The customers don't need to download or install excessive plugins or software to get the full advantage from web-based CBPA Practice Tests.

## ABPMP International Certified Business Process Associate (CBPA) Exam Sample Questions (Q97-Q102):

### NEW QUESTION # 97

Which measurements are generally a function of one or more of the fundamental metrics?

- **A. Time, cost, capacity, and quality**
- B. Time, capacity, debrief, and quality
- C. Time, quality, resources, and variation
- D. Time, control, capacity, and plan

**Answer: A**

Explanation:

The fundamental metrics used in process performance management include:

- \* Time: Total time or cycle time
- \* Cost: Resource and financial consumption
- \* Capacity: Throughput, workload capability
- \* Quality: Output accuracy and conformance

These are the building blocks for other performance measures, forming the foundation for evaluating efficiency and effectiveness in any process.

"Core process performance metrics focus on time, cost, quality, and capacity. All performance indicators stem from these primary categories."

- ABPMP CBOK, Chapter 6 - Process Performance Management

Reference: ABPMP CBOK, Chapter 6 - Process Performance Management

### NEW QUESTION # 98

What is meant by Continuous Process Improvement?

- **A. It allows for continuous evaluation of process performance within the BPM life cycle**
- B. Additional obligations to process owners but not top management
- C. The ability to improve the process at any time applying agile techniques
- D. The possibility to boost salaries and bonus plans for employees

**Answer: A**

Explanation:

Continuous process improvement (CPI) is a key concept in BPM that supports the ongoing evaluation of performance metrics, enabling evidence-based adjustments throughout the process lifecycle.

"CPI is the foundation for sustaining operational excellence, ensuring that processes are consistently measured, analyzed, and optimized to meet evolving business needs."

- ABPMP CBOK, Chapter 6 - Process Performance Management

Reference: ABPMP CBOK, Chapter 6 - Process Performance Management

#### NEW QUESTION # 99

What is a bottleneck?

- A. This occurs when ownership of an activity or information is passed from one individual to another.
- **B. It is a constraint in a process that creates a backlog of work to be done.**
- C. It is an issue that is discussed when performance targets are not reached.
- D. This occurs when there are too many variations in processes between functional areas.

**Answer: B**

Explanation:

A bottleneck occurs when a process step limits the overall capacity or speed of the entire process. It results in a backlog, delays, and performance drops. Identifying and eliminating bottlenecks is a core function of process analysis and performance improvement.

"Bottlenecks are process constraints that limit throughput. They can be caused by task complexity, limited resources, or inefficient procedures and are visible through queues and wait times."

- ABPMP CBOK, Chapter 4 - Process Analysis

Common bottleneck indicators:

- \* Long queues
- \* Low throughput
- \* Overutilized resources

Reference: ABPMP CBOK, Chapter 4 - Process Analysis

#### NEW QUESTION # 100

Major business transformation change initiatives require focus on

- A. Process owners and a good communication plan.
- B. Leadership development and cultural change.
- C. Process owners and customer engagement.
- **D. Leadership executive support and change management.**

**Answer: D**

Explanation:

For successful transformation, organizations must secure executive sponsorship, ensure leadership commitment, and implement structured change management to handle resistance and align stakeholders.

"Executive leadership and robust change management are critical enablers for transformation initiatives."

These provide authority, direction, and ensure adoption of new ways of working."

- ABPMP CBOK, Chapter 7 - Process Transformation

Reference: ABPMP CBOK, Chapter 7 - Process Transformation

#### NEW QUESTION # 101

Which statement is true regarding process modeling?

- A. It is the most important tool to secure the future of an organization.
- B. It is a responsibility of the Information Technology (IT) department.
- C. It is a tool that is primarily used by the managers and process owners.
- **D. The model represents the process sufficiently for generating the expected result.**

**Answer: D**

Explanation:

Process models should be created to accurately and sufficiently represent how a process works, ensuring alignment with real operations and objectives. It's not limited to a specific department (like IT), but used across roles for analysis, improvement, and communication.

"A process model is a representation of the actual or desired process, sufficient for its intended purpose, such as understanding, analysis, communication, or automation."

- ABPMP CBOK, Chapter 2 - Process Modeling

Reference: ABPMP CBOK, Chapter 2 - Process Modeling
