But you don't have to worry about this when buying our CLF-C02 Study Materials. Not only will we fully consider for customers before and during the purchase, but we will also provide you with warm and thoughtful service after payment. We have a special technical customer service staff to solve all kinds of consumers' problems.

Amazon AWS Certified Cloud Practitioner Sample Questions (Q446-Q451):

NEW QUESTION # 446

A company must archive Amazon S3 data that the company's business units no longer need to access. Which S3 storage class will meet this requirement MOST cost-effectively?

- A. S3 One Zone-Infrequent Access (S3 One Zone-IA)
- **B. S3 Glacier Deep Archive**
- C. S3 Glacier Flexible Retrieval
- D. S3 Glacier Instant Retrieval

Answer: B

Explanation:

Explanation

S3 Glacier Deep Archive is Amazon S3's lowest-cost storage class and supports long-term retention and digital preservation for data that may be accessed once or twice in a year. It is designed for customers - particularly those in highly-regulated industries, such as the Financial Services, Healthcare, and Public Sectors

- that retain data sets for 7-10 years or longer to meet regulatory compliance requirements. Customers can store large amounts of data at a very low cost, and reliably access it with a wait time of 12 hours³.

NEW QUESTION # 447

Which AWS service or feature can be used to create a private connection between an on-premises workload and an AWS Cloud workload?

- A. Amazon Route 53
- B. AWS PrivateLink
- **C. AWS Direct Connect**
- D. Amazon Macie

Answer: C

Explanation:

AWS Direct Connect is a service that establishes a dedicated network connection between your on-premises network and one or more AWS Regions. AWS Direct Connect can be used to create a private connection between an on-premises workload and an AWS Cloud workload, bypassing the public internet and reducing network costs, latency, and bandwidth issues. AWS Direct Connect can also provide increased security and reliability for your hybrid cloud applications and data transfers. References:

NEW QUESTION # 448

A company wants to build, train, and deploy machine learning (ML) models. Which AWS service can the company use to meet this requirement?

- A. Amazon SageMaker
- B. Amazon Forecast
- C. Amazon Comprehend
- D. Amazon Personalize

Answer: A

NEW QUESTION # 449

A company needs to search for text in documents that are stored in Amazon S3. Which AWS service will meet these requirements?

- A. Amazon Rekognition
- B. Amazon Lex
- C. Amazon Kendra
- D. Amazon Polly

Answer: C

Explanation:

Amazon Kendra is a highly accurate and easy to use intelligent search service powered by machine learning. It enables users to easily find the content they are looking for, even when it is scattered across multiple locations and content repositories within their organization. Amazon Kendra supports natural language queries, and can search for text in documents stored in Amazon S3, as well as other sources such as SharePoint, OneDrive, Salesforce, ServiceNow, and more.

Amazon Rekognition is a computer vision service that makes it easy to add image and video analysis to applications. It can detect objects, faces, text, scenes, activities, and emotions in images and videos. However, it is not designed for searching for text in documents stored in Amazon S3.

Amazon Polly is a text-to-speech service that turns text into lifelike speech. It can create audio versions of books, articles, podcasts, and more. However, it is not designed for searching for text in documents stored in Amazon S3.

Amazon Lex is a service for building conversational interfaces using voice and text. It can create chatbots that can interact with users using natural language. However, it is not designed for searching for text in documents stored in Amazon S3.

NEW QUESTION # 450

What is the total volume of data that can be stored in Amazon S3?

- A. 10 PB
- B. Virtually unlimited
- C. 50 PB
- D. 100 PB

Answer: B

Explanation:

Amazon S3 offers virtually unlimited storage, allowing customers to store and retrieve any amount of data.

There are no practical limits to the total volume of data that can be stored in S3, making it suitable for applications that require vast amounts of storage. The options of 10 PB, 50 PB, and 100 PB are incorrect as they do not reflect the actual scale of S3.

NEW QUESTION # 451
