Exam SC-900 Simulator Online | New SC-900 Dumps Questions

You can try the Microsoft Security, Compliance, and Identity Fundamentals (SC-900) exam dumps demo before purchasing. If you like our Microsoft Security, Compliance, and Identity Fundamentals (SC-900) exam questions features, you can get the full version after payment. ValidTorrent Microsoft SC-900 Dumps give surety to confidently pass the Microsoft Security, Compliance, and Identity Fundamentals (SC-900) exam on the first attempt.

Microsoft Security, Compliance, and Identity Fundamentals Sample Questions (Q62-Q67):

NEW QUESTION # 62

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You can use Advanced Audit in Microsoft 365 to view billing details.	<input type="radio"/>	<input type="radio"/>
You can use Advanced Audit in Microsoft 365 to view the contents of an email message.	<input type="radio"/>	<input type="radio"/>
You can use Advanced Audit in Microsoft 365 to identify when a user uses the search bar in Outlook on the web to search for items in a mailbox.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
You can use Advanced Audit in Microsoft 365 to view billing details.	<input type="radio"/>	<input checked="" type="radio"/>
You can use Advanced Audit in Microsoft 365 to view the contents of an email message.	<input type="radio"/>	<input checked="" type="radio"/>
You can use Advanced Audit in Microsoft 365 to identify when a user uses the search bar in Outlook on the web to search for items in a mailbox.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Statements	Yes	No
You can use Advanced Audit in Microsoft 365 to view billing details.	<input type="radio"/>	<input checked="" type="radio"/>
You can use Advanced Audit in Microsoft 365 to view the contents of an email message.	<input type="radio"/>	<input checked="" type="radio"/>
You can use Advanced Audit in Microsoft 365 to identify when a user uses the search bar in Outlook on the web to search for items in a mailbox.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: No

Advanced Audit helps organizations to conduct forensic and compliance investigations by increasing audit log retention.

Box 2: No

Box 3: Yes

NEW QUESTION # 63

Select the answer that correctly completes the sentence.

Answer Area

When you enable security defaults in Azure AD, _____ will be enabled for all Azure AD users.

- Azure AD Privileged Identity Management (PIM)
- Azure AD Identity Protection
- Azure AD Privileged Identity Management (PIM)
- multi-factor authentication (MFA)

Answer:

Explanation:

Answer Area

When you enable security defaults in Azure AD, _____ will be enabled for all Azure AD users.

- Azure AD Privileged Identity Management (PIM)
- Azure AD Identity Protection
- Azure AD Privileged Identity Management (PIM)
- multi-factor authentication (MFA)

NEW QUESTION # 64

What should you use in the Microsoft 365 security center to view security trends and track the protection status of identities?

- A. Attack simulator
- B. Reports
- C. Hunting
- D. Incidents

Answer: B

Explanation:

NEW QUESTION # 65

When you enable Azure AD Multi-Factor Authentication (MFA), how many factors are required for authentication?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

In Microsoft's Security, Compliance, and Identity (SCI) learning content, Multi-Factor Authentication (MFA) is defined as requiring more than one verification method during sign-in. Microsoft states: "Multi-factor authentication (MFA) requires two or more verification methods" and Azure AD (Microsoft Entra ID) MFA

"works by requiring two or more of the following: something you know (password), something you have (trusted device or token), something you are (biometrics)." The SCI fundamentals also explain that MFA strengthens authentication beyond a single password by combining distinct factor types, noting that "strong authentication uses at least two different factors to verify identity." When you enable Azure AD MFA, a user must successfully present two factors from those categories to complete the authentication—commonly a password (something you know) plus a second factor such as Microsoft Authenticator approval, a FIDO2 security key, SMS/voice code, or Windows Hello (something you have/are). This is the core of Azure AD's risk-based and conditional access controls, which can require MFA based on conditions or risk signals. Therefore, the number of factors required after enabling Azure AD MFA is two, aligning with Microsoft's definition and implementation of multi-factor authentication in Entra ID.

NEW QUESTION # 66

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Compliance Manager tracks only customer-managed controls.	<input type="radio"/>	<input type="radio"/>
Compliance Manager provides predefined templates for creating assessments.	<input type="radio"/>	<input type="radio"/>
Compliance Manager can help you assess whether data adheres to specific data protection standards.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
Compliance Manager tracks only customer-managed controls.	<input type="radio"/>	<input checked="" type="radio"/>
Compliance Manager provides predefined templates for creating assessments.	<input checked="" type="radio"/>	<input type="radio"/>
Compliance Manager can help you assess whether data adheres to specific data protection standards.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Graphical user interface, text, application, email Description automatically generated
