Pass4Test의 Microsoft인증 GH-900덤프를 구매하여 공부한지 일주일만에 바로 시험을 보았는데 고득점으로 시험을 패스했습니다. 이는 Pass4Test의 Microsoft인증 GH-900덤프를 구매한 분이 전해온 희소식입니다. 다른 자료 필요없이 단지 저희Microsoft인증 GH-900덤프로 이렇게 어려운 시험을 일주일만에 패스하고 자격증을 취득할 수 있습니다. 덤프가 격도 다른 사이트보다 만만하여 부담없이 덤프마련이 가능합니다. 구매전 무료샘플을 다운받아 보시면 믿음을 느낄 것입니다.

## Microsoft GH-900 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.</li> </ul>
주제 2	<ul style="list-style-type: none"> <li>Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.</li> </ul>
주제 3	<ul style="list-style-type: none"> <li>Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI</li> <li>CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.</li> </ul>
주제 4	<ul style="list-style-type: none"> <li>Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.</li> </ul>

주제 5	<ul style="list-style-type: none"> <li>• Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.</li> </ul>
주제 6	<ul style="list-style-type: none"> <li>• Collaboration Features: This section measures skills of Software Engineers and Team Leads and covers collaborative workflows using GitHub. It includes forking repositories, creating and managing pull requests, reviewing and merging code changes, and using GitHub Actions to support CI</li> <li>• CD pipelines. Candidates also explore project management features such as creating and managing issues, using labels, milestones, and project boards, and tracking progress through GitHub Projects.</li> </ul>

## GH-900시험유형 & GH-900인증시험 인기 덤프자료

Microsoft GH-900 인증 시험 최신버전덤프만 마련하시면 Microsoft GH-900 시험패스는 바로 눈앞에 있습니다. 주문하시면 바로 사이트에서 pdf파일을 다운받을 수 있습니다. Microsoft GH-900 덤프의 pdf버전은 인쇄 가능한 버전이라 공부하기도 편합니다. Microsoft GH-900 덤프 샘플문제를 다운받은 후 굳게 믿고 주문해보세요. 궁금한 점이 있으시면 온라인서비스나 메일로 상담받으시면 됩니다.

### 최신 GitHub Administrator GH-900 무료 샘플문제 (Q82-Q87):

#### 질문 # 82

What are all repository visibility options in GitHub Enterprise?

- A. external, public, and private
- B. public, private
- C. public, internal, and private
- D. external, private

정답: C

#### 질문 # 83

Your team uses GitHub to track both development progress and issue resolution. You are working on a bug fix and have created a pull request for it. Your tech lead reminds you to link the PR to the corresponding issue so it's automatically closed once the PR is merged. Which TWO valid methods can you use to link a pull request to an issue? (Choose two.)

- A. Use a keyword like fixes #45 or resolves #45 in the PR description or comment
- B. Navigate to the "Development" section of the PR and manually link the issue from a dropdown
- C. Tag the issue with a linked label in the issue discussion
- D. Mention the issue number in the PR title (e.g., Bug fix for #45)

정답: A,B

#### 설명:

To ensure the pull request automatically closes the related issue upon merging, you can use a keyword like "fixes #45" or "resolves #45" in the PR description or comment, or manually link the issue through the "Development" section of the pull request. These methods properly associate the issue with the PR, making tracking and resolution seamless.

Option B is CORRECT because using supported keywords like fixes, closes, or resolves, followed by the issue number in the PR description or comments, will automatically close the issue when the PR is merged.

Option C is CORRECT because GitHub allows you to manually link up to ten issues by going to the pull request's "Development" section and selecting the issues to associate.

Reference:

<https://docs.github.com/en/issues/tracking-your-work-with-issues/using-issues/linking-a-pull-request-to-an-issue>

#### 질문 # 84

An employee needs to find all issues within organization "Avocado" containing text "404 error" and a "guacamole" label. Which of the following steps would be best to search for these results?

- A. Go to "Avocado" organization. Select Issues under a repository. Filter issues with a "guacamole" label.
- **B. Enter query org:Avocado is:issue label:guacamole "404 error" in the search bar.**
- C. Go to the Avocado organization settings. Select Repository defaults under Repository. Scroll to Repository labels and select the 'guacamole' label.
- D. Enter query org:Avocado label:guacamole "404 error" in the search bar. Select "Issues" in the Filter by section.

정답: B

설명:

GitHub provides a powerful search syntax to filter and find specific issues across repositories in an organization.

Search Query Syntax:

Option A is correct because the query org:Avocado is:issue label:guacamole "404 error" is the best way to search for all issues within the "Avocado" organization that contain the text "404 error" and are labeled with "guacamole". This query is precise and leverages GitHub's advanced search capabilities.

#### 질문 # 85

What is a gist?

- A. GitHub Pages site
- B. Markdown document
- C. GitHub app
- **D. Git repository**

정답: D

설명:

A gist on GitHub is essentially a Git repository, albeit a simplified one, designed for sharing snippets of code, notes, or other text content. Gists support version control and can be public or secret.

Gist as a Git Repository:

Option B is correct because each gist is a Git repository, meaning you can clone it, commit changes, and even fork it, just like any other Git repository.

Incorrect Options:

Option A is incorrect because a gist is not an app; it's a feature of GitHub that provides a simplified repository.

Option C is incorrect because while a gist may contain Markdown documents, it is fundamentally a repository that can hold various file types.

Option D is incorrect because GitHub Pages is a separate service for hosting websites, not related to gists.

Reference:

GitHub Docs: About Gists

#### 질문 # 86

What is the difference between Git and GitHub?

- A. Git is a centralized version control system, while GitHub is a cloud-based collaboration platform.
- **B. Git is a command-line tool for tracking file changes, while GitHub is a platform for collaborating on Git repositories.**
- C. Git is a cloud-based hosting service, while GitHub is a distributed version control system.
- D. Git and GitHub are different names for the same tool that is used for version control and collaboration.

정답: B

#### 질문 # 87
