[2026] SAP C-S4CPB-2502 Questions: Fosters Your Exam Passing Skills

Are you aware of the importance of the C-S4CPB-2502 certification? If your answer is not, you may place yourself at the risk of be eliminated by the labor market. Because more and more companies start to pay high attention to the ability of their workers, and the C-S4CPB-2502 Certification is the main reflection of your ability. And our C-S4CPB-2502 exam question are the right tool to help you get the certification with the least time and efforts. Just have a try, then you will love them!

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q20-Q25):

NEW QUESTION # 20
If a customer wants to develop their own custom application and integrate it with SAP S/4HANA Cloud Public Edition, what tools would you recommend to develop the app? Note: There are 2 correct answers to this question.

- A. SAP Cloud Portal Service
- B. SAP HANA Cloud
- C. SAP Business Application Studio
- D. SAP Build

Answer: C,D

NEW QUESTION # 21
Which of the following are examples of indirect digital access? Note: There are 2 correct answers to this question.

- A. An unattended bot in SAP Build Process Automation
- B. A Production Order created through a non-SAP front-end
- C. A Time Sheet Record from a 3rd party application
- D. A Defect document created through an industry application

Answer: B,C

NEW QUESTION # 22
Through which applications can you launch the Cloud Integration Automation Service (CIAS)? Note: There are 2 correct answers to this question.

- A. SAP Business Accelerator Hub
- B. SAP Cloud ALM
- C. SAP Signavio Process Navigator
- D. SAP for Me

Answer: B,D

Explanation:
You can launch the Cloud Integration Automation Service (CIAS) through the following applications:
* SAP for Me: SAP for Me is your digital companion along your whole SAP customer journey. It provides you with full transparency into your SAP product portfolio, including your licenses, systems, users, orders, contracts, and invoices. You can also access the CIAS from the SAP for Me mobile app.
* SAP Cloud ALM: SAP Cloud ALM is a cloud-based application lifecycle management solution that helps you implement, operate, and optimize your cloud solutions. It offers various tools and services to support your end-to-end business processes, such as process management, task management, test management, and integration monitoring. You can access the CIAS from the SAP Cloud ALM launchpad. References = SAP for Me - Apps on Google Play, SAP for Me - Your digital companion along your whole SAP customer journey, The Future of Our Customer Relationships with SAP for Me | SAP News, SAP for Me: New Entry Point for SAP Support | SAP News Center, [SAP Cloud ALM],

NEW QUESTION # 23
How can you migrate data to SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. With a separate SAP HANA database
- B. With Core Data Services
- C. With XML or CSV templates
- D. With the zero downtime service

Answer: A,C

Explanation:
You can migrate data to SAP S/4HANA Cloud Public Edition using the SAP S/4HANA Migration Cockpit, a tool that provides multiple methods of migrating data from legacy systems, SAP or non-SAP, to the target system1. The SAP S/4HANA Migration Cockpit supports the following migration methods2:
* With XML or CSV templates: You can use predefined templates in XML or CSV format to fill in your source data and upload them to the staging tables in the SAP S/4HANA Cloud system. The templates are based on the predefined migration objects that cover the most common business data, such as master data, transaction data, and configuration data. You can download the templates from the SAP S
/4HANA Migration Cockpit or from the SAP Best Practices Explorer.
* With a separate SAP HANA database: You can use a separate SAP HANA database as a staging area to store your source data and transfer it to the SAP S/4HANA Cloud system. You can use any tool or method to extract your source data from your legacy system and load it to the SAP HANA database.
You can also use the predefined migration objects or create your own custom objects using the migration object modeler.
* Directly from an SAP ERP system: You can connect your SAP ERP system to the SAP S/4HANA Cloud system and transfer your source data directly without using a staging area. You can use the predefined migration objects or create your own custom objects using the migration object modeler.
This method requires the installation of the SAP S/4HANA Migration Cockpit add-on in your SAP ERP system.
The other two options, with the zero downtime service and with Core Data Services, are not valid methods of migrating data to SAP S/4HANA Cloud Public Edition. The zero downtime service is a tool that enables you to upgrade your SAP S/4HANA system with minimal downtime, but it is not used for data migration3. Core Data Services (CDS) are a set of domain-specific languages and services for defining and consuming semantically rich data models, but they are not used for data migration4. References = Migrating Data to SAP S/4HANA Cloud, Public Edition, Migrating Data with the SAP S/4HANA Migration Cockpit, Zero Downtime Service for SAP S/4HANA, Core Data Services (CDS)

NEW QUESTION # 24
What does a partner line of business configuration expert reference when identifying business processes to cover in the Fit-to-Standard workshops?

- A. Business Driven Configuration Questionnaire
- B. SAP Signavio Journey Modeler
- C. Digital Discovery Assessment
- D. SAP Signavio Process Collaboration Hub

Answer: D

Explanation:
A partner line of business configuration expert plays a crucial role in preparing for Fit-to-Standard workshops, which are pivotal in aligning SAP S/4HANA Cloud Public Edition's capabilities with the customer's business requirements. To identify and select relevant business processes for discussion in these workshops, the expert would reference:
* SAP Signavio Process Collaboration Hub: This tool serves as a comprehensive repository and collaboration platform for business process documentation and best practices. It provides detailed insights into various business processes, including their steps, variations, and best practices, as established in the SAP ecosystem. By referencing the SAP Signavio Process Collaboration Hub, a line of business configuration expert can identify relevant standard business processes that SAP S/4HANA Cloud supports, which should be covered during the Fit-to-Standard workshops. This ensures that the workshops focus on processes critical to the customer's operations and that any gaps or customization needs are identified early in the implementation phase.

NEW QUESTION # 25
