

# Questions PL-200 Exam - The Best Microsoft Microsoft Power Platform Functional Consultant - PL-200 Vce Download

P.S. Free 2026 Microsoft PL-200 dumps are available on Google Drive shared by PrepAwayTest: <https://drive.google.com/open?id=1qCU5GbcB10yQdymKX6kxw52ullOthbEB>

The PrepAwayTest recognizes that Microsoft PL-200 aspirants are constantly juggling multiple responsibilities, so questions are ideal for quick preparation. Applicants can access these questions anywhere and at any time, using any smart device, which allows them to learn at their own pace. The Microsoft Power Platform Functional Consultant (PL-200) Questions are portable and you can also print them.

To pass the Microsoft PL-200 exam, candidates must demonstrate their ability to create, manage, and maintain Power Platform applications and solutions. This includes understanding the basics of the platform, such as data modeling and user experience design, as well as more advanced topics like integrating with external data sources and customizing Power Apps using code. Candidates must also be able to design and implement Power Automate workflows, create and analyze reports in Power BI, and build and deploy chatbots using Power Virtual Agents. Overall, the Microsoft PL-200 exam is a comprehensive test of a candidate's knowledge and skills in working with the Microsoft Power Platform, and passing it can be a valuable credential for anyone looking to advance their career in this field.

The PL-200 exam is a great way to demonstrate your expertise in using the Power Platform to design and implement business solutions. Microsoft Power Platform Functional Consultant certification is recognized globally, and it can help you stand out in a competitive job market. By passing the exam, you will gain valuable skills that can be applied to a wide range of industries and businesses. Whether you are a business analyst, project manager, or IT professional, the Microsoft PL-200 Certification is a valuable asset that can help you advance your career.

## Basic Exam Facts

PL-200 test is offered in the English language and can be taken at Pearson VUE. To register for it, candidates must first pay \$165. Note that this fee may vary depending on your location. When it comes to the exam format, the applicants will be provided with 40 to 60 questions and will be given 180 minutes to answer them. A total number of marks that can be earned is 1000, and one should achieve a score of 700 points or above to pass.

Audit changes to its data

Table to be configured

Feeding

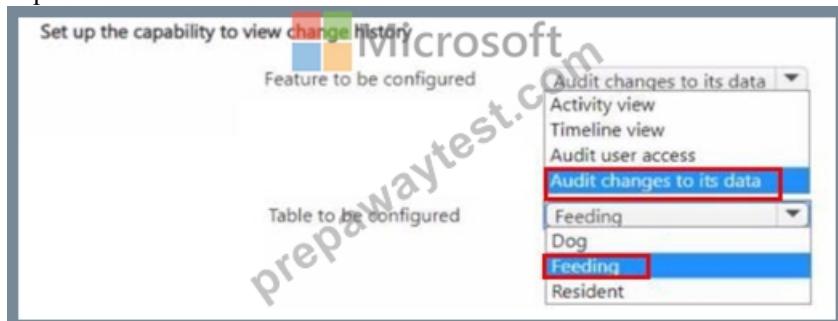

Dog

Feeding

Resident

**Answer:**

Explanation:

Set up the capability to view change history

Feature to be configured

Audit changes to its data

Activity view

Timeline view

Audit user access

Audit changes to its data

Table to be configured

Feeding

Dog

Feeding

Resident

#### NEW QUESTION # 75

You set up a new instance of Dynamics 365 for Customer Service. Users report a variety of issues working with cases on mobile devices. You need to configure the mobile app to be able to view cases.

NOTE: Each correct selection is worth one point.

Scenario	Action needed
Users cannot see case records on mobile devices.	<p>Configure mobile settings set on the case entity level.</p> <p>Configure mobile settings at the field level within the case form.</p> <p>Configure a security role in the mobile permission set for appropriate users.</p>
Users can open cases but cannot see the subject of the case.	<p>Configure mobile settings set at the case entity level.</p> <p>Configure mobile settings at the field level within the case form.</p> <p>Configure a security role in the mobile permission set for appropriate users.</p>
Users report that they cannot access the system from the Dynamics 365 mobile app.	<p>Configure mobile settings set at the case entity level.</p> <p>Configure mobile settings at the field level within the case form.</p> <p>Configure a security role in the mobile permission set for appropriate users.</p>

**Answer:**

Explanation:

Scenario	Action needed
Users cannot see case records on mobile devices.	<div style="border: 1px solid black; padding: 5px;"> <input checked="" type="checkbox"/> Configure mobile settings set on the case entity level.  <input checked="" type="checkbox"/> Configure mobile settings at the field level within the case form.  <input checked="" type="checkbox"/> Configure a security role in the mobile permission set for appropriate users.         </div>
Users can open cases but cannot see the subject of the case.	<div style="border: 1px solid black; padding: 5px;"> <input checked="" type="checkbox"/> Configure mobile settings set at the case entity level.  <input checked="" type="checkbox"/> Configure mobile settings at the field level within the case form.  <input checked="" type="checkbox"/> Configure a security role in the mobile permission set for appropriate users.         </div>
Users report that they cannot access the system from the Dynamics 365 mobile app.	<div style="border: 1px solid black; padding: 5px;"> <input checked="" type="checkbox"/> Configure mobile settings set at the case entity level.  <input checked="" type="checkbox"/> Configure mobile settings at the field level within the case form.  <input checked="" type="checkbox"/> Configure a security role in the mobile permission set for appropriate users.         </div>

#### NEW QUESTION # 76

You create a Power Platform help Desk solution.

You need to create a dashboard that displays information on help desk cases that are handled each week.

Which dashboard components should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Requirement

#### Component type

Add a tag chart by using opened cases.

<input checked="" type="checkbox"/> System chart <input checked="" type="checkbox"/> Personal dashboard <input checked="" type="checkbox"/> Area chart
--

Add a stacked column chart shared with your team.

<input checked="" type="checkbox"/> System chart <input checked="" type="checkbox"/> Personal dashboard <input checked="" type="checkbox"/> Area chart
--

Add a Microsoft Power BI visualization.

<input checked="" type="checkbox"/> System chart <input checked="" type="checkbox"/> Personal dashboard <input checked="" type="checkbox"/> Area chart
--

Add a chart from a view that a user creates.

<input checked="" type="checkbox"/> System chart <input checked="" type="checkbox"/> Personal dashboard <input checked="" type="checkbox"/> Area chart
--

Add a doughnut chart that shows cases by owner.

<input checked="" type="checkbox"/> System chart <input checked="" type="checkbox"/> Personal dashboard <input checked="" type="checkbox"/> Area chart
--

#### Answer:

Explanation:

Requirement	Component type
Add a tag chart by using opened cases.	<div style="border: 1px solid black; padding: 5px; display: inline-block;"> System chart  Personal dashboard  Area chart </div>
Add a stacked column chart shared with your team.	<div style="border: 1px solid black; padding: 5px; display: inline-block;"> System chart  Personal dashboard  Area chart </div>
Add a Microsoft Power BI visualization.	<div style="border: 1px solid black; padding: 5px; display: inline-block;"> System chart  Personal dashboard  Area chart </div>
Add a chart from a view that a user creates.	<div style="border: 1px solid black; padding: 5px; display: inline-block;"> System chart  Personal dashboard  Area chart </div>
Add a doughnut chart that shows cases by owner.	<div style="border: 1px solid black; padding: 5px; display: inline-block;"> System chart  Personal dashboard  Area chart </div>

#### Explanation

Box 1: Area chart

Box 2: System chart

System charts are organization-owned charts, which makes them available to anyone with access to read the data running the app. System charts can't be assigned or shared with specific app users.

Box 3: Personal dashboard

Box 4: Personal dashboard

Box 5: Area chart

#### NEW QUESTION # 77

You are using a development environment to add a new column to a system table. You plan to move the changes to a test environment when they are complete.

The changes must meet the following requirements:

\* Must be clearly identified so that they are not confused with system components and components from other solutions.

\* Must not affect any existing components in the test environment.

You need to prepare a solution for deployment to the test environment.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

Create a new unmanaged solution and select the correct publisher.

Create a new publisher.

Select a managed solution and add the correct publisher.

Add the table with all components to the solution.

Choose an existing publisher.

Add the table to the solution and add the new column.

Run the solution checker on the solution.

**Answer area**

Create a new publisher.

Create a new unmanaged solution and select the correct publisher.

Add the table to the solution and add the new column.

Run the solution checker on the solution.

Microsoft

## Answer:

### Explanation:

**Actions**

Create a new unmanaged solution and select the correct publisher.

Create a new publisher.

Select a managed solution and add the correct publisher.

Add the table with all components to the solution.

Choose an existing publisher.

Add the table to the solution and add the new column.

Run the solution checker on the solution.

**Answer area**

Create a new publisher.

Create a new unmanaged solution and select the correct publisher.

Add the table to the solution and add the new column.

Run the solution checker on the solution.

Microsoft

### Explanation

**Answer area**

Create a new publisher.

Create a new unmanaged solution and select the correct publisher.

Add the table to the solution and add the new column.

Run the solution checker on the solution.

Microsoft

### Step 1: Create a new publisher

#### Solution publisher

Every app and other solution components such as entities you create or any customization you make is part of a solution. Because every solution has a publisher, you should create your own publisher rather than use the default. You specify the publisher when you create a solution.

Step 2: Create a new unmanaged solution and select the correct publisher  
Unmanaged solutions are used in development environments while you make changes to your application.

Unmanaged solutions can be exported either as unmanaged or managed. Exported unmanaged versions of your solutions should be checked into your source control system. Unmanaged solutions should be considered your source for Microsoft Power Platform assets. When an unmanaged solution is deleted, only the solution container of any customizations included in it is deleted. All the unmanaged customizations remain in effect and belong to the default solution.

Step 3: Add the table to the solution and add the new column.

Step 4: Run the solution checker on the solution

Use solution checker to validate your model-driven apps in Power Apps.

## NEW QUESTION # 78

You need to set up a security role for the care staff.

Which privileges should you set? To answer, move the appropriate privileges to the correct create, read, write tables. You may use each create, read, write privileges once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Privileges	Table with Create - Read - Write privileges
None - Organization - None	Tables Adopters Dogs Residents
Organization - Organization - None	Create - Read - Write
None - Organization - Organization	

**Answer:**

Explanation:

Privileges	Table with Create - Read - Write privileges
None - Organization - None	Tables Adopters Dogs Residents
Organization - Organization - None	Create - Read - Write
None - Organization - Organization
