As you know that the number of the questions and answers in the real E_S4CPE_2405 exam is fixed. So accordingly the information should be collected for you. Our E_S4CPE_2405 study materials have done the right thing for you. However, we will never display all the information in order to make the content appear more. Our E_S4CPE_2405 learning guide just want to give you the most important information. This is why E_S4CPE_2405 actual exam allow you to take the exam in the shortest possible time.

SAP E_S4CPE_2405 Exam Syllabus Topics:

Topic	Details
Topic 1	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of application consultants and covers configuring SAP solutions to meet business needs, along with setting up and managing the SAP Fiori Launchpad. It also touches on customizing the user interface for an optimal and user-friendly experience.
Topic 2	• Data Migration and Business Process Testing: This section of the exam measures skills of SAP implementation consultants and covers the core principles of migrating data into SAP systems while ensuring that business processes run as intended. It involves understanding the methods for transferring data, verifying its accuracy, and executing process testing to confirm that the system meets operational requirements.
Topic 3	• Extensibility, Integration, and Clean Core: This section of the exam measures skills of integration specialists and involves understanding the principles of extending SAP functionality without compromising the clean core approach. It includes integrating SAP with other systems, maintaining system integrity, and ensuring sustainable customizations.

Test engine version is a simulation of real test; you can feel the atmosphere of formal test. You can well know your shortcoming and strength in the course of practicing SAP exam dumps. It adjusts you to do the E_S4CPE_2405 Certification Dumps according to the time of formal test. Most IT workers like using it to test E_S4CPE_2405 practice questions and their ability.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q44-Q49):

NEW QUESTION # 44

What is in scope of Fit-to-Standard workshops in a new implementation? Note: There are 2 correct answers to this question.

- A. Estimating relative effort of the planned changes
- **B. Providing feedback if changes are necessary to make the process fit the customer's needs**
- C. Completing the user acceptance testing on the business processes
- **D. Teaching the customer LOB experts how to navigate end-to-end business processes**

Answer: B,D

Explanation:

Fit-to-Standard workshops are a cornerstone of the SAP Activate Methodology for a new implementation of SAP S/4HANA Cloud Private Edition. These workshops, conducted during the Explore phase, aim to align customer requirements with SAP's standard processes. Let's evaluate the options:

* A. Teaching the customer LOB experts how to navigate end-to-end business processes: This is correct. A primary goal of Fit-to-Standard workshops is to educate customer line-of-business (LOB) experts on SAP S/4HANA's standard end-to-end processes (e.g., order-to-cash, procure-to-pay).

Consultants demonstrate these processes in a sandbox system, enabling customers to understand the system's capabilities and how they align with their business needs.

* B. Estimating relative effort of the planned changes: This is incorrect. While effort estimation for gaps or customizations may occur later (e.g., in backlog prioritization), it's not a core activity of Fit-to-Standard workshops. The focus is on exploring standard processes and identifying gaps, not detailed effort planning.

* C. Completing the user acceptance testing on the business processes: This is incorrect. User acceptance testing (UAT) occurs in the Realize or Deploy phase, not during Fit-to-Standard workshops in the Explore phase. These workshops are about analysis and alignment, not formal testing.

* D. Providing feedback if changes are necessary to make the process fit the customer's needs: This is also correct. During the workshops, customers and consultants collaboratively assess whether the standard processes meet requirements. If gaps are identified, feedback is provided to determine necessary changes (e.g., configuration, extensions), which are then documented for the Realize phase.

In summary, the scope of Fit-to-Standard workshops in a new implementation includes A (Teaching the customer LOB experts how to navigate end-to-end business processes) and D (Providing feedback if changes are necessary to make the process fit the customer's needs).

NEW QUESTION # 45

In a new implementation of SAP S/4HANA Cloud Private Edition, what tool is used for the initial one-time deployment of SAP Best Practices content?

- **A. SAP Central Business Configuration**
- B. SAP Solution Builder

- C. SAP Signavio Process Navigator
- D. SAP Cloud ALM

Answer: A

NEW QUESTION # 46

What are some characteristics of private cloud? Note: There are 2 correct answers to this question.

- A. Perpetual license
- B. Single-tenant server
- C. Lower total cost of ownership than on premise
- D. Software installation on customer site

Answer: B,D

Explanation:

SAP S/4HANA Cloud, Private Edition, is a tailored-to-fit cloud ERP solution that adapts to an organization's unique transformation needs. It is designed to provide the flexibility of a private cloud environment while offering the benefits of cloud computing.

Option B: Single-tenant server

This option is correct. SAP S/4HANA Cloud, Private Edition, operates in a single-tenant environment, meaning that each customer has a dedicated instance of the software. This setup allows for greater customization and control over the system.

SAP

Option C: Software installation on customer site

This option is incorrect. In the private cloud model, the software is hosted on hardware owned by SAP or an infrastructure-as-a-service provider, not on the customer's premises. This approach allows customers to focus on their core business while SAP manages the IT infrastructure.

Option A: Lower total cost of ownership than on-premise

This option is correct. SAP S/4HANA Cloud, Private Edition, offers a subscription-based model, which can lead to a lower total cost of ownership compared to traditional on-premise solutions. This model shifts upfront capital expenses to operating expenses, providing cost efficiency.

Option D: Perpetual license

This option is incorrect. The private cloud edition operates on a subscription-based licensing model rather than a perpetual license. This model provides flexibility and ensures access to the latest updates and innovations.

In summary, SAP S/4HANA Cloud, Private Edition, is characterized by a single-tenant environment and a subscription-based licensing model, with the software hosted by SAP or a service provider rather than installed on the customer's site.

NEW QUESTION # 47

Where can you find pre-delivered integration content? Note: There are 3 correct answers to this question.

- A. SAP Help Portal
- B. Cloud Integration Automation service
- C. SAP Discovery Center
- D. SAP Cloud ALM
- E. SAP Business Accelerator Hub

Answer: A,C,E

NEW QUESTION # 48

In which SAP Activate methodology phase do consultants configure business processes based on the information gathered in the Fit-to-Standard workshops?

- A. Prepare
- B. Explore
- C. Deploy
- D. Realize

Answer: D

Explanation:

In the SAP Activate methodology, the Realize phase is where consultants configure business processes based on the information gathered during the Fit-to-Standard workshops. This phase involves setting up the system according to the agreed-upon requirements and preparing it for testing and deployment.

Option A: Deploy

This option is incorrect. The Deploy phase focuses on moving the configured and tested solution into the production environment and preparing for go-live.

Option B: Explore

This option is incorrect. The Explore phase includes conducting Fit-to-Standard workshops to identify how standard processes fit with the customer's requirements. However, detailed configuration is not performed in this phase.

Option C: Prepare

This option is incorrect. The Prepare phase involves initial planning and preparation activities but does not include configuring business processes.

Option D: Realize

This option is correct. During the Realize phase, consultants configure the system based on the outcomes of the Fit-to-Standard workshops, ensuring that the solution aligns with the customer's business processes and requirements.

In summary, the Realize phase of the SAP Activate methodology is dedicated to configuring business processes as per the insights and decisions made during the Fit-to-Standard workshops, setting the foundation for subsequent testing and deployment activities.

NEW QUESTION # 49

.....
