NEW QUESTION # 52

In which system do you carry out business process testing before any changes or extensions are transported to the production system?

- A. Trial system
- B. Quality system
- C. Sandbox system
- D. Development system

Answer: B

Explanation:

In the implementation of SAP S/4HANA Cloud Private Edition, business process testing is conducted in the following system before any changes or extensions are transported to the production system:

Option A: Sandbox system

This option is incorrect. The sandbox system is primarily used for initial exploration and prototyping, not for formal business process testing.

Option B: Development system

This option is incorrect. The development system is used for configuring and developing customizations but is not the designated environment for comprehensive business process testing.

Option C: Quality system

This option is correct. The quality system is specifically designed for thorough testing of business processes, configurations, and extensions before they are
