They put all their efforts to maintain the top standard of Palo Alto Networks PCNSE exam questions all the time. So you rest assured that with Palo Alto Networks PCNSE exam dumps you will get everything thing that is mandatory to learn, prepare and pass the difficult Palo Alto Networks PCNSE Exam with good scores. Take the best decision of your career and just enroll in the Palo Alto Networks PCNSE certification exam and start preparation with Palo Alto Networks PCNSE practice questions without wasting further time.

Palo Alto Networks PCNSE certification is a valuable certification for individuals looking to advance their careers in network security. Palo Alto Networks Certified Network Security Engineer Exam certification validates the individual's skills and knowledge in deploying, configuring, and managing Palo Alto Networks security solutions using the PAN-OS 10.0 operating system. Palo Alto Networks Certified Network Security Engineer Exam certification is recognized globally and can lead to higher salaries and better job opportunities.

Palo Alto Networks PCNSE (Palo Alto Networks Certified Security Engineer) certification is a well-known certification that validates the skills and knowledge of an individual in network security using the Palo Alto Networks platform. Palo Alto Networks Certified Network Security Engineer Exam certification is designed for professionals who work with the PAN-OS 10.0 operating system and are responsible for deploying, configuring, and managing Palo Alto Networks security solutions.

Palo Alto Networks Certified Security Engineer (PCNSE) is a popular certification exam designed for security engineers who want to demonstrate their expertise in implementing and managing Palo Alto Networks technologies. Specifically, the PCNSE Exam is focused on the latest version of the Palo Alto Networks PAN-OS 10.0 platform, which is used by many organizations to protect their networks against a wide range of cyber threats.

Dump PCNSE Check, PCNSE Reliable Exam Book

When asked about the opinion about the exam, most people may think that it's not a quite easy thing, and some people even may think that it's a difficult thing. PCNSE learning materials of us include the questions and answers, which will show you the right answers after you finish practicing. PCNSE Online Test engine can record the test history and have a performance review, with this function you can have a review of what you have learned.

Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q274-Q279):

NEW QUESTION # 274

Which two subscriptions are available when configuring Panorama to push dynamic updates to connected devices? (Choose two.)

- A. Antivirus
- B. User-ID
- C. Content-ID
- D. Applications and Threats

Answer: A,D

Explanation:

Explanation/Reference: <https://www.paloaltonetworks.com/documentation/80/pan-os/web-interface-help/device/device-dynamic-updates>

NEW QUESTION # 275

An engineer needs to configure a standardized template for all Panorama-managed firewalls. These settings will be configured on a template named "Global" and will be included in all template stacks.

Which three settings can be configured in this template? (Choose three.)

- A. Email scheduler
- B. Log Forwarding profile
- C. SSL decryption exclusion
- D. Login banner
- E. Dynamic updates

Answer: C,D,E

Explanation:

A template is a set of configuration options that can be applied to one or more firewalls or virtual systems managed by Panorama. A template can include settings from the Device and Network tabs on the firewall web interface, such as login banner, SSL decryption exclusion, and dynamic updates⁴. These settings can be configured in a template named "Global" and included in all template stacks. A template stack is a group of templates that Panorama pushes to managed firewalls in an ordered hierarchy⁴. References: Manage Templates and Template Stacks, PCNSE Study Guide (page 50)

NEW QUESTION # 276

An engineer discovers the management interface is not routable to the User-ID agent. What configuration is needed to allow the firewall to communicate to the User-ID agent?

- A. Add a static route to the virtual router
- B. Add a Policy Based Forwarding (PBF) policy to the User-ID agent IP
- C. Create a NAT policy for the User-ID agent server
- D. Create a custom service route for the UID Agent

Answer: D

Explanation:

Explanation

To allow the firewall to communicate with the User-ID agent, you need to configure a custom service route for the UID Agent²³. A custom service route allows you to specify which interface and source IP address the firewall uses to connect to a specific destination service. By default, the firewall uses its management interface for services such as User-ID, but you can override this behavior by creating a custom service route.

To configure a custom service route for the UID Agent, you need to do the following steps:

- * Go to Device > Setup > Services and click Service Route Configuration.
- * In the Service column, select User-ID Agent from the drop-down list.
- * In the Interface column, select an interface that can reach the User-ID agent server from the drop-down list.
- * In the Source Address column, select an IP address that belongs to that interface from the drop-down list.
- * Click OK and Commit your changes.

The correct answer is C. Create a custom service route for UID Agent

NEW QUESTION # 277

An administrator needs to determine why users on the trust zone cannot reach certain websites. The only information available is shown on the following image. Which configuration change should the administrator make?

- ☐ A)
- ☐ B)
- ☐ C)
- ☐ D)
- ☐ E)

- A. Option C
- B. Option B
- **C. Option D**
- D. Option A
- E. Option E

Answer: C

NEW QUESTION # 278

Which three use cases are valid reasons for requiring an Active/Active high availability deployment? (Choose three)

- A. The environment requires that traffic be load-balanced across both firewalls to handle peak traffic spikes
- **B. The environment requires real full-time redundancy from both firewalls at all times**
- C. The environment requires Layer 2 interfaces in the deployment
- **D. The environment requires that both firewalls maintain their own routing tables for faster dynamic routing protocol convergence**
- **E. The environment requires that all configuration must be fully synchronized between both members of the HA pair**

Answer: B,D,E

Explanation:
