

# Free PDF Quiz 2026 Microsoft DP-300: Pass-Sure Administering Relational Databases on Microsoft Azure Reliable Test Objectives

## Learning path for Azure Database Administrator Associate

P.S. Free 2026 Microsoft DP-300 dumps are available on Google Drive shared by ValidVCE: <https://drive.google.com/open?id=1M2aczjbfyCFxNqQ5U27Jm2ZRjbYJJyt2>

The pass rate is 98% for DP-300 exam bootcamp, and if you choose us, we can ensure you that you can pass the exam and obtain the certification successfully. In addition, DP-300 exam materials are edited by professional experts, therefore they are high-quality, and you can improve your efficiency by using DP-300 Exam braindumps of us. We offer you free demo to have a try before buying DP-300 training materials, so that you can know what the complete version is like. We have online and offline chat service for DP-300 training materials, and if you have any questions, you can consult us.

## Certification Path and Prerequisites

Microsoft DP-300 is the exam that every candidate is mandated to pass in order to get the Microsoft Certified: Azure Database Administrator Associate certification. It proves that one has the skills to deploy, install and administer databases in Microsoft Azure.

The main role of Azure Database Administrators is to implement and manage operational features of hybrid data platform and cloud-native solutions. Therefore, one should be skilled in using various methods and tools to perform day-to-day operations. In addition, the ideal candidates for this test should have a profound understating on all the fundamental concepts in this area and understand how to utilize T-SQL.

## Exam DP-300 Study Guide - DP-300 Test Testking

We believe our DP-300 exam questions will meet all demand of all customers. If you long to pass the exam and get the certification successfully, you will not find the better choice than our DP-300 preparation questions. Now you can have a chance to try our DP-300 study braindumps before you pay for them. There are the free demos on our website for you download to check the quality and validity of our DP-300 practice engine. Just have a try, then you will fall in love with our DP-300 learning quiz!

## Microsoft Administering Relational Databases on Microsoft Azure Sample Questions (Q276-Q281):

### NEW QUESTION # 276

You have an Azure SQL database that contains a table named Customer. Customer has the columns shown in the following table.

You plan to implement a dynamic data mask for the Customer\_Phone column. The mask must meet the following requirements:

The first six numerals of each customer's phone number must be masked.

The last four digits of each customer's phone number must be visible.

Hyphens must be preserved and displayed.

How should you configure the dynamic data mask? To answer, select the appropriate options in the answer area.

**Answer:**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/sql/relational-databases/security/dynamic-data-masking>

### NEW QUESTION # 277

You have SQL Server on an Azure virtual machine.

You review the query plan shown in the following exhibit.

For each of the following statements, select yes if the statement is true. Otherwise, select no.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

Reference:

### NEW QUESTION # 278

You have an Azure virtual machine named VM1 that runs Windows Server 2022 and hosts a Microsoft SQL Server 2019 instance named SQL1.

You need to configure SQL1 to use mixed mode authentication.

Which procedure should you run?

- A. **xp\_instance\_regwrite**
- B. sp\_change\_users\_login
- C. xp\_grant\_login
- D. sp\_addremotelogin

**Answer: A**

Explanation:

<https://learn.microsoft.com/en-us/sql/database-engine/configure-windows/change-server-authentication-mode?view=sql-server-ver16> USE [master] GO EXEC xp\_instance\_regwrite N'HKEY\_LOCAL\_MACHINE', N'Software\Microsoft\MSSQLServer\MSSQLServer', N'LoginMode', REG\_DWORD, 1; GO

### NEW QUESTION # 279

You have an Azure SQL database named DB1 in the General Purpose service tier.

The performance metrics for DB1 are shown in the following exhibit.

You need to reduce the Log 10 percentage. The solution must minimize costs.

What should you do?

- A. B. Change Recovery model to Simple.
- B. **Change Service tier to Business Critical.**
- C. Increase the number of vCores.
- D. Perform checkpoint operation.

**Answer: B**

### NEW QUESTION # 280

You have an Azure Data Factory instance named ADF1 and two Azure Synapse Analytics workspaces named WS1 and WS2.

ADF1 contains the following pipelines:

P1: Uses a copy activity to copy data from a nonpartitioned table in a dedicated SQL pool of WS1 to an Azure Data Lake Storage

Gen2 account P2: Uses a copy activity to copy data from text-delimited files in an Azure Data Lake Storage Gen2 account to a

nonpartitioned table in a dedicated SQL pool of WS2 You need to configure P1 and P2 to maximize parallelism and performance.

Which dataset settings should you configure for the copy activity of each pipeline? To answer, select the appropriate options in the
