真實的Plat-Admn-202套裝 & 保證Salesforce Plat-Admn-202考試成功與頂級的Plat-Admn-202考題資源

在這個競爭激烈的IT行業中，擁有一些認證證書是可以幫助你步步高升的。很多公司升職加薪的依據就是你擁有的認證證書的含金量。Salesforce Plat-Admn-202認證考試就是個含金量很高的考試。Salesforce Plat-Admn-202 認證證書能滿足很多正在IT行業拼搏的人的需求。NewDumps可以為你提供Salesforce Plat-Admn-202認證考試的針對性訓練。你可以先在網上免費下載NewDumps為你提供的關於Salesforce Plat-Admn-202 認證考試的培訓工具的試用版和部分練習題及答案作為嘗試。

Salesforce Plat-Admn-202 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"> • App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.
主題 2	<ul style="list-style-type: none"> • Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.
主題 3	<ul style="list-style-type: none"> • Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.
主題 4	<ul style="list-style-type: none"> • Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
主題 5	<ul style="list-style-type: none"> • User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.

最新的 Salesforce Developer Plat-Admn-202 免費考試真題 (Q305-Q310):

問題 #305

Cloud Kicks wants to display 10 key fields at once in a separate section at the top of opportunity records on the desktop. Which component should an app builder add to the record page to enable this functionality?

- A. Custom Lightning Web Component
- **B. Highlights Panel**
- C. Path
- D. Accordion

答案: **B**

解題說明:

Highlights Panel. This is correct because the highlights panel component displays key fields from a record at the top of the page, and it can be configured to show up to 10 fields.

問題 #306

Universal Containers (UC) needs a picklist field called Status on three separate custom objects. UC has a requirement to share the list of values for this field across each object.

- A. Global Picklist Value Set
- B. Shared Custom Field
- C. Related Picklist
- D. Dependent Picklist

答案： A

解題說明：

When multiple objects require the same picklist values, the correct approach is to create a Global Picklist Value Set (also called a Global Value Set). This allows an organization to maintain one centralized list of picklist values that can be reused across multiple picklist fields on different objects.

Why C is correct:Exact Extract:"Global value sets let you share the same picklist values with more than one picklist field. A global value set is a set of shared values that you define once and use in multiple custom picklist fields." - Salesforce Help | Global Value Sets This ensures consistent data values, simplifies maintenance, and makes changes automatically available wherever the global picklist is used.

Why C is correct:Exact Extract:"Global value sets let you share the same picklist values with more than one picklist field. A global value set is a set of shared values that you define once and use in multiple custom picklist fields." - Salesforce Help | Global Value Sets This ensures consistent data values, simplifies maintenance, and makes changes automatically available wherever the global picklist is used.

Why not A (Related Picklist):"Related Picklist" is not a valid Salesforce feature.

Why not B (Shared Custom Field):Salesforce does not provide a "Shared Custom Field" functionality. Each field belongs to a specific object.

Why not D (Dependent Picklist):Dependent picklists control available values based on another field's value. They do not allow reuse of a single value list across multiple objects.

問題 #307

Universal Containers wants to deliver purchased containers to remote construction address. In these cases, the customers will supply UC with the coordinates to the location.

What type of field should the app builder use to capture this information?

- A. Geo location
- B. Text
- C. External Lookup
- D. Number

答案： A

解題說明：

A geolocation field can be used to capture the coordinates of a location in latitude and longitude. This field type can also be used in reports, formulas, validation rules, and Apex

問題 #308

An app builder at Northern Trad Outfitters created a sandbox template for Accounts, Projects, and Project Milestones to reconfigure some flows for the project management app.

Which type of testing environment should the app builder create?

- A. Partial Copy
- B. Scratch Org
- C. Developer Pro

- D. Developer

答案： A

解題說明：

Partial Copy is the type of testing environment that the app builder should create to use a sandbox template for Accounts, Projects, and Project Milestones. According to the Salesforce documentation, "Partial Copy sandboxes copy your production org's configuration (metadata) and some of your production org's data as defined by a sandbox template." Developer, Developer Pro, and Scratch Org are not types of testing environments that support sandbox templates.

問題 #309

What is one limitation of using schema builder when creating a field?

- A. Cannot see existing relationships between objects.
- **B. Cannot add fields to page layouts.**
- C. Cannot create formula fields.
- D. Cannot create lookup relationships.

答案： B

解題說明：

One of the limitations when using the Schema Builder for creating fields is:

C . Cannot add fields to page layouts. While Schema Builder allows for easy visualization and creation of fields and objects, it does not support placing these fields onto specific page layouts directly from the Schema Builder interface.

To place fields on page layouts, you need to:

Navigate to Setup → Object Manager → select your object.

Click on Page Layouts, choose the appropriate layout, and manually add the newly created fields.

This step is necessary to ensure fields are visible and properly arranged on user interfaces.

For more details, Salesforce's Schema Builder documentation outlines its capabilities and limitations.

問題 #310

.....

很多準備參加Salesforce Plat-Admn-202 認證考試的考生在網上也許看到了很多網站也線上提供有關Salesforce Plat-Admn-202 認證考試的資源。但是我們的NewDumps是唯一一家由頂尖行業專家研究的參考材料研究出來的考試練習題和答案的網站。我們的資料能確保你第一次參加Salesforce Plat-Admn-202 認證考試就可以順利通過。
