high passing score easier. Our valid COF-C02 test questions can be instantly downloaded and easy to understand with our 100% correct exam answers. One-year free update right will enable you get the latest COF-C02 VCE Dumps anytime and you just need to check your mailbox.

Snowflake is a cloud-based data warehousing platform that has revolutionized the way organizations manage and analyze their data. As the demand for Snowflake continues to grow, so does the need for skilled professionals who can effectively utilize the platform to its fullest potential. This is where the Snowflake COF-C02 (SnowPro Core Certification) Certification Exam comes in.

Snowflake SnowPro Core Certification Exam Sample Questions (Q382-Q387):

NEW QUESTION # 382

When using the ALLOW_CLIENT_MFA_CACHING parameter, how long is a cached Multi-Factor Authentication (MFA) token valid for?

- A. 1 hour
- B. 2 hours
- C. 4 hours
- D. 8 hours

Answer: C

Explanation:

When using the ALLOW_CLIENT_MFA_CACHING parameter, a cached Multi-Factor Authentication (MFA) token is valid for up to 4 hours. This allows for continuous, secure connectivity without users needing to respond to an MFA prompt at the start of each connection attempt to Snowflake within this timeframe.

NEW QUESTION # 383

Which Snowflake feature is used to track sensitive data to ensure compliance, identify data, and monitor resource usage?

- A. Object tagging
- B. Multi-Factor Authentication (MFA)
- C. Data classification
- D. Data quality monitoring

Answer: D

NEW QUESTION # 384

There are two Snowflake accounts in the same cloud provider region: one is production and the other is non-production. How can data be easily transferred from the production account to the non-production account?

- A. Create a reader account using the production account and link the reader account to the non-production account.
- B. Create a subscription in the production account and have it publish to the non-production account.
- C. Create a data share from the production account to the non-production account.
- D. Clone the data from the production account to the non-production account.

Answer: C

Explanation:

To easily transfer data from a production account to a non-production account in Snowflake within the same cloud provider region, creating a data share is the most efficient approach. Data sharing allows for live, read-only access to selected data objects from the production account to the non-production account without the need to duplicate or move the actual data. This method facilitates seamless access to the data for development, testing, or analytics purposes in the non-production environment.
