It is quite clear that many people would like to fall back on the most authoritative company no matter when they have any question about preparing for 400-007 exam or met with any problem. I am proud to tell you that our company is definitely one of the most authoritative companies in the international market for 400-007 exam. What's more, we will provide the most considerate after sale service for our customers in twenty four hours a day seven days a week, therefore, our company is really the best choice for you to buy the 400-007 Training Materials. You can just feel rest assured that our after sale service staffs are always here waiting for offering you our services. Please feel free to contact us. We stand ready to serve you!

Earning a Cisco Certified Design Expert certification is a significant achievement for any network engineer, architect, or designer. It demonstrates that the candidate possesses the skills and knowledge required to design and implement complex network solutions, as well as a comprehensive understanding of network design principles and best practices. The Cisco 400-007 exam is a critical step in achieving this certification and is an excellent opportunity for professionals to validate their skills and knowledge in network design.

To be eligible to take the Cisco 400-007 Exam, candidates must have a valid CCNA or CCNP certification. They must also have at least five years of experience in network design, implementation, and troubleshooting. Candidates who meet these requirements can register for the exam through the Cisco website and schedule their exam at a testing center near them.

## 400-007 Review Guide | 400-007 Vce Format

Having a Cisco Certification 400-007 Exam certificate can help people who are looking for a job get better employment opportunities in the IT field and will also pave the way for a successful IT career for them.

Cisco 400-007 exam is a four-hour exam that consists of multiple-choice questions and simulation-based questions. 400-007 exam is designed to test the candidate's ability to design network infrastructures that meet the business requirements of an organization. 400-007 Exam is conducted in English and is available globally at Pearson VUE testing centers.

### Cisco Certified Design Expert (CCDE) Written Exam Sample Questions (Q203-Q208):

#### NEW QUESTION # 203

A healthcare provider discovers that protected health information of patients was altered without patient consent. The healthcare provider is subject to HIPAA compliance and is required to protect PHI data.

a. Which type of security safeguard should be implemented to resolve this issue?

- A. technical integrity and transmission security
- B. technical and physical access control
- C. physical device and media control
- D. administrative security management processes

**Answer: A**

Explanation:

#### NEW QUESTION # 204

Refer to the exhibit.

The enterprise customer wants to stream one-way video from their head office to eight branch offices using multicast. Their current service provider provides a Layer3 VPN solution and manages the CE routers, but they do not currently support multicast. Which solution quickly allows this multicast traffic to go through while allowing for future scalability?

- A. The service provider must provide a Draft Rosen solution to enable a GRE tunnel between nodes PE1 and PE2
- B. Enable a GRE tunnel between nodes C1 and C4
- C. Enable a GRE tunnel between nodes C2 and C4
- D. Enable a GRE tunnel between nodes CE1 and CE2
- E. Implement hub and spoke MPLS VPN over DMVPN (also known as 2547o DMVPN) between CE1 and CE2

**Answer: C**

#### NEW QUESTION # 205

Which two advantages of using DWDM over traditional optical networks are true? (Choose two.)

- A. inherent topology flexibility with intelligent chromatic dispersion
- B. inherent topology flexibility with built-in service protection
- C. inherent topology flexibility with a service protection provided through a direct integration with an upper layer protocol
- D. ability to expand bandwidth over existing optical infrastructure
- E. inherent topology flexibility and service protection provided without penalty through intelligent oversubscription of bandwidth reservation

**Answer: D,E**

#### NEW QUESTION # 206

Which project management methodology is characterized by having a low client involvement?

- A. Kanban project management

- **B. Traditional project management**
- C. LEAN project management
- D. Agile project management

**Answer: B**

Explanation:

# Explanation:

\* A: Traditional project management (often referred to as the Waterfall model) involves a fixed sequence of phases—planning, design, execution, and delivery. Client involvement is typically high at the beginning (requirements gathering) and low during implementation.

Other options:

\* B, C, and D (LEAN, Kanban, Agile): These emphasize continuous feedback, flexibility, and frequent customer interaction throughout the project lifecycle. Agile in particular encourages constant client collaboration via sprints and reviews.

### NEW QUESTION # 207

The Agile Manifesto is a document that defines the key values and principles behind the Agile philosophy and helps development teams work more efficiently and sustainably. Each of the four key values is split into two sections—a left-hand side and a right-hand side. In other words, though there is value in the items on the right, we value the items on the left more. What is one of the key values of the Agile Manifesto?

- A. Contract negotiation over customer collaboration
- **B. Individuals and interactions over processes and tools**
- C. Comprehensive documentation over working software
- D. Following a plan over responding to change

**Answer: B**

Explanation:

While the Agile Manifesto itself is not a network-specific construct, its values are relevant to business-driven network design approaches outlined in CCDE v3.1—especially when designing flexible and adaptive systems.

One of the core values of Agile is:

# "Individuals and interactions over processes and tools"

This emphasizes that communication and collaboration among people are more crucial than relying solely on formal tools or rigid processes. For network architects and designers, this translates into focusing on team collaboration and business alignment during iterative design cycles.

Incorrect Options:

\* A, B, and D are all reversed versions of Agile's actual values; they incorrectly prioritize the right-hand side.

### NEW QUESTION # 208
