## Nutanix NCP-CI-Azure Practice Test - Questions Answers, Page 2

List of questions Export All

**Question 11**

Which address must Azure Directory Service be able to resolve when deploying a new NC2 cluster?

- A. Download.cloud.nutanix.com
- B. Apikeys.nutanix.com
- C. Gateway-external-api.cloud.nutanix.com
- D. Gateway-internal-api-cloud.nutanix.com

Hide Answer Comment (0)

**Suggested answer: C**

**Explanation:**

**Azure Directory Service Role:** Azure Directory Service must be able to resolve specific Nutanix URLs to ensure proper communication and functionality during the deployment of an NC2 cluster.

**Critical Endpoint:** The address 'Gateway-external-api.cloud.nutanix.com' is critical for establishing external API communications required for the deployment and management of the NC2 cluster.

**DNS Resolution:** Proper DNS resolution of this address ensures that the Azure Directory Service can interact with Nutanix services and APIs necessary for cluster operations.

**Verification Process:** Ensure that DNS settings allow resolution of 'Gateway-external-api.cloud.nutanix.com'. Test connectivity and resolution prior to deployment to avoid issues.

Many job-hunters want to gain the competition advantages and become the hottest people which the companies rush to get. But if they want to realize that they must boost some valuable NCP-CI-Azure certificate to raise their values and positions. The NCP-CI-Azure certificate enjoys a high reputation among the labor market circle and is widely recognized as the proof of excellent talents and if you are one of them and you want to pass the test smoothly you can choose our NCP-CI-Azure Practice Questions.

## Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Planning an NC2 on Azure Deployment:</b> This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Deploying an NC2 on Azure Environment:</b> This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.</li> </ul>

## NCP-CI-Azure PDF Question & Trusted NCP-CI-Azure Exam Resource

Many clients may worry that if they buy our product they will fail in the exam but we guarantee to you that our NCP-CI-Azure study questions are of high quality and can help you pass the exam easily and successfully. Our product boasts 99% passing rate and high hit rate so you needn't worry that you can't pass the exam. Our NCP-CI-Azure exam torrent is compiled by experts and approved by experienced professionals and updated according to the development situation in the theory and the practice. Our Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) guide torrent can simulate the exam and boosts the timing function. The language is easy to be understood and makes the learners have no learning obstacles. So our NCP-CI-Azure Exam Torrent can help you pass the exam with high possibility.

### Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q13-Q18):

#### NEW QUESTION # 13

Which statement best describes south bound traffic to a Nutanix User VPC originating outside the BC2 cluster when using a no-NAT (routed path) having two or more Flow Gateways (FGW)?

- A. A BGP gateway runs inside of Prism Central. The BGP gateway advertises externally mutable IP addresses to the Azure Route Server, with each active FGW external IP address as the next hop.
- **B. A BGP gateway is deployed as Azure native VMs in the Prism Central VNet. The BGP gateway advertises externally routable IP addresses to the Azure Route Server, with each active FGW external IP address as the next hop.**
- C. A BGP gateway is deployed as Azure native VMs in the Prism Central VNet. The BGP gateway advertises externally routable IP addresses to the Prism Central, with each active FGW external IP address as the next hop.
- D. A BGP gateway runs on the CVM of the bare-metal hosts. The BGP gateway advertises externally routable IP addresses to the Azure Route Server, with each active FGW external IP address the next hop.

**Answer: B**

#### NEW QUESTION # 14

A company wants NC2 networking components to be created manually with the correct naming conversation. To achieve this the administrator manually creates the PC and Host VNets in Azure. What additional Azure Network components must the administrator manually create?

- A. internet Gateways, Private Endpoints, Flow Gateway Subnets, VNet Peers
- B. NAT Gateways, Delegated Subnets, Flow Gateway Subnets, Transit VPC
- **C. NAT Gateways, Delegated Subnets, Flow Gateway Subnets, VNet Peers**
- D. Internet Gateways. Delegated Subnets, Flow Gateway Subnets, VNet Peers

**Answer: C**

Explanation:

\* NAT Gateways: Necessary for providing outbound internet access to resources in the private subnet. It ensures that the virtual

network can communicate with external services securely.

\* Delegated Subnets: Required for deploying specific Azure services within the virtual network, allowing controlled access and management of the resources within these subnets.

\* Flow Gateway Subnets: These subnets are used for managing traffic flow within the network, ensuring efficient routing and connectivity between different parts of the NC2 infrastructure.

\* VNet Peers: Establish connections between different virtual networks within Azure, enabling seamless communication and resource sharing across various parts of the NC2 deployment.

References:

\* Azure Virtual Network Documentation

\* Nutanix NC2 Networking Setup Guide

### NEW QUESTION # 15

An administrator has setup a routed external network (No NAT) to use for workload running in NC2 clusters on Azure.

The applications are network intensive, so four gateway VMs have been deployed to meet the high demands.

One application server on the NC2 clusters is sending traffic to an outside Azure service.

How many flow gateway VMs will be used to distribute the traffic?

- A. All four Flow Gateway instances will be used based on the ECMP default route that points to the external subnets in the Nutanix Transit VPC, but only for sending traffic. Return traffic will use one Flow Gateway VM.
- **B. All four Flow Gateway instances will be used based on the ECMP default route that points to the external subnets in the Nutanix Transit VPC for sending and receiving traffic.**
- C. Two flow gateway instances will be used based on limitations from using MAC addresses to redistribute traffic.
- D. Only one Flow Gateway instance will be used per source application running on NC2.

**Answer: B**

Explanation:

\* Equal-Cost Multi-Path (ECMP) Routing: ECMP allows multiple gateways to be used simultaneously for load balancing traffic across multiple paths. In this scenario, ECMP is configured to point to the external subnets in the Nutanix Transit VPC.

\* Traffic Distribution: All four Flow Gateway instances will be used to distribute the outgoing traffic from the application server based on the ECMP default route configuration. This ensures efficient load balancing and utilization of all available gateway resources.

\* Bidirectional Traffic: Both sending and receiving traffic will utilize all four Flow Gateway instances, ensuring high availability and performance for network-intensive applications.

References:

\* Nutanix NC2 Networking Guide

\* Azure Networking Documentation on ECMP

### NEW QUESTION # 16

Which console must be used to deploy a Nutanix cluster on Azure?

- A. Azure Console
- B. Prism Central Console
- C. Prism Element Console
- **D. NC2 Console**

**Answer: D**

Explanation:

NC2 Console: The NC2 console is specifically designed for deploying and managing Nutanix clusters on Azure. It provides the necessary tools and interface to configure, monitor, and manage the NC2 clusters effectively.

Cluster Deployment: Using the NC2 console ensures that all configurations and integrations with Azure are correctly handled, providing a seamless deployment experience.

Nutanix Console Documentation

### NEW QUESTION # 17

An organization want to use existing Azure resources to deploy NC2.  
What is a valid requirement to use existing Azure resources for this task?

- **A. A new Azure resource group must be created where all resources, such as VNets must be created.**
- B. Azure NAT gateway must be attached to the cluster management Prism Central, and external Flow Gateway subnets.
- C. The fastpathenable tag must be added after creating a NAT gateway.
- D. More than two DNS servers must be used.

**Answer: A**

Explanation:

\* Resource Group Requirement: When deploying NC2 on Azure, it is essential to organize resources such as VNets, subnets, and other components in a dedicated resource group. This helps in managing and maintaining the resources efficiently.

\* New Resource Group: Creating a new Azure resource group ensures that all the necessary NC2 resources are isolated and managed together, avoiding conflicts with existing resources and providing a clear separation for administration and billing purposes.
