If you prepare based on our Plat-UX-101 Exam Simulations files, you will feel easy to clear exam once certainly.

Salesforce Certified Platform User Experience Designer Sample Questions (Q189-Q194):

NEW QUESTION # 189
Universal Containers' organization wide-defaults model is private for the Account object. A sales repeats to opportunity records. Which level of access will the sales rep have to the related account record?

- A. Read/Create/Edit access
- B. Read/Create access
- C. No access
- D. Read-only access

Answer: D

Explanation:
A sales rep who owns an opportunity record will have read-only access to the related account record, if the organization-wide default for the Account object is private. This is because the opportunity owner is automatically granted read-only access to the account that the opportunity is associated with, regardless of who owns the account. This is called implicit sharing, and it is a built-in feature of Salesforce to ensure that users can access the data they need to do their work. However, the opportunity owner will not be able to create, edit, or delete the account record, unless they have other sharing mechanisms that grant them higher access, such as role hierarchy, sharing rules, manual sharing, or View All or Modify All permissions.Reference:
[Salesforce Certified User Experience Designer Exam Guide], Section 3.1: Design and implement solutions that meet user needs
[Control Access to Records Unit | Salesforce Trailhead]1, Unit 2: Implicit Sharing
[Work with Related Lists on Records in Lightning Experience - Salesforce]2, Related List Cards

NEW QUESTION # 190
A UX Designer needs to declutter the Highlights panel for a custom object's Lightning page. The team that uses this object explained there are too many action buttons; only specific actions are used for each status of the record.
Which Lightning Record Page feature should be used to solve this problem?

- A. Dynamic Forms
- B. A Dynamic Actions
- C. Audiences

Answer: B

Explanation:
Dynamic Actions are a feature that allows the UX Designer to customize the actions that appear on the Highlights panel of a Lightning record page based on criteria such as record status, user profile, or field value. This way, the UX Designer can declutter the Highlights panel and show only the relevant actions for each record. Dynamic Actions can be configured in the Lightning App Builder instead of the page layout editor, which gives more flexibility and control to the UX Designer.Reference:

NEW QUESTION # 191
A UX Designer is attending a sprint planning session as part of their team's Agile ceremonies.
Which methodology could the designer be asked to use to roughly estimate the work required for each item?

- A. Prioritization Matrix
- B. Sprint Backlogging
- C. T-shirt Sizing

Answer: C

Explanation:
The conceptual approach of desirable, feasible, and viable describes how to evaluate design solutions based on three criteria:
Desirable: The solution meets the needs and wants of the users and stakeholders.
Feasible: The solution can be implemented with the available resources and technology.
Viable: The solution can generate value and sustain itself in the market and environment. By incorporating human-centered design, CK is aiming to create design solutions that are desirable for its Sales team and customers, feasible with the Salesforce platform and tools, and viable for its business goals and strategy.Reference:
[1]: UX Designer Certification Prep: Design Thinking, Unit 3: Ideate
[2]: UX Designer Certification Prep: Design Thinking, Unit 4: Prototype and Test T-shirt sizing is a methodology that can be used to roughly estimate the work required for each item in a sprint backlog. It involves assigning a size category (such as XS, S, M, L, XL) to each item based on its complexity, effort, and uncertainty. T-shirt sizing is a relative estimation technique that allows the team to

compare items and prioritize them accordingly. It is also a quick and easy way to get a high-level overview of the scope of work without getting into too much detail.Reference:
[UX Designer Certification Prep: Agile UX]

NEW QUESTION # 192

Service agents are complaining that the new custom object to track reservation has too many fields and is cluttering their layouts. All of the fields are necessary, but they would like to display fields and sections of the record as individual components on the page layout with visibility depending on where they are in the reservation process.
Which feature should be recommended?

- A. AppExchange Apps
- B. Dynamic Forms
- C. Process Builder
- D. In-App Prompts

Answer: B

Explanation:

Dynamic Forms is a feature that allows users to customize the layout of a record detail page by placing fields and sections anywhere on the page, and applying visibility rules to show or hide them based on certain criteria. Dynamic Forms can help service agents to create user-centric, intuitive, and dynamic layouts that display only the relevant fields and sections for the reservation process. Dynamic Forms can also improve page load times and reduce the need for multiple page layouts and record types.Dynamic Forms is currently available for custom objects and some standard objects in Lightning Experience12.Reference:
Dynamic Forms

NEW QUESTION # 193

Cloud Kicks wants its users to know when a new feature is enabled or available with a short video explaining the new feature.
What should be recommended?

- A. Utility bar with embedded video
- B. Lightning Path component
- C. Docked prompt using In-App Guidance
- D. Custom video component

Answer: C

Explanation:

To let its users know when a new feature is enabled or available with a short video explaining the new feature, the recommended solution is to use a docked prompt using In-App Guidance. In-App Guidance is a feature that allows the designer to create prompts and walkthroughs that guide users through new or complex tasks in Salesforce. A docked prompt is a type of prompt that appears at the bottom of the screen and can contain text, images, or videos. A docked prompt can be used to announce a new feature and provide a short video tutorial on how to use it. The designer can also set the conditions for when and how often the prompt should appear, and track the user engagement with the prompt.: In-App Guidance | Salesforce Help : UX Designer Certification Prep: Designing with In-App Guidance | Trailhead
