## Salesforce Order Management Administrator Accredited Professional Sample Questions (Q56-Q61):

### NEW QUESTION # 56

An administrator wants to collect additional information from the customer when they cancel items on an Order Summary. How can the administrator modify the user interface to collect this information?

- A. Create a lightning web component with the additional questions and add it to the Order Summary lightning record page
- B. Modify the Return Item Flow to collect the additional information
- C. Copy the Cancel Item Flow and add a screen component with the new questions
- D. Create a workflow rule that fires when an Order Summary is edited with field update actions for each of the questions that needs to be answered

**Answer: C**

### NEW QUESTION # 57

What are three tools that can be used to deploy changes to a Salesforce Org?  
Choose 3 answers

- A. Developer Console
- B. Change Sets
- C. Release Manager
- D. Ant Migration Tool
- E. Salesforce Pull Requests

**Answer: A,B,D**

### NEW QUESTION # 58

An administrator has created a screen flow for users to create accounts. Some users have complained that they do not always have all the required data to create the account and lost progress when they leave the flow. What two steps should the administrator take to prevent lost progress? Choose 2

- A. Add the paused flows component to the home page
- B. Ask a developer to create a lightning component to pause the flow
- C. Enable paused flows in process automation settings in setup
- D. Add a pause button to the footer of the screen flow

**Answer: A,C**

### NEW QUESTION # 59

For what use case would an administrator enable Person Accounts during Order Management setup?

- A. Person Accounts are always enabled for Order Management
- B. Connecting Order Management to B2C Commerce
- C. Connecting Order Management to B2B Commerce
- D. Connecting to an external ERP system

**Answer: B**

Explanation:

An administrator would enable Person Accounts during Order Management setup for the use case of connecting Order Management to B2C Commerce. B2C Commerce is a cloud-based platform that enables businesses to create and manage online storefronts for consumers. B2C Commerce uses Person Accounts to represent individual shoppers who place orders on the storefronts. Person Accounts are a type of account that combines account and contact information into a single record. To connect Order Management to B2C Commerce, an administrator needs to enable Person Accounts in Order Management and install the B2C Commerce Integration package from AppExchange. ### NEW QUESTION # 60

An admin is analyzing project requirements and notes that there are requirements to support both high volume and multiple locations. What is the recommended approach for this scenario?

- A. Download the Single Location High Volume sample flow from the Partner Community and modify all the flows to loop through locations
- B. Download the Multiple Locations sample flow from the Partner Community and have developers add Apex code to enhance performance
- C. Download the Single Location High Volume sample flow from the Partner Community and have the developers add Apex code to enhance performance
- **D. Download the Single Location High Volume sample flow and the Multiple Locations sample flow from the Partner Community and make a blend between the two considering trade-offs**

**Answer: D**

Explanation:

The Single Location High Volume sample flow and the Multiple Locations sample flow are two examples of how to implement order fulfillment with Order Management. The Single Location High Volume sample flow is optimized for performance and scalability, but it only supports one fulfillment location per order. The Multiple Locations sample flow supports multiple fulfillment locations per order, but it has lower performance and scalability. To support both high volume and multiple locations, an admin can download both sample flows from the Partner Community and make a blend between them, considering trade-offs such as complexity, maintainability, and customizability.
