Itcertkr에서 판매하고 있는 SAP C-S4EWM-2023인증시험자료는 시중에서 가장 최신버전으로서 시험적중율이 100%에 가깝습니다. SAP C-S4EWM-2023덤프자료를 항상 최신버전으로 보장해드리기 위해SAP C-S4EWM-2023 시험문제가 변경되면 덤프자료를 업데이트하도록 최선을 다하고 있습니다. Itcertkr는 여러분이 자격증을 취득하는 길에서 없어서는 안되는 동반자로 되어드릴것을 약속해드립니다.

SAP C-S4EWM-2023 시험요강:

주제	소개
주제 1	Warehouse Structure, Resource Management and SAP EWM Master Data: This topic encompasses defining the warehouse structure and setting up resource management, along with creating SAP EWM master data like storage bins and products, packaging specifications, supply chain units, and business partners.

주제 2	Inbound Processes (Value Added Services, Cross-docking, Quality Management): This topic includes executing inbound processes with value added services (VAS) or deconsolidation, and setting up deliveries for cross-docking (CD) or quality inspection (QIE).
주제 3	Cross Topics (Labor Management, Exception Handling, Batches, Serial Numbers): This topic includes setting up labor management and exception handling, and working with additional product information.
주제 4	Outbound Processes (Wave Management, Cross-docking, Production Integration): This topic covers combining outbound deliveries using wave management, packing and kitting in outbound processes, and staging products for production.
주제 5	Process and Layout Oriented Storage Control: It covers creating customizing settings and using Process and Layout-Oriented Storage Control.
주제 6	Shipping and Receiving: It focuses on configuring Yard Management, SAP Dock Appointment Scheduling, and using the Shipping Cockpit.

C-S4EWM-2023덤프문제 시험대비 공부자료

Itcertkr의 인지도는 고객님의게서 상상하는것보다 훨씬 높습니다.많은 분들이Itcertkr의 덤프공부가이드로 IT자격증 취득의 꿈을 이루었습니다. Itcertkr에서 출시한 SAP인증 C-S4EWM-2023덤프는 IT인사들이 자격증 취득의 험난한 길에서 없어서는 안될중요한 존재입니다. Itcertkr의 SAP인증 C-S4EWM-2023덤프를 한번 믿고 가보세요.시험불합격시 덤프비용은 환불해드리니 믿저봐야 본전 아니겠습니까?

최신 SAP Certified Associate C-S4EWM-2023 무료샘플문제 (Q32-Q37):

질문 # 32

Which of the following are product warehouse tasks during putaway with process-oriented storage control?

- A. The first and final process steps
- B. All process steps
- C. The final process step
- D. The first process step

정답: A

설명:

Comprehensive and Detailed In-Depth Explanation:

In process-oriented storage control (POSC) for putaway, warehouse tasks are created for specific steps. Option D ("The first and final process steps") is correct because tasks are generated for the initial step (e.g., unloading) and the final step (e.g., putaway to bin), as defined in the storage process configuration in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Process-Oriented Storage Control. Option A (all steps) includes intermediate steps not always task-based, while B and C are too restrictive.

질문 # 33

When using batches with de-centralized EWM, where does the batch master data exist.

- A. Only in SAP ERP
- B. Only in SAP EWM
- C. In SAP ERP and in SAP EWM
- D. It depends on customizing

정답: C

질문 # 34

Which scenario uses layout-oriented storage control?

- A. Dimension check before moving to high-rack storage area
- **B. Value-added service before putaway**
- C. Staging before loading
- D. Unloading before counting

정답: B

설명:

Layout-oriented storage control is used to manage intermediate steps based on the warehouse layout. The scenario "Value-added service before putaway" involves layout-oriented storage control because:

- * The value-added service (e.g., kitting, labeling) occurs at a specific location before final putaway.
- * The system routes goods through an intermediate work center for the value-added service activity.

Incorrect Options:

* B, C, D: These scenarios are better managed with process-oriented storage control, as they are more process-specific than layout-driven.

References:

- * SAP EWM Documentation: Layout-Oriented vs. Process-Oriented Storage Control
- * SAP Help Portal: Storage Control Configuration

질문 # 35

What is the purpose of the custodian in the warehouse setup?

- A. The custodian has the legal possession of the stock
- B. The custodian replaces the previously used Supply Chain Unit
- C. The custodian is used for the determination of the putaway strategy
- **D. The custodian processes stock without transfer of title**

정답: D

설명:

Comprehensive and Detailed In-Depth Explanation:

The custodian in SAP EWM manages stock ownership without title transfer, often in consignment scenarios. Option C ("The custodian processes stock without transfer of title") is correct, as defined in the stock attributes and configured in SPRO: SCM Extended Warehouse Management > Master Data > Define Custodian. Options A (putaway strategy), B (Supply Chain Unit), and D (legal possession) are incorrect as they misalign with the custodian's role, which is operational rather than strategic or legal.

질문 # 36

An exception code can be triggered by the system or entered by a user. What must you assign to an external exception code? Note: There are 2 correct answers to this question.

- A. A workflow as a follow-on action
- B. An execution step
- **C. A business context**
- **D. An internal exception code**

정답: C,D

설명:

Comprehensive and Detailed In-Depth Explanation:

External exception codes in SAP EWM handle deviations. Option B ("A business context") is correct as it defines where the code applies (e.g., picking), and option C ("An internal exception code") is correct because it maps the external code to an internal action, both configured in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Exception Handling > Define Exception Codes. Option A (workflow) is optional, and option D (execution step) is not a standard assignment.
