In order to reach this goal of passing the Plat-Dev-210 exam, you need more external assistance to help yourself. We have engaged in this career for more than ten years and with our Plat-Dev-210 Exam Questions, you will not only get aid to gain your dreaming Plat-Dev-210 certification, but also you can enjoy the first-class service online.

Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Omniscripts: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.
Topic 2	<ul style="list-style-type: none">• Expression Sets & Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.

Topic 3	<ul style="list-style-type: none"> • Flexcards: This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.
Topic 4	<ul style="list-style-type: none"> • Integrated Troubleshooting and Deployment: This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.

Pass Guaranteed Quiz 2026 Plat-Dev-210: Salesforce Certified Omnistudio Developer – Professional Exam Outline

Though there are three versions of the Plat-Dev-210 practice braindumps: the PDF, Software and APP online, i love the PDF version the most for its printable advantage which is unique and special. After printing, you not only can bring the Plat-Dev-210 study materials with you wherever you go, but also can make notes on the paper at your liberty, which may help you to understand the contents of our Plat-Dev-210 Learning Materials. Do not wait and hesitate any longer, your time is precious!

Salesforce Certified Omnistudio Developer Sample Questions (Q103-Q108):

NEW QUESTION # 103

A developer is configuring an integration Procedure Action in an OmniScript. The Omniscript needs a JSON response from the Integration Procedure but does not need to wait for the response for the user to proceed. Which feature should the developer enable?

- A. Use Future
- B. Toast Completion
- C. Invoke Mode Non-Blocking
- **D. Invoke Mode Fire and Forget**

Answer: D

Explanation:

The Invoke Mode Fire and Forget feature enables the OmniScript to invoke the Integration Procedure without waiting for a response. This is useful when the response is not needed for the user to proceed

NEW QUESTION # 104

A developer needs to create DataRaptor to retrieve the name of an account for a contact. Following best practices, how should a developer configure the extraction steps?

- A. Define extraction steps for the Contact and the Account objects, and set the Extract JSON Path to Contact Account.Name
- B. Define an extractionstep for the Account object, and set the Extract JSON Path to AccountContact.Name
- C. Define extraction steps for the Contact and the Account objects, and set the Extract 3JSON Path to Account.Name
- **D. Define an extraction step for the Contact object and set the Extract JSON Path to Contact Account.Name**

Answer: D

Explanation:

A DataRaptor Extract can retrieve data from multiple objects using extraction steps and JSON paths.

However, if the data is from a single object, only one extraction step is needed. The Extract JSON Path can use dot notation to

access related fields from that object, such as Contact.Account.Name.

NEW QUESTION # 105

The OmniScript must retrieve device details stored in the Asset object and then call an external system to send troubleshooting commands via REST API to the device.

Which two OmniScript element should the developer use to configure this functionality?

- A. Navigation Action
- B. SOQL Action
- C. HTTP Action
- D. DataRaptor Extract Action
- E. REST API Action

Answer: C,D

Explanation:

According to the OmniScript Action Elements page, a DataRaptor Extract Action can be used to "get data from one or more Salesforce records" and an HTTP Action can be used to "get, save, or delete data through a web application programming interface (API)".

NEW QUESTION # 106

A developer needs to build a DataRaptor Transform to send current weather to both an OmniScript Card Layout. Which of these samples would be valid for the Expected Output JSON?

- A.

```
{
  "Current:TempF": 53.1,
  "Current:CityState": "Baltimore, MD",
  "Current:TempC": 14.6
}
```
- B.

```
{
  "Current": {
    "TempF": 53.1,
    "CityState": "Baltimore, MD",
    "TempC": 14.6
  }
}
```
- C.

```
<root>
  <Current>
    <TempF>53.1</TempF>
    <CityState>Baltimore, MD</CityState>
    <TempC>14.6</TempC>
  </Current>
</root>
```
- D.

```
{
  "Current": {
    "TempF": 53.1,
    "CityState": "Baltimore, MD",
    "TempC": 14.6
  }
}
```

Answer: B

Explanation:

According to the Transform External Data Unit, the Expected Output JSON should match the Output Path of the DataRaptor Transform. In option D, the Output Path is Current:CityState, which matches the Expected Output JSON. The other options have different Output Paths that do not match the Expected Output JSON.

Therefore, the correct answer is D.

NEW QUESTION # 107

Users receive an APEC CPU limit Exceeded error when running an OmniScript in a Salesforce Community.

The OmniScript includes an Integration Procedure that contains two DataRaptors.

Which two Location should the developer check to troubleshoot the issue?

Choose 2 answers

- A. Script configuration
- B. Action Debugger
- C. Community logs
- D. DataRaptor configuration

Answer: B,D

Explanation:

According to the Troubleshoot Flow Errors page, one way to troubleshoot errors is to "check the debug logs for the community".

Another way is to use the Action Debugger tool, which "lets you test and debug actions in OmniStudio".

NEW QUESTION # 108

.....

We believe that if you can learn about several advantages of Plat-Dev-210 preparation questions, I believe you have more understanding of the real questions and answers. You can download the trial versions of the Plat-Dev-210 Exam Questions for free.
