

# Valid Test FCSS\_SASE\_AD-24 Bootcamp | FCSS\_SASE\_AD-24 Valid Guide Files

DOWNLOAD the newest TestsDumps FCSS\_SASE\_AD-24 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1CVJ1mY64BjWZYyp8Pf2TkIvZq\\_C2W8S](https://drive.google.com/open?id=1CVJ1mY64BjWZYyp8Pf2TkIvZq_C2W8S)

We are leading company and innovator in this FCSS\_SASE\_AD-24 exam area. We are grimly determined and confident in helping you pass the FCSS\_SASE\_AD-24 exam. With professional experts and brilliant teamwork, our FCSS\_SASE\_AD-24 exam dumps have helped exam candidates succeed since the beginning. To make our FCSS\_SASE\_AD-24 Practice Engine more precise, we do not mind splurge heavy money and effort to invite the most professional teams into our group. They are the core value and truly helpful with the greatest skills.

To help you prepare well, we offer three formats of our Fortinet FCSS\_SASE\_AD-24 exam product. These formats include Fortinet FCSS\_SASE\_AD-24 PDF dumps, Desktop Practice Tests, and web-based Fortinet FCSS\_SASE\_AD-24 practice test software. Your selection on the right tool to help you pass the FCSS\_SASE\_AD-24 Exam and get the according certification matters a lot for the right FCSS\_SASE\_AD-24 exam braindumps will spread you a lot of time and efforts.

## Pass Guaranteed 2026 Fortinet Reliable Valid Test FCSS\_SASE\_AD-24 Bootcamp

At the information age, knowledge is wealth as well as productivity. All excellent people will become outstanding one day as long as one masters skill. In order to train qualified personnel, our company has launched the FCSS\_SASE\_AD-24 Study Materials for job seekers. We are professional to help tens of thousands of the candidates get their FCSS\_SASE\_AD-24 certification with our high quality of FCSS\_SASE\_AD-24 exam questions and live a better life.

### Fortinet FCSS\_SASE\_AD-24 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• SASE Deployment: This domain assesses the capabilities of Cloud Security Architects in deploying SASE solutions. It includes implementing various user onboarding methods, configuring administration settings, and applying security posture checks and compliance rules to ensure a secure environment.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• SASE Architecture and Components: This section measures the skills of Network Security Engineers and covers the architecture and components of FortiSASE. It includes integrating FortiSASE into a hybrid network, identifying its components, and constructing deployment cases to effectively implement SASE solutions.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• SIA, SSA, and SPA" This section focuses on the skills of Security Administrators in designing security profiles for content inspection and deploying SD-WAN and Zero Trust Network Access (ZTNA) using SASE. Understanding these concepts is crucial for securing access to applications and data across the network.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Analytics: This domain evaluates the skills of Data Analysts in utilizing analytics within FortiSASE. It involves identifying potential security threats using traffic logs, configuring dashboards and logging settings, and analyzing reports for user traffic and security issues to enhance overall security posture.</li> </ul>

## Fortinet FCSS - FortiSASE 24 Administrator Sample Questions (Q14-Q19):

### NEW QUESTION # 14

Which secure internet access (SIA) use case minimizes individual endpoint configuration?

- A. Agentless remote user internet access
- B. Site-based remote user internet access
- C. SIA using ZTNA
- D. SIA for SSL VPN remote users

**Answer: A**

Explanation:

The agentless remote user internet access use case is designed to minimize individual endpoint configuration. In this scenario, FortiSASE provides secure internet access without requiring the installation of an agent on the endpoint device. This approach is particularly useful for environments with unmanaged devices or temporary users, as it eliminates the need for complex configurations on each endpoint. Instead, security policies are enforced at the network level, ensuring consistent protection without relying on endpoint-specific software.

Here's why the other options are incorrect:

A . Site-based remote user internet access: This use case involves securing internet access for users at a specific site or location, typically through a gateway or firewall. While it simplifies configuration for all users at that site, it does not specifically minimize individual endpoint configuration for remote users.

C . SIA for SSL VPN remote users: SSL VPN requires users to connect to the corporate network via a client or browser-based interface. This approach often involves additional configuration on the endpoint, such as installing and configuring the SSL VPN client.

D . SIA using ZTNA: Zero Trust Network Access (ZTNA) focuses on verifying the identity and posture of devices before granting access to resources. While ZTNA enhances security, it may require endpoint agents or posture checks, which involve some level of endpoint configuration.

### NEW QUESTION # 15

Refer to the exhibits.

### Secure private access service connection

Name	<input type="text" value="To_FortGate"/>	X
Remote Gateway	<input type="text" value="203.221.193.0"/>	X
Authentication Method	<input checked="" type="radio"/> Shared Key <input type="radio"/> Certificate	
BGP Peer IP	<input type="text" value="10.11.11.1"/>	X
Network Overlay ID	<input type="text" value="100"/>	X

### Secure private access network connection

Service Connections Network Configuration

SECURE PRIVATE ACCESS NETWORK CONFIGURATION

BGP Routing Design	<input checked="" type="radio"/> BGP per overlay <input type="radio"/> BGP on loopback	
BGP Router ID Subnet	<input type="text" value="10.12.110/24"/>	X
Autonomous System Number (ASN)	<input type="text" value="65001"/>	X
BGP Recursive Routing	<input type="checkbox"/>	
Hub Selection Method	<input checked="" type="radio"/> Hub Health and Priority <input type="radio"/> BGP MED	

*Jitter, latency and packet loss measurements are periodically obtained for each service connection via the Health Check IP.*

**i** Within each PoP, the highest priority service connection that meets minimum SLA requirements is selected. Note that a service connection can be assigned a different priority level in different PoPs.

Health Check IP	<input type="text" value="10.1.0.254"/>	X
-----------------	-----------------------------------------	---

## Firewall policy configuration

```
config firewall policy
edit 5
  set name "Spoke-to-Spoke"
  set uuid 4d949462-216b-51ee-83c7-d0662fdf9451
  set srcintf "To_SASE"
  set dstintf "To_SASE"
  set action accept
  set srcaddr "all"
  set dstaddr "all"
  set schedule "always"
  set service "ALL"
  set comments "VPN: To_SASE (Created by VPN wizard)"
next
edit 6
  set name "Lo-BGP-HC"
  set uuid f5a12c92-216b-51ee-4802-80cd013d6a0f

    edit 1
      set prefix 10.11.11.0 255.255.255.0
      set neighbor-group "To_SASE"
    next
  end
  config network
    edit 1
      set prefix 10.190.190.0 255.255.255.0
    next
  end
```

A FortiSASE administrator is trying to configure FortiSASE as a spoke to a FortiGate hub. The VPN tunnel does not establish. Based on the provided configuration, what configuration needs to be modified to bring the tunnel up?

- A. NAT needs to be enabled in the Spoke-to-Hub firewall policy.
- B. FortiSASE spoke devices do not support mode config.
- C. The hub needs IKEv2 enabled in the IPsec phase 1 settings.
- D. The BGP router ID needs to match on the hub and FortiSASE.

Answer: C

## NEW QUESTION # 16

What should be prioritized when securing remote workers using FortiSASE?  
(Select all that apply)

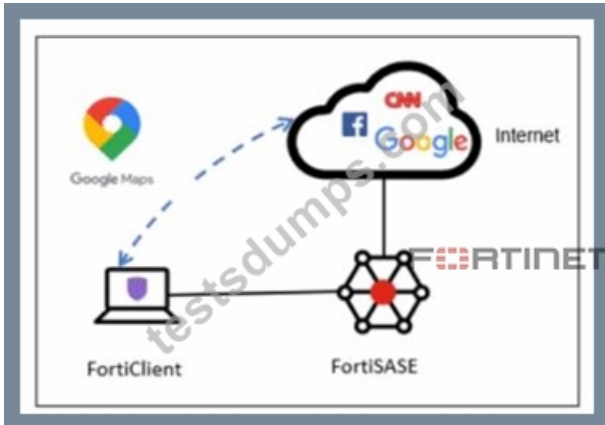

Response:

- A. Deployment of dedicated hardware firewalls
- B. Encryption of all communications
- C. Continuous monitoring of user activities
- D. Implementation of MFA (Multi-Factor Authentication)

Answer: B,C,D

### NEW QUESTION # 17

Refer to the exhibit.

A company has a requirement to inspect all the endpoint internet traffic on FortiSASE, and exclude Google Maps traffic from the FortiSASE VPN tunnel and redirect it to the endpoint physical Interface.

Which configuration must you apply to achieve this requirement?

- A. Configure a static route with the Google Maps FQDN on the endpoint to redirect traffic
- B. Change the default DNS server configuration on FortiSASE to use the endpoint system DNS.
- C. Exempt the Google Maps FQDN from the endpoint system proxy settings.
- D. Configure the Google Maps FQDN as a split tunneling destination on the FortiSASE endpoint profile.

Answer: D

Explanation:

To meet the requirement of inspecting all endpoint internet traffic on FortiSASE while excluding Google Maps traffic from the FortiSASE VPN tunnel and redirecting it to the endpoint's physical interface, you should configure split tunneling. Split tunneling allows specific traffic to bypass the VPN tunnel and be routed directly through the endpoint's local interface.

Split Tunneling Configuration:

Split tunneling enables selective traffic to be routed outside the VPN tunnel.

By configuring the Google Maps Fully Qualified Domain Name (FQDN) as a split tunneling destination, you ensure that traffic to Google Maps bypasses the VPN tunnel and uses the endpoint's local interface instead.

Implementation Steps:

Access the FortiSASE endpoint profile configuration.

Add the Google Maps FQDN to the split tunneling destinations list.

This configuration directs traffic intended for Google Maps to bypass the VPN tunnel and be routed directly through the endpoint's physical network interface.

Reference:

FortiOS 7.2 Administration Guide: Provides details on split tunneling configuration.

FortiSASE 23.2 Documentation: Explains how to set up and manage split tunneling for specific destinations.

### NEW QUESTION # 18

What is the primary purpose of implementing Zero Trust Network Access (ZTNA) in FortiSASE?

Response:

- A. To enforce least-privilege access based on identity and context
- B. To replace all existing security measures
- C. To simplify network configurations
- D. To provide blanket access to all network resources

Answer: A

### NEW QUESTION # 19

.....

Will you feel nervous while facing a real exam environment? If you do choose us, we will provide you the most real environment through the FCSS\_SASE\_AD-24 exam dumps. Our soft online test version will stimulate the real environment, through this, you will know the process of the real exam. FCSS\_SASE\_AD-24 Exam Dumps will build up your confidence as well as reduce the mistakes. If you need the practice just like this, just contact us.
