.
- * Highlight areas that require configuration or customization decisions. The consultant identifies and documents the gaps between the standard processes and the customer requirements, and proposes solutions that are aligned with the cloud mindset1.

The other options are not the correct ways to support customer experts during the Fit-to-Standard workshops. Determining set up instructions for customer-driven integrations is done in the integration phase, after the Fit-to-Standard workshops are completed2. Conducting end-user training on active scope items is done in the deploy phase, before the go-live of the system3. References = Conducting Fit-to-Standard Workshops - SAP Learning, SAP S/4HANA Cloud Public Edition - Integration, Deploying SAP S/4HANA Cloud Public Edition.

NEW QUESTION # 33

What can you do with the SAP for Me mobile app? Note: There are 2 correct answers to this question.

- A. Interact with SAP easily
- B. Access the SAP ONE Support Launchpad
- C. Get full transparency into your SAP product portfolio
- D. Download learning content from SAP Learning Hub

Answer: A,C

NEW QUESTION # 34

You are recording actions for a custom process step in a test automate

When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- A. To capture an error message on the screen that can be used later.
- B. To capture a value in a text field that should be stored as a variable.
- C. To capture text in a message screen that can be used for data binding later.
- D. To capture a static label on the screen that should be checked during test execution.

Answer: B,C

Explanation:

When you are recording actions for a custom process step in a test automate, you press the "Read" button on the recording panel in the following situations:

- * To capture a value in a text field that should be stored as a variable. This allows you to reuse the value in other steps or test cases,

or to compare it with an expected value1.

* To capture text in a message screen that can be used for data binding later. This allows you to extract data from the message screen and use it as an input for another step or test case2.

You do not press the "Read" button to capture an error message or a static label on the screen, as these are not values that need to be stored or used later. Instead, you can use the "Check" button to verify that the error message or the label is displayed as expected3. References = Using the Test Automation Tool for Automated Testing - SAP Learning, How to get started with the Test Automation Tool for SAP S/4HANA Cloud Public Edition, SAP S/4HANA Cloud Test Automation Tool- FAQs Blog Series #1.

NEW QUESTION # 35

Which of the following systems are used to implement SAP S/4HANA Cloud Public Edition for a customer?

Note: There are 3 correct answers to this question.

- A. Starter system
- B. Sandbox system
- C. Test system
- D. Development system
- E. Trial system

Answer: A,B,C

Explanation:

* Sandbox system: This is an optional system that can be used to explore the SAP S/4HANA Cloud Public Edition capabilities and features before the implementation project starts. It is not connected to the starter system or the test system and does not have any data migration or configuration tools. It can be refreshed on demand by the customer1.

* Starter system: This is the first system that is provisioned for the customer after the contract is signed.

It is used to perform the fit-to-standard workshops, where the customer validates the standard processes and identifies the gaps and requirements. It also serves as the configuration system, where the customer configures the business processes using the SAP Central Business Configuration tool. The starter system is connected to the test system and can transfer the configuration and master data to it2.

* Test system: This is the second system that is provisioned for the customer after the starter system is configured. It is used to perform the integration testing, user acceptance testing, data migration, and cutover activities. It also serves as the production system, where the customer runs the live business processes after the go-live. The test system is connected to the starter system and can receive the configuration and master data from it3.

The systems that are not used to implement SAP S/4HANA Cloud Public Edition for a customer are:

* Trial system: This is a system that can be used to experience the SAP S/4HANA Cloud Public Edition solution for a limited time. It is not connected to any other system and does not have any data migration or configuration tools. It is not part of the implementation project and does not require a contract4.

* Development system: This is a system that can be used to develop custom applications or extensions using the SAP Business Technology Platform. It is not part of the SAP S/4HANA Cloud Public Edition landscape and does not have any data migration or configuration tools. It requires a separate contract and license.

NEW QUESTION # 36

You want to restrict end user activities for an application.

Where would you look up the business catalog(s) that grant access to the app?

- A. In the Define Your Scope app
- B. In the SAP Fiori Apps Reference Library
- C. In the App Finder app
- D. In the Configure Your Solution app

Answer: B

Explanation:

The SAP Fiori Apps Reference Library is a comprehensive online library of all available SAP Fiori apps. It provides information about the app features, technical data, configuration, and implementation. You can use the SAP Fiori Apps Reference Library to look up the business catalog(s) that grant access to an app by following these steps:

- * Go to the SAP Fiori Apps Reference Library website and log in with your SAP credentials.
- * In the search bar, enter the name or ID of the app you want to restrict access to, and click the search icon.
- * In the search results, click on the app tile to open the app details page.
- * On the app details page, scroll down to the Implementation Information section and expand the Configuration tab.
- * Under the Configuration tab, you will see the Business Catalog field, which lists the business catalog(s) that contain the app. You can click on the business catalog ID to view more details about it, such as the business roles, business groups, and other apps that are assigned to it.

References = SAP Fiori Apps Reference Library, Cloud Creating a Business Catalog
