## 2026 JN0-351 Practice Test Pdf | Reliable JN0-351: Enterprise Routing and Switching, Specialist (JNCIS-ENT) 100% Pass

Our Software version has the advantage of simulating the real JN0-351 exam environment. Many candidates can't successfully pass

their real JN0-351 exams for the reason that they are too nervous to performance rightly as they do the practices. This Software version of JN0-351 practice materials will exactly help overcome their psychological fear. Besides, the scores will show out when you finish the practice, so after a few times, you will definitely do it better and better. You will be bound to pass your JN0-351 Exam since you have perfected yourself in taking the JN0-351 exam.

## Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) Sample Questions (Q135-Q140):

### NEW QUESTION # 135

You have configured OSPF routing as shown in the exhibit. You notice that all interfaces have formed full adjacencies, with the exception of the interfaces connecting R3 and R4 with a status of 2Way.

What is the reason for this status?

- A. The two routers must be configured in different areas.
- B. The interface-type is not configured as p2p.
- C. The two routers must both be configured as DR routers.
- D. DROther routers will not form a full adjacency with each other.

**Answer: D**

### NEW QUESTION # 136

Which statement is correct about the configuration shown in the exhibit?

- A. The ge-0/0/0 and ge-0/0/1 interfaces are operating in trunk mode.
- B. All three interfaces are operating in access mode.
- C. The configuration will not complete the commit check process and will error out.
- D. The ge-0/0/2 interface is operating as a Layer 3 interface.

**Answer: B**

### NEW QUESTION # 137

You must implement filter-based forwarding. You need to direct traffic from the 192.168.1.0/24 through vr1 and traffic from 10.210.0.128/26 through vr2.

Which configuration is correct in this scenario?

- A.
- B.
- C.
- D.

**Answer: D**

### NEW QUESTION # 138

Which statement is correct about IP-IP tunnels?

- A. The TTL in the inner packet is decremented during transit to the tunnel endpoint.
- B. IP-IP tunnels only support encapsulating IP traffic.
- C. There are 24 bytes of overhead with IP-IP encapsulation.
- D. IP-IP tunnels only support encapsulating non-IP traffic.

**Answer: B**

Explanation:

Explanation

IP-IP tunnels are a type of tunnels that use IP as both the encapsulating and encapsulated protocol. IP-IP tunnels are simple and easy to configure, but they do not provide any security or authentication features. IP-IP tunnels only support encapsulating IP traffic, which means that the payload of the inner packet must be an IP packet. IP-IP tunnels cannot encapsulate non-IP traffic, such as

Ethernet frames or MPLS labels1.

Option A is correct, because IP-IP tunnels only support encapsulating IP traffic. Option B is incorrect, because IP-IP tunnels only support encapsulating non-IP traffic. Option C is incorrect, because the TTL in the inner packet is not decremented during transit to the tunnel endpoint. The TTL in the outer packet is decremented by each router along the path, but the TTL in the inner packet is preserved until it reaches the tunnel endpoint2.

Option D is incorrect, because there are 20 bytes of overhead with IP-IP encapsulation. The overhead consists of the header of the outer packet, which has a fixed size of 20 bytes for IPv43.

### NEW QUESTION # 139

You need to configure a LAG between your switches. In this scenario, which two statements are correct? (Choose two.)

- A. Duplex and speed settings are required to match on both participating devices.
- B. Member links are required to be contiguous ports.
- C. Duplex and speed settings are not required to match on both participating devices.
- D. Member links are not required to be contiguous ports.

**Answer: A,D**

Explanation:

Up to 64 Ethernet interfaces can be grouped to form a LAG, and In a Junos Fusion, up to 1,000 LAGs are supported on QFX10002 switches acting as aggregation devices.

The LAG must be configured on both sides of the link.

The interfaces on either side of the link must be set to the same speed and be in full-duplex mode.

### NEW QUESTION # 140

.....

It is important to check the exercises and find the problems. Once you use our JN0-351 study prep to aid your preparation of the exam, all of your exercises of the study materials will be carefully recorded on the system of the JN0-351 exam braindump. Also, you can know your current learning condition clearly. The results will display your final scores on the screen. Also, you will know the numbers of correct and false questions of your exercise. Our JN0-351 test question grading system is designed to assist your study, which is able to calculate quickly. So you don't need to wait for a long time. The calculating speed of our JN0-351 study prep is undergoing the test of practice. The highest record is up to five seconds. There has no delay time of the grading process. Slow system response doesn't exist. In addition, the calculation system of the JN0-351 test question is very powerful and stable. We promise that the results of your exercises are accurate.

**JN0-351 Valid Test Pass4sure:** <https://www.vcedumps.com/JN0-351-examcollection.html>

The high pass rate of the JN0-351 exam training torrent had helped many candidates passed the actual test successfully, If you feel unconfident in self-preparation for your JN0-351 test and want to get professional aid of questions and answers, VCEDumps JN0-351 test questions materials will guide you and help you to pass the certification exams in one shot, Valid JN0-351 Dumps for Juniper JN0-351 Certification Exam.
