Workday-Pro-HCM-Reporting Valid Vce, Reliable Workday-Pro-HCM-Reporting Exam Book

First and foremost, we have high class operation system so we can assure you that you can start to prepare for the Workday-Pro-HCM-Reporting exam with our study materials only 5 to 10 minutes after payment. Fortunately, you need not to worry about this sort of question any more, since you can find the best solution in this website--our Workday-Pro-HCM-Reporting Training

Materials. With our continued investment in technology, people and facilities, the future of our company has never looked so bright. There are so many advantages of our Workday-Pro-HCM-Reporting practice test and I would like to give you a brief introduction now.

Workday Workday-Pro-HCM-Reporting Exam Syllabus Topics:

Topic	Details
Topic 1	• Calculated Fields: This domain assesses the skills of candidates regarding calculations. A calculation is a deliberate process that transforms one or more inputs into one or more results.
Topic 2	• Human Capital Management: Human capital is a concept used by economists and social scientists to designate personal attributes considered useful in the production process. Candidates are assessed for their HCM skills.
Topic 3	• Composite Reporting: This domain of the Workday Pro HCM Reporting Certification exam measures the skills of HRIS Analysts and covers building and managing Composite Reports to deliver advanced insights across Workday HCM data.
Topic 4	• Reporting: Business Reporting is used to inform management and investors of information such as financial performance, the market outlook, or the performance of a specific department. Candidates are tested for their business reporting skills.

Workday Pro HCM Reporting Certification Exam Sample Questions (Q39-Q44):

NEW QUESTION # 39
Refer to the following scenario to answer the question below.
You have prepared the following matrix report for a recruiting manager.

The recruiting manager wants to dynamically refine the output results for various hiring sources and locations.
How can you achieve this?

- A. Include a Summarization Calculation.
- B. Configure a Field Values Group.
- C. Configure Facet Filters.
- D. Include a Drill to Report Link.

Answer: C

Explanation:

Matrix reports in Workday allow for grouping, summarization, and drill-through capabilities. To let managers dynamically refine report results at runtime, you configure Facet Filters. Facet Filters enable users to filter the report output interactively, without modifying the underlying definition.

From the Workday Reporting documentation:

"Matrix reports allow grouping and summarization of data. You can also configure facet filters so users can dynamically refine report results by selecting values such as Hiring Source or Location." Thus, the correct way to let the recruiting manager refine the output is D. Configure Facet Filters.

NEW QUESTION # 40

The benefits manager position has recently been filled by a different worker. The previous benefits manager has transferred ownership of the report schedules to the new manager. Month end is coming up and the new manager is wondering which reports are scheduled to be run automatically.

Where can the manager view this information?

- A. The Scheduled Future Processes report
- B. My Reports Library
- C. The Process Monitor report
- D. My Tasks

Answer: A

Explanation:

Workday provides the Scheduled Future Processes report to review which reports are scheduled to run automatically. This report displays the recurrence details and execution times of all scheduled reports, allowing managers to confirm upcoming automated report runs.

From the Workday Reporting documentation:

"Workday provides scheduling options to run reports at set frequencies. You can confirm upcoming scheduled report runs in the Scheduled Future Processes report." Therefore, the correct answer is D. The Scheduled Future Processes report.

NEW QUESTION # 41

You have created a composite report and are trying to add a matrix report as a subreport. However, when trying to configure a Data column, the matrix report is not available to select in the Sub Report Name field.

What can you check to identify the cause of this issue?

- A. Check that the configurations on the Filter Data in Sub Report grid also exist in the Filter tab of the matrix report definition.
- B. Check that every field in the composite report's set of fields that are enabled for filtering and grouping also exists as a group-by field in the matrix report.
- C. Check that the prompt defaults in the matrix report align with the prompt defaults defined in the composite report's Report Settings.
- D. Check that the summarization fields in the matrix report also match the selections in the Field to Aggregate field in the Data column settings.

Answer: B

Explanation:

For a matrix report to be used as a subreport in a composite report, the group-by fields in the matrix report must align with the fields enabled for filtering and grouping in the composite report. If this alignment does not exist, Workday does not allow the matrix report to appear as a valid subreport option in the Sub Report Name dropdown.

From the Workday binder: "To include a matrix report as a subreport in a composite, the group-by fields of the matrix must match the fields enabled for grouping in the composite report. If these do not match, the matrix will not appear in the Sub Report Name selection." Other factors such as prompt defaults or filter settings may impact usability, but they do not prevent the matrix report from being selectable. The key dependency is the field alignment between the composite and the matrix group-by fields.

Therefore, the correct answer is A. Check that every field in the composite report's set of fields that are enabled for filtering and grouping also exists as a group-by field in the matrix report.

NEW QUESTION # 42

Two people run the same report. One person can view all columns but the other person can only view some columns.

Why is the second user missing columns?

- A. The second user does not have access to the domain that secures the field.
- B. The second user is not the report owner.
- C. The report uses an indexed data source.
- D. The first user did not manually share the report with the second user.

Answer: A

Explanation:
Access to report fields in Workday is governed by security domains. If a user lacks access to the security domain that secures specific report fields, those fields will not appear in the report output for that user.
From the Workday Reporting documentation:
"A security group gets access to a security domain, which is a predefined set of related securable items. Securable items can include reports, tasks, data sources, and report fields." Therefore, the correct answer is C. The second user does not have access to the domain that secures the field.

NEW QUESTION # 43
You want to create a report that groups all employees by area code. However, the field you are pulling from contains the entire phone number.

- A. Format Number
- B. Substring Text
- C. Format Text
- D. Concatenate Text

Answer: B

Explanation:
The Substring Text function in Workday calculated fields extracts a portion of a string based on character position and length. To capture the area code from a phone number (e.g., the first three digits of a 10-digit number), you define the substring starting at position 1 with a length of 3.
From Workday Reporting documentation:
"Substring Text - Returns a portion of a text string based on a starting position and specified length." Example: Phone number 4155551234 → Substring(1,3) = 415.
Therefore, the correct choice is A. Substring Text.

NEW QUESTION # 44
......

They can print these real Workday Pro HCM Reporting Certification Exam (Workday-Pro-HCM-Reporting) questions to save them as paper notes. And you can also use the Workday Pro HCM Reporting Certification Exam (Workday-Pro-HCM-Reporting) PDF on smart devices like smartphones, laptops, and tablets.
