### **SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q53-Q58):**

#### **NEW QUESTION # 53**

Which layer of SAP S/4HANA provides a universal language to read and process data across different applications?

- A. Core Data Services
- B. SAP Fiori
- C. SAP Business Suite
- D. SAP HANA

#### **Answer: A**

Explanation:

Core Data Services (CDS) in SAP S/4HANA provides a universal language to read and process data consistently across different applications. Below is an explanation of the correct answer:

\* Core Data Services (B):CDS enables the creation of semantically rich data models that can be consumed by various applications, regardless of their underlying technologies. It provides a unified way to define and access data, ensuring consistency and reusability.

\* SAP Business Suite (A):SAP Business Suite refers to a suite of enterprise applications and is not a layer for universal data access.

\* SAP HANA (C):SAP HANA is the underlying database platform that powers SAP S/4HANA. While it supports advanced data processing, it does not provide the abstraction layer offered by CDS.

\* SAP Fiori (D):SAP Fiori is a user interface technology for building intuitive apps. It relies on CDS views for data access but does not serve as a universal data language itself.

#### **NEW QUESTION # 54**

Which of the following is a business partner category for Business Partner master data in SAP S/4HANA Cloud Public Edition?

Note: There are 2 correct answers to this question.

- A. Supplier
- B. Customer
- C. Organization
- D. Person

#### **Answer: C,D**

#### Explanation:

In SAP S/4HANA Cloud Public Edition, the Business Partner (BP) master data is used to manage relationships with entities such as customers, suppliers, and other stakeholders. The business partner category defines the type of business partner being created.

\* Organization (Option C): The "Organization" category is used for legal entities such as companies, vendors, or customers. It represents a group or entity that can engage in business transactions. The SAP Business Partner Master Data Guide confirms that "Organization" is a valid business partner category.

\* Person (Option D): The "Person" category is used for individuals, such as employees, contacts, or representatives of an organization. This category is essential for managing personal details and relationships. The same SAP Business Partner Master Data Guide lists "Person" as a valid business partner category.

\* A. Supplier: While suppliers are managed as business partners, "Supplier" is not a business partner category. Instead, it is a role assigned to a business partner within the system.

\* B. Customer: Similarly, "Customer" is a role assigned to a business partner, not a business partner category.

\* SAP Business Partner Master Data Guide: Explains the structure of business partner categories and roles in SAP S/4HANA Cloud Public Edition. <https://help.sap.com>

\* SAP S/4HANA Cloud Master Data Management Guide: Provides details on configuring and managing business partner master data.

Why Options C and D Are Correct: Why the Other Options Are Incorrect: Key References:

#### NEW QUESTION # 55

When you create a purchasing organization in your organizational structure, which of the following assignments is a must?

- A. Purchase organization to plant
- B. Purchase organization to distribution channel
- C. Purchase organization to storage location
- D. Purchase organization to company code

#### Answer: D

#### Explanation:

In SAP S/4HANA Cloud Public Edition, when creating a purchasing organization in the organizational structure, it must be assigned to a company code. This assignment ensures that the purchasing organization is linked to the financial and legal entity for which procurement activities are performed.

\* Purchase organization to company code (Option D): The purchasing organization is responsible for procurement activities, and its assignment to a company code ensures proper financial integration. For example, invoices generated by the purchasing organization are posted to the corresponding company code. The SAP Organizational Structure Guide confirms this requirement.

\* A. Purchase organization to storage location: Storage locations are part of the plant structure and are not directly linked to purchasing organizations.

\* B. Purchase organization to distribution channel: Distribution channels are used in sales and distribution processes, not in procurement.

\* C. Purchase organization to plant: While purchasing organizations can interact with plants during procurement, they are not directly assigned to plants. Instead, plants are assigned to company codes.

\* SAP Organizational Structure Guide: Explains the relationship between purchasing organizations and company codes in SAP S/4HANA Cloud Public Edition. <https://help.sap.com>

\* SAP S/4HANA Cloud Procurement Guide: Provides details on configuring purchasing organizations and their assignments.

Why Option D is Correct: Why the Other Options Are Incorrect: Key References:

#### NEW QUESTION # 56

What is the correct SAP Fiori app to create purchase contracts with reference to purchase requisitions?

- A. Manage Purchase Requisitions Professional
- B. Manage Purchase Contracts
- C. Process Purchase Requisitions
- D. Assign and Process Purchase Requisitions

#### Answer: B

#### Explanation:

The correct SAP Fiori app to create purchase contracts with reference to purchase requisitions is Manage Purchase Contracts. This app allows users to create and manage purchase contracts, including referencing existing purchase requisitions.

- \* Manage Purchase Contracts (Option D): The "Manage Purchase Contracts" app is specifically designed for creating and managing purchase contracts. It supports referencing purchase requisitions to streamline the procurement process. The SAP Fiori Apps Reference Library confirms this functionality.
- \* A. Manage Purchase Requisitions Professional: This app is used for managing purchase requisitions but does not support creating purchase contracts.
- \* B. Process Purchase Requisitions: This app focuses on processing purchase requisitions, not creating purchase contracts.
- \* C. Assign and Process Purchase Requisitions: This app is used for assigning and processing purchase requisitions, not for creating purchase contracts.
- \* SAP Fiori Apps Reference Library: Provides detailed descriptions of the "Manage Purchase Contracts" app and its functionalities. <https://fioriappslibrary.hana.ondemand.com>
- \* SAP S/4HANA Cloud Procurement Guide: Explains the use of purchase contracts and their relationship with purchase requisitions.

Why Option D is Correct: Why the Other Options Are Incorrect: Key References:

### NEW QUESTION # 57

Which of the following systems are used to implement SAP S/4HANA Cloud Public Edition for a customer? Note: There are 3 correct answers to this question.

- A. Sandbox system
- B. Development system
- C. Starter system
- D. Trial system
- E. Test system

**Answer: A,B,D**
