If you failed to pass the exam, money back will be guaranteed, if you have another exam to attend, we will replace another NS0-528 Study Materials for you freely.

## Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q84-Q89):

### NEW QUESTION # 84

A customer wants to replicate between their two NetApp ONTAP clusters but is concerned that replication traffic might slow down normal data traffic. They still have two unused network ports on every node. You recommend using dedicated ports for the Intercluster LIFs, and you are tasked with creating the Intercluster LIFs so that they are on dedicated ports at all times. Which command must you use before creating InterCluster LIFs?

- A. system services firewall policy create
- B. network ipspace create -ipspace
- C. network interface failover-groups create
- **D. network interface service-policy create**

**Answer: D**

Explanation:

To ensure Intercluster LIFs are bound to dedicated ports and used only for replication traffic, you must first create a service policy

that defines the LIF's role (e.g., intercluster). The network interface service-policy create command allows you to specify that the LIF is intended strictly for intercluster services, ensuring it's isolated from data traffic.

#### NEW QUESTION # 85

You are testing a MetroCluster disaster recovery scenario for your customer, and you get an error messaging stating that the test failed.

Which command should you use to view detailed error information?

- A. metrocluster operation show
- B. metrocluster show
- C. metrocluster interconnect mirror show
- D. metrocluster check config-replication show

**Answer: A**

Explanation:

The metrocluster operation show command provides detailed status and error information about MetroCluster operations, including switchover, switchback, and testing activities. It's the correct command to diagnose a failed disaster recovery test.

#### NEW QUESTION # 86

An administrator is deploying NetApp BlueXP backup and recovery for VMs to protect both Windows and Linux systems. The site has two instances of VMware Cloud on AWS that need to be backed up.

How will this goal be accomplished? (Choose two.)

- A. Pair each instance of VMware Cloud on AWS with a unique instance of BlueXP backup and recovery.
- B. Deploy two instances of BlueXP backup and recovery on separate Linux VMs.
- C. Deploy one instance of BlueXP backup and recovery on a single Linux VM.
- D. Pair both instances of VMware Cloud on AWS to a single instance of BlueXP backup and recovery.

**Answer: B,D**

Explanation:

BlueXP backup and recovery supports multiple VMware Cloud on AWS instances with a single BlueXP backup and recovery deployment, as long as proper pairing is done. Alternatively, separate deployments can also be used if desired, each on its own Linux VM. This provides deployment flexibility depending on isolation, scalability, or administrative needs.

#### NEW QUESTION # 87

Which two NetApp products would you use to generate reports concerning the health of data protection relationships? (Choose two.)

- A. OnCommand Unified Manager
- B. OnCommand System Manager
- C. SnapDiff
- D. SnapCenter

**Answer: A,D**

#### NEW QUESTION # 88

An administrator needs to maintain 10 snapshots per volume on a NetApp AFF system and replicate to a destination with a snapshot retention of 120.

Which NetApp feature should the administrator use?

- A. SnapMirror active sync
- B. MetroCluster
- C. SnapMirror
- D. XCP

**Answer: C**

Explanation:

SnapMirror supports asymmetric snapshot retention, allowing the source volume (on the AFF system) to retain 10 snapshots while the destination retains up to 120 snapshots. This is useful for long-term retention or compliance at the destination without consuming extra capacity on the source.

## NEW QUESTION # 89

.....

To improve our products' quality we employ first-tier experts and professional staff and to ensure that all the clients can pass the test we devote a lot of efforts to compile the NS0-528 learning guide. As long as you study with our NS0-528 exam questions, we won't let you suffer the loss of the money and energy and you will pass the NS0-528 Exam at the first try. After you pass the NS0-528 test you will enjoy the benefits the certificate brings to you such as you will be promoted by your boss in a short time and your wage will surpass your colleagues.
