Latest XK0-006 Exam Labs - Flexible XK0-006 Testing Engine

Owing to our high-quality XK0-006 real test and high passing rate, our company has been developing faster and faster and gain good reputation in the world. Our education experts are adept at designing and researching exam questions and answers of XK0-006 study torrent. What's more, we can always get latest XK0-006 exam information resource. We have unique advantages on study guide materials. Our high passing rate is the leading position in this field. We are the best choice for candidates who are eager to pass exams and acquire the certifications. Our XK0-006 Actual Exam will be definitely conducive to realizing the dream of obtaining the certificate.

CompTIA Linux+ Certification Exam Sample Questions (Q70-Q75):

NEW QUESTION # 70

SIMULATION 1

A new drive was recently added to a Linux system. Using the environment and tokens provided, complete the following tasks:

- Create an appropriate device label.
- Format and create an ext4 file system on the new partition.

The current working directory is /.

INSTRUCTIONS

Use the drop-down menus to select the proper objects to complete these tasks.

Some commands are partially complete.

Not all objects will be used, and some may be used more than once.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

□

Answer:

Explanation:

□

Explanation:

mklabel gpt initializes the new disk /dev/sdc with a GPT partition table.

mkpart primary ext4 1 10G creates a primary partition using the ext4 type between 1MB and 10GB on /dev/sdc.

mkfs.ext4 /dev/sdc1 formats the newly created partition /dev/sdc1 with the ext4 filesystem, completing the setup.

NEW QUESTION # 71

To perform a live migration, which of the following must match on both host servers? (Choose two).

- A. Disk storage path
- B. Available memory
- C. Available swap
- D. CPU architecture
- E. Network speed
- F. USB ports

Answer: A,D

Explanation:

CPU architecture must match because live migration requires CPU compatibility to continue running the virtual machine without errors.

Disk storage path must match so the migrated VM can access its virtual disks seamlessly on the destination host.

NEW QUESTION # 72

A systems administrator is working on an SFTP server configuration. Which of the following commands will best enable the connectivity to that service from the 10.10.0.0/24 network?

- A. sudo ufw allow in on eth0 to any port 22
- B. sudo ufw allow from 10.10.0.0/24
- C. sudo ufw allow from 10.10.0.0/24 to any port 22
- D. sudo ufw allow 0:22/tcp from 10.10.0.0

Answer: C

Explanation:

The command sudo ufw allow from 10.10.0.0/24 to any port 22 explicitly opens TCP port 22 (used by SFTP/SSH) only for hosts in the 10.10.0.0/24 network.

NEW QUESTION # 73

An average of one out of three users in a company cannot reach the company website. A Linux administrator determines that one of the three website servers is down. The administrator inspects the DNS configuration for the website and notices the following entry:

□

Which of the following accurately explains the issue?

- A. DNS returns all three records in a different order each time, and the browser typically uses the first address in the DNS response.
- B. The administrator has incorrectly configured the DNS server to be an iterative resolver instead of an authoritative resolver.
- C. The DNS configuration is missing corresponding AAAA records and PTR records, and this is causing clients to fail the hostname translation.
- D. One of the DNS records has not been signed with a DNSSEC-supported key, and this is causing some web browsers to reject the DNS response.

Answer: A

Explanation:

With multiple A records, DNS performs simple round-robin ordering and returns the records in a different sequence on each query.

Most clients try the first address returned-so when the downed server's IP appears first (about one in three times), those users cannot connect.

NEW QUESTION # 74

A systems administrator needs to set the IP address of a new DNS server. Which of the following files should the administrator modify to complete this task?

- A. `/etc/resolv.conf`
- B. `/etc/whois.conf`
- C. `/etc/nsswitch.conf`
- D. `/etc/dnsmasq.conf`

Answer: A

Explanation:

The `/etc/resolv.conf` file defines DNS resolver settings, including the IP addresses of DNS servers that the system should use for hostname resolution.

NEW QUESTION # 75

.....

It is known to us that passing the XK0-006 exam is very difficult for a lot of people. Choosing the correct study materials is so important that all people have to pay more attention to the study materials. If you have any difficulty in choosing the correct XK0-006 preparation materials, here comes a piece of good news for you. The XK0-006 Prep Guide designed by a lot of experts and professors from company are very useful for all people to pass the practice exam and help them get the CompTIA certification in the shortest time. And our pass rate is high as more than 98%.
