Salesforce Order Management Administrator Accredited Professional Sample Questions (Q92-Q97):

NEW QUESTION # 92

An administrator is configuring delivery methods. What two types of records need to be created?

- **A. Delivery Method**
- B. Product
- C. Product Summary
- **D. Order Delivery Method**
- E. Order Delivery Summary

Answer: A,D

Explanation:
The Order Delivery Method and Delivery Method objects are used to configure delivery methods for orders. A delivery method is a way of delivering an order to a customer, such as standard shipping, express shipping, or in-store pickup. A Delivery Method record defines the name, description, type, and cost of a delivery method. An Order Delivery Method record associates an order with a delivery method and stores additional information such as the delivery address, tracking number, and status. Reference: Order Management Objects, [Delivery Methods]

NEW QUESTION # 93

Universal Containers (UC) has a flow which performs some custom logic in order to determine a least-cost shipping location. Some of the variables should be reset at the beginning of each loop iteration. Which design element in Flow allows the Admin to do this?

- A. Reassignment
- **B. Assignment**
- C. Preset
- D. Reset

Answer: B

Explanation:
The design element in Flow that allows the admin to reset some variables at the beginning of each loop iteration is Assignment. An Assignment element lets the admin assign new values to one or more variables or sObject fields in a flow. The admin can use an Assignment element before a Loop element to initialize the variables that are used in the loop, and then use another Assignment element inside the loop to reset the variables for each iteration. NEW QUESTION # 94

An admin is observing a flow and needs to watch all of the variables changing as the process executes, but nothing like this is being displayed. What did the developer forget to enable?

- A. Show execution details inline
- B. Show execution details
- C. Show the details of what's executed and render flow in Lightning Experience
- D. Show the details of what's executed and render flow in Lightning Runtime

Answer: D

NEW QUESTION # 95

Which object is used to createan invoice?

- A. Shipment
- B. Fulfillment Order
- C. Order
- D. Order Summary

Answer: D

Explanation:
The Order Summary object is used to create an invoice. An invoice is a document that requests payment from a customer for an order. An invoice can include one or more fulfillment orders and one or more credit memos. A fulfillment order is a record that represents a part of an order that is fulfilled by a specific location. A credit memo is a record that represents a partial or full refund for an order or a fulfillment order. To create an invoice, an administrator can use the Create Invoice Apex action in a flow. The Create Invoice Apex action requires the Order Summary ID as an input parameter and creates an Invoice record associated with the Order Summary record. Reference: Order Management Objects, [Create Invoice Apex Action]

NEW QUESTION # 96

Which three componentscan be used to modify the user experience in the Order Summary detail page?

- A. Accordion
- B. Tabs
- C. Related List - Double
- D. Related List-Single

Answer: A,B,D

Explanation:
Three components that can be used to modify the user experience in the Order Summary detailpage are:
Tabs. Tabs are a type of component that allow users to switch between different views or subpages on a record page. Tabs can contain other components, such as charts, reports, or custom components, that display different information orfunctionality related to a record. The administrator can use the Lightning App Builder to add and customize tabs on the Order Summary detail page to give users more options and flexibility.
Accordion. Accordion is a type of component that allow users to expand and collapse sections of a record page. Accordion can contain other components, such as fields, related lists, or custom components, that display different information or functionality related to a record. The administrator can use the Lightning App Builder to add and customize accordion on the Order Summary detail page to give users more control and visibility.
Related List-Single. Related List-Single is a type of component that displays a single related list for a record. A related list is a list ofrecords that are linked to another record by a relationship field, such as lookup or master-detail. The administrator can use the Lightning App Builder to add and customize related list-single on the Order Summary detail page to give users more access andcontext.
