The best way for you is choosing a training tool to practice Mule-Arch-202 Study Materials. If you have no idea about the training tools, PassLeaderVCE will be your best partner in the way of passing the IT certification.

Salesforce Certified MuleSoft Platform Integration Architect Sample Questions (Q54-Q59):

NEW QUESTION # 54

A large enterprise customer operating in a high regulated industry is planning to implement Salesforce for customer facing associates in both Sales and Service, and back-office staff. The business processes that Salesforce supports are critical to the business. Salesforce will be integrated to multiple back-office systems to provide a single interface for associates. Reliability and monitoring of these integrations are required as associates support customers.

Which integration solution should the architect consider when planning the implementation?

- A. Decouple back-office system callouts into separate distinct services that have inbuilt error logging and monitoring frameworks.
- B. Build a custom integration gateway to support back-office system integrations and ensure reliability and monitoring capabilities.
- C. Leverage Middleware for all back-office system integrations ensuring real time alerting, monitoring and reporting capabilities.
- D. Architect Services in back-office systems to support callouts from Salesforce and build reliability, monitoring and reporting capabilities.

Answer: C

NEW QUESTION # 55

A Mule application is deployed to a cluster of two customer-hosted Mule runtimes. Currently, the node named Alex is the primary node and the node named Lee is the secondary node. The Mule application has a flow that polls a directory on a file system for new files. The primary node Alex fails for an hour and then is restarted.

After the Alex node completely restarts, from which node are the files polled, and which node is now the primary node for the cluster?

- A. Files are polled from the Alex node
- B. Files are polled from the Alex node
- C. Files are polled from the Lee node
- D. Files are polled from the Lee node

Answer: C

NEW QUESTION # 56

Which methods are effective for validating data in Mule applications? (Choose Two)

- A. Applying custom validation logic in DataWeave.
- B. Depending solely on external systems for validation.
- C. Using regex in Transform Message components.
- D. Ignoring data type mismatches during integration.

Answer: A,C

NEW QUESTION # 57

How does Catalyst Knowledge Hub primarily support MuleSoft users?

- A. By offering detailed technical support for hardware issues.
- B. By selling additional software components.
- C. By offering a platform for user forums and discussions.
- D. By providing guidelines and best practices for effective API management.

Answer: D

NEW QUESTION # 58

A company uses CloudHub for API application deployment so that experience APIs and/or API proxies are publicly exposed using custom mTLS. The company's InfoSec team requires isolated, restricted access that is limited internally to system APIs deployed to CloudHub and the company's data center.

What are the minimum infrastructure, component, connection, and software requirements to meet the company's goal and the InfoSec team's requirements?

- A. Virtual Private Cloud
- B. Virtual Private Cloud
- **C. Virtual Private Cloud**
- D. Virtual Private Cloud

Answer: C

NEW QUESTION # 59

.....
