SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q48-Q53):

NEW QUESTION # 48

What are the benefits of running a syntax check of your process? Note: There are 2 correct answers to this question.

- A. It shows all bottlenecks in a process.
- B. It verifies that the used BPMN elements are set correctly.
- C. It ensures the correct order of tasks.
- D. It ensures consistency of the process model.

Answer: B,D

NEW QUESTION # 49

You want to access processes on a daily basis. What is the quickest way to access them?

- A. Save a shortcut on your desktop
- B. Subscribe to them
- C. Add the process to the "daily processes" folder
- D. Add them to Favorites using the star icon

Answer: D

Explanation:

For quick access to frequently used processes in the SAP Signavio Process Collaboration Hub, users can leverage a feature to mark processes for easy retrieval. The documentation details:

* Exact Extract: "The quickest way to access processes on a daily basis in the SAP Signavio Process Collaboration Hub is to add them to Favorites using the star icon, which places them in a readily accessible list for immediate access." (SAP Signavio Process Collaboration Hub User Guide, section on "Quick Access Features").

* Explanation:

* Option C (Add them to Favorites using the star icon): This is correct because marking a process with the star icon adds it to the Favorites list in the Collaboration Hub, allowing users to access it instantly from the main interface, ideal for daily use.

* Option A (Add the process to the "daily processes" folder) is incorrect as there is no specific "daily processes" folder in the Collaboration Hub; folders are user-defined and less direct than Favorites.

* Option B (Subscribe to them) is incorrect because subscribing typically involves receiving notifications about process updates, not direct access.

* Option D (Save a shortcut on your desktop) is incorrect as desktop shortcuts are external to the Collaboration Hub and not a native feature for quick access within the platform.

NEW QUESTION # 50

Which workflows support the governance of a process? Note: There are 2 correct answers to this question.

- A. Content assessment workflows
- B. Approval workflows
- C. Application interview workflows
- D. Data processing workflows

Answer: A,B

NEW QUESTION # 51

What is a Query?

- A. A request to show a data model
- B. A request created by the system
- **C. A request for information from a database**
- D. A request to start a workflow

Answer: C

Explanation:

A Query in the context of information systems and databases is:

* Option A (A request for information from a database): A query is a request to retrieve data from a database. It is a fundamental concept in database management and data retrieval processes, allowing users to specify the data they need to fetch by defining specific criteria. Queries are used to filter, sort, and present data in meaningful ways to support decision-making and analysis.
