NEW QUESTION # 279
The Lambda function below is being called through an API using Amazon API Gateway. The average execution time for the Lambda function is about 1 second. The pseudocode for the Lambda function is as shown in the exhibit.

What two actions can be taken to improve the performance of this Lambda function without increasing the cost of the solution? (Select two.)

- A. Use Amazon DynamoDB instead of Amazon RDS
- B. Package only the modules the Lambda function requires
- C. Move the initialization of the variable Amazon RDS connection outside of the handler function
- D. Implement custom database connection pooling with the Lambda function
- E. Implement local caching of Amazon RDS data so Lambda can re-use the cache

Answer: B,C

NEW QUESTION # 280
A Developer is building a mobile application and needs any update to user profile data to be pushed to all devices accessing the specific identity. The Developer does not want to manage a back end to maintain the user profile data.
What is the MOST efficient way for the Developer to achieve these requirements using Amazon Cognito?

- A. Use a Cognito user pool.
- B. Use Cognito Sync.
- C. Use Cognito events.
- D. Use Cognito federated identities.

Answer: B

Explanation:
Amazon Cognito Sync is an AWS service and client library that enables cross-device syncing of application-related user data. You can use it to synchronize user profile data across mobile devices and the web without requiring your own backend.

NEW QUESTION # 281
When using a large Scan operation in DynamoDB, what technique can be used to minimize the impact of
a scan on a table's provisioned throughput?

- A. Define a range index on the table
- B. Set a smaller page size for the scan
- C. Prewarm the table by updating all items
- D. Use parallel scans

Answer: A

NEW QUESTION # 282
A Developer is creating a mobile application with a limited budget. The solution requires a scalable service that will enable customers to sign up and authenticate into the mobile application while using the organization's current SAML 2.0 identity provider.
Which AWS service should be used to meet these requirements?

- A. Amazon Cognito
- B. AWS IAM
- C. Amazon EC2
- D. AWS Lambda

Answer: A

NEW QUESTION # 283
......

Our experts have been dedicated in this area for more than ten years.
