

Professional-Cloud-Security-Engineer Real Brain Dumps - Professional-Cloud-Security-Engineer Actual Exams

BONUS!!! Download part of TestkingPass Professional-Cloud-Security-Engineer dumps for free: <https://drive.google.com/open?id=1WczhLkzMFpbuT-ITxOIGkVeWD1fZ6-ik>

Elaborately designed and developed Professional-Cloud-Security-Engineer test guide as well as good learning support services are the key to assisting our customers to realize their dreams. Our Professional-Cloud-Security-Engineer study braindumps have a variety of self-learning and self-assessment functions to detect learners' study outcomes, and the statistical reporting function of our Professional-Cloud-Security-Engineer test guide is designed for students to figure out their weaknesses and tackle the causes, thus seeking out specific methods dealing with them. Most of them give us feedback that they have learned a lot from our Professional-Cloud-Security-Engineer Exam Guide and think it has a lifelong benefit. They have more competitiveness among fellow workers and are easier to be appreciated by their boss. In fact, the users of our Professional-Cloud-Security-Engineer exam have won more than that, but a perpetual wealth of life.

Data Protection Ensuring

To answer the questions related to this module, the learners need to have the skills in managing encryption at rest. This comprises their comprehension of use cases for default encryption, customer-supplied encryption keys (CSEK), and customer-managed encryption keys (CMEK). The candidates should also be capable of creating & managing encryption keys for CSEK and CMEK as well as managing application secrets. They should have an understanding of enclave computing, envelope encryption, and object lifecycle policies for Cloud Storage. Moreover, this area requires your competency in preventing data loss using DLP API. This involves the ability to configure tokenization, restrict access to DLP datasets, determine and redact PII, as well as configure the format-preserving substitution.

Professional-Cloud-Security-Engineer Actual Exams - New Professional-Cloud-Security-Engineer Exam Fee

Review the products offered by us by downloading Professional-Cloud-Security-Engineer free demos and compare them with the study material offered in online course free and vendors' files. You will find our Professional-Cloud-Security-Engineer exam dumps the better than our competitors such as exam collection and others. The excellent quality of our Professional-Cloud-Security-Engineer exam dumps content, their relevance with the actual Professional-Cloud-Security-Engineer Exam needs and their interactive and simple format will prove them superior and quite pertinent to your needs and requirements. If you just make sure learning of the content in the guide, there is no reason of losing the Professional-Cloud-Security-Engineer exam.

Google Cloud Certified - Professional Cloud Security Engineer Exam Sample Questions (Q254-Q259):

NEW QUESTION # 254

A customer wants to run a batch processing system on VMs and store the output files in a Cloud Storage bucket. The networking and security teams have decided that no VMs may reach the public internet. How should this be accomplished?

- A. Mount a Cloud Storage bucket as a local filesystem on every VM.
- B. Provision a NAT Gateway to access the Cloud Storage API endpoint.
- **C. Enable Private Google Access on the VPC.**
- D. Create a firewall rule to block internet traffic from the VM.

Answer: C

Explanation:

Objective: Ensure VMs can access Cloud Storage without reaching the public internet.

Solution: Enable Private Google Access on the VPC network, allowing VMs with only internal IP addresses to access Google APIs and services privately.

Steps:

Step 1: Open the Google Cloud Console.

Step 2: Go to the VPC Network section.

Step 3: Select the relevant VPC network and subnet.

Step 4: Enable Private Google Access for the subnet.

Private Google Access ensures that instances can access Google APIs and services (such as Cloud Storage) over a private network connection, without requiring a public IP address.

Reference:

Configuring Private Google Access

Best Practices for Secure Access

NEW QUESTION # 255

You are creating a new infrastructure CI/CD pipeline to deploy hundreds of ephemeral projects in your Google Cloud organization to enable your users to interact with Google Cloud. You want to restrict the use of the default networks in your organization while following Google-recommended best practices. What should you do?

- A. Create a cron job to trigger a daily Cloud Function to automatically delete all default networks for each project.
- B. Only allow your users to use your CI/CD pipeline with a predefined set of infrastructure templates they can deploy to skip the creation of the default networks.
- C. Grant your users the IAM Owner role at the organization level. Create a VPC Service Controls perimeter around the project that restricts the compute.googleapis.com API.
- **D. Enable the constraints/compute.skipDefaultNetworkCreation organization policy constraint at the organization level.**

Answer: D

NEW QUESTION # 256

You are part of a security team investigating a compromised service account key. You need to audit which new resources were created by the service account.

What should you do?

- A. Query Access Transparency logs.
- B. Query Data Access logs.
- C. Query Stackdriver Monitoring Workspace.
- **D. Query Admin Activity logs.**

Answer: D

Explanation:

Admin activity logs are always created to log entries for API calls or other actions that modify the configuration or metadata of resources. For example, these logs record when users create VM instances or change Identity and Access Management permissions.

NEW QUESTION # 257

An organization is starting to move its infrastructure from its on-premises environment to Google Cloud Platform (GCP). The first step the organization wants to take is to migrate its current data backup and disaster recovery solutions to GCP for later analysis. The organization's production environment will remain on-premises for an indefinite time. The organization wants a scalable and cost-efficient solution.

Which GCP solution should the organization use?

- A. Compute Engine Virtual Machines using Persistent Disk
- **B. Cloud Storage using a scheduled task and gsutil**
- C. BigQuery using a data pipeline job with continuous updates
- D. Cloud Datastore using regularly scheduled batch upload jobs

Answer: B

Explanation:

<https://cloud.google.com/solutions/dr-scenarios-planning-guide#use-cloud-storage-as-part-of-your-daily-backup-routine>

NEW QUESTION # 258

A customer has an analytics workload running on Compute Engine that should have limited internet access.

Your team created an egress firewall rule to deny (priority 1000) all traffic to the internet.

The Compute Engine instances now need to reach out to the public repository to get security updates.

What should your team do?

- **A. Create an egress firewall rule to allow traffic to the hostname of the repository with a priority greater than 1000.**
- B. Create an egress firewall rule to allow traffic to the hostname of the repository with a priority less than 1000.
- C. Create an egress firewall rule to allow traffic to the CIDR range of the repository with a priority less than 1000.
- D. Create an egress firewall rule to allow traffic to the CIDR range of the repository with a priority greater than 1000.

Answer: A

NEW QUESTION # 259

.....

Professional-Cloud-Security-Engineer exam training allows you to pass exams in the shortest possible time. If you do not have enough time, our study material is really a good choice. In the process of your learning, our study materials can also improve your efficiency. If you don't have enough time to learn, Professional-Cloud-Security-Engineer test guide will make the best use of your spare time, and the scattered time will add up. The service of Professional-Cloud-Security-Engineer Test Guide is very prominent. It always considers the needs of customers in the development process. There are three versions of our Professional-Cloud-Security-Engineer learning question, PDF, PC and APP. Each version has its own advantages. You can choose according to your needs.
