C-S4PM-2504 Valid Examcollection & C-S4PM-2504 Free Practice

It is acknowledged that there are numerous C-S4PM-2504 learning questions for candidates for the exam, however, it is impossible for you to summarize all of the key points in so many materials by yourself. But since you have clicked into this website for C-S4PM-2504 practice materials you need not to worry about that at all because our company is especially here for you to solve this problem. We have a lot of regular customers for a long-term cooperation now since they have understood how useful and effective our C-S4PM-2504 Actual Exam is. So will you!

SAP C-S4PM-2504 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Project Management• Organizational Change Management (OCM): This section of the exam measures the skills of Project Managers and covers the key principles of managing SAP cloud implementation projects, including team coordination, stakeholder communication, and change management. It evaluates the ability to lead project activities, manage expectations, and handle resistance during digital transformation. Emphasis is placed on aligning organizational goals with implementation strategies to ensure effective user adoption and project success.
Topic 2	<ul style="list-style-type: none">• SAP Activate Methodology: This section of the exam measures skills of Business Process Architects and covers the structure and practical application of SAP Activate. It includes understanding the phases of the methodology: Discover, Prepare, Explore, Realize, Deploy, and Run, and the use of supporting tools such as SAP Roadmap Viewer and SAP Best Practices. Candidates are expected to demonstrate the ability to apply this methodology to streamline cloud implementation processes and ensure agile delivery.

Topic 3	<ul style="list-style-type: none"> • SAP S • 4HANA Cloud Public Edition Implementation: This section of the exam measures the skills of Implementation Consultants and covers the foundational aspects of deploying SAP S • 4HANA Cloud Public Edition in a business environment. It focuses on understanding system architecture, scope definition, and the technical and functional setup required for a successful implementation. The candidate is expected to have a strong grasp of how to execute the necessary configuration and adoption tasks that align with customer-specific requirements.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q39-Q44):

NEW QUESTION # 39

What can you find in the SAP Fiori apps reference library?

Note: There are 3 correct answers to this question.

- A. Related app recommendations based on your usage profile
- B. Shortcut to the Maintenance Planner tool to establish the technical update path
- C. Shortcut to the Quicksizer tool to estimate hardware requirements
- D. Installation and configuration requirements for selected apps
- E. Related app-specific solution design guidelines

Answer: A,D,E

NEW QUESTION # 40

Why does SAP recommend to document alternative processes when implementing SAP S/4HANA Cloud Public Edition?

- A. To ensure alternative processes are permanently used instead of standard features
- B. To allow the system to be fully customized for the customer
- C. To allow for future deprecation of alternative processes when standard solutions become available
- D. To suggest new feature alternative business processes for SAP inclusion in future upgrades

Answer: C

NEW QUESTION # 41

Which of the following steps are part of the fit-to-standard process?

Note: There are 2 correct answers to this question.

- A. Design to-be business process models
- B. Enable customers on standard business processes
- C. Document integration requirements
- D. Review Best Practices process flow

Answer: B,D

NEW QUESTION # 42

Which organizational change management activity is usually performed in which SAP Activate phase? Note:

There are 2 correct answers to this question.

- A. The change plan is usually developed in the explore phase.
- B. The business readiness assessment is usually conducted in the discover phase.
- C. The change assessment is usually conducted in the prepare phase.
- D. The user adoption analysis is usually conducted in the run phase.

Answer: C,D

Explanation:

Organizational Change Management (OCM) activities in SAP S/4HANA Cloud Public Edition projects are aligned with specific SAP Activate phases to ensure timely execution and effective adoption.

* Option A: The change assessment is usually conducted in the prepare phase. Correct. The change assessment, which evaluates the organization's readiness for change, is typically performed in the Prepare phase. The SAP S/4HANA Cloud OCM Guide states, "In the Prepare phase, a change assessment is conducted to evaluate the organization's change readiness, identify risks, and inform the change management strategy."

* Option B: The business readiness assessment is usually conducted in the discover phase. Incorrect.

The business readiness assessment occurs in the Deploy phase to ensure the organization is prepared for go-live. The SAP Activate Methodology Guide notes, "Business readiness assessments are conducted in the Deploy phase to confirm the organization's preparedness for system activation."

* Option C: The user adoption analysis is usually conducted in the run phase. Correct. User adoption analysis, which measures how users engage with the system, is performed in the Run phase post-go-live. The SAP S/4HANA Cloud OCM Guide explains, "User adoption analysis is a Run phase activity that evaluates actual system usage and adoption metrics to identify areas for improvement."

* Option D: The change plan is usually developed in the explore phase. Incorrect. The change plan is developed in the Prepare phase to outline the OCM approach. The SAP Activate Methodology Guide clarifies, "The initial change plan is created in the Prepare phase, with refinements occurring in the Explore phase based on workshop outcomes." Extract from Official Documentation:

* SAP S/4HANA Cloud OCM Guide (SAP Help Portal, <https://help.sap.com>): "The Prepare phase includes the change assessment to evaluate readiness, while the Run phase focuses on user adoption analysis to measure system engagement post-go-live."

* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "Change management activities are phased, with change assessments in the Prepare phase to set the foundation and user adoption analysis in the Run phase to assess post-implementation success." Additional Context:

The timing of OCM activities is critical to align with project milestones. The change assessment in Prepare sets the stage for change management, while user adoption analysis in Run provides insights for ongoing optimization, ensuring a holistic approach to adoption.

SAP OCM Best Practices: Outlines activity timing.

NEW QUESTION # 43

Which system tenant is the first to be provisioned when implementing SAP S/4HANA Cloud, public edition?

- A. Central Business Configuration system
- B. SAP S/4HANA Cloud Development system
- C. SAP Cloud Identity Services
- D. SAP S/4HANA Cloud Sandbox system

Answer: A

Explanation:

The implementation of SAP S/4HANA Cloud Public Edition involves provisioning multiple system tenants in a specific sequence to support configuration, testing, and production. The first tenant provisioned sets the foundation for subsequent activities.

* Option A: SAP S/4HANA Cloud Sandbox system. Incorrect. The Sandbox system is provisioned later for prototyping and testing, not as the first tenant. The SAP S/4HANA Cloud Implementation Guide states, "The Sandbox system is provisioned after initial configuration to support exploration and testing, not as the first tenant."

* Option B: SAP S/4HANA Cloud Development system. Incorrect. There is no dedicated Development system in SAP S/4HANA Cloud Public Edition; development occurs in other systems. The SAP S/4HANA Cloud Study Guide notes, "Development activities are handled in Sandbox or Test systems, not a separate Development tenant."

* Option C: SAP Cloud Identity Services. Incorrect. SAP Cloud Identity Services manage user authentication but are not the first tenant provisioned for implementation. The SAP S/4HANA Cloud Security Guide clarifies, "SAP Cloud Identity Services are configured alongside implementation systems, not as the initial tenant."

* Option D: Central Business Configuration system. Correct. The Central Business Configuration (CBC) system is the first tenant provisioned, enabling scoping and configuration of the SAP S/4HANA Cloud solution. The SAP Central Business Configuration Guide explains, "The Central Business Configuration system is the first tenant provisioned in SAP S/4HANA Cloud Public Edition, providing the platform for defining scope, organizational structure, and pre-configuration." Extract from Official Documentation:

* SAP Central Business Configuration Guide (SAP Help Portal, <https://help.sap.com>): "The Central Business Configuration system is the first tenant provisioned when implementing SAP S/4HANA Cloud Public Edition, enabling the initial scoping and configuration of the solution."
