The SAFe 5 Scrum Master (SSM) Certification Exam is a professional certification that is dedicated to assessing the knowledge and skills of individuals who aim to become SAFe 5 Scrum Masters. SAFe stands for Scaled Agile Framework, which is a set of organizational practices that enable companies of all sizes in various industries to employ Lean-Agile principles effectively. Scrum, on the other hand, is a commonly-used framework for Agile software development. By applying Scrum principles, teams can create high-quality products that meet customers' needs and produce tremendous outcomes.

## Scrum SSM (6.0) - SAFe® Scrum Master Sample Questions (Q30-Q35):

### NEW QUESTION # 30

During which of the following events can Scrum Masters/Team Coaches escalate ART-level impediments?

- A. Product Sync
- B. PO Sync
- C. Coach Sync
- D. System Sync

**Answer: C**

Explanation:

The Coach Sync (sometimes referred to as the Scrum of Scrums or SM/TC Sync) is a coordination event within SAFe where Scrum Masters and Team Coaches from the Agile Release Train (ART) meet to discuss progress, dependencies, and impediments that affect multiple teams.

This event provides a forum for escalating and addressing ART-level impediments that cannot be resolved within a single team. The RTE (Release Train Engineer) typically facilitates this meeting to ensure transparency and problem-solving across teams.

From SAFe guidance:

"The Coach Sync allows Scrum Masters and Team Coaches to discuss cross-team progress and impediments, escalating those that require ART-level visibility or resolution." Therefore, the correct answer is C. Coach Sync. This event enables effective synchronization among teams and promotes continuous improvement across the ART.

### NEW QUESTION # 31

When might Feature size not be a good substitute for the duration of WSJF? (Select 2)

- A. The Feature involves a remote third-party vendor that has a formal scope-approval process.
- B. The Feature did not originate from a Program Epic.
- C. The Feature involves a team or team members who represent a bottleneck.
- D. The Feature did not originate from a Value Stream Capability.
- E. The Feature has not yet been broken down into user stories by the Product Owner.

**Answer: A,C**

### NEW QUESTION # 32

What is one way a Scrum Master/Team Coach can support productive team Backlog Refinement sessions?

- A. Assure teammates that they will be heard
- B. Create a reusable agenda for the team ahead of time
- C. Ensure subject matter experts are invited
- D. Generate ideas for Stories with the team before refinement

**Answer: C**

Explanation:

One way a Scrum Master/Team Coach can support productive team Backlog Refinement sessions is to ensure subject matter experts are invited. Subject matter experts (SMEs) are people who have specialized knowledge or skills related to the domain or technical aspects of the product or solution. They can provide valuable input and feedback to the team during Backlog Refinement, such as clarifying requirements, validating assumptions, identifying dependencies, and suggesting solutions. SMEs can also help the team to split, estimate, and prioritize the backlog items more effectively and accurately. By inviting SMEs to the Backlog Refinement sessions, the Scrum Master/Team Coach can facilitate better collaboration, communication, and alignment among the team and the stakeholders. (Must be taken from SAFe 6 Scrum Master resources) Reference:

### NEW QUESTION # 33

According to SAFe, what is one output of a successful Iteration Retrospective?

- **A. Improvement Stories**
- B. Updated ART metrics
- C. Iteration Goals
- D. Updated dependencies between Stories

**Answer: A**

Explanation:

According to SAFe, one output of a successful Iteration Retrospective is the creation of a few improvement Stories that enter the Team Backlog for the next iteration. These stories reflect the team's agreement on what they can do better in terms of their process, practices, and performance. The improvement stories are visible and prioritized along with the other stories in the backlog. They help the team implement the concept of relentless improvement, which is one of the core values of SAFe.

Iteration Retrospective - Scaled Agile Framework, Exam Study Guide: SSM (6.0) - SAFe Scrum Master

### NEW QUESTION # 34

What is the intended value of the Backlog Refinement event?

- A. The team is able to commit to a set of goals to be delivered in the Iteration
- B. The team reviews and improves processes before the next Iteration
- C. The team aligns on the progress of Iteration Goals
- **D. The team is able to prepare requirements for Iteration Planning**

**Answer: D**

Explanation:

The intended value of the Backlog Refinement event is that the team is able to prepare requirements for Iteration Planning. Backlog Refinement is an ongoing process where the team collaborates with the Product Owner and other stakeholders to review, split, prioritize, and estimate the stories in the Team Backlog. One of the main objectives of Backlog Refinement is to ensure that the stories are ready for Iteration Planning, which means they are clear, feasible, testable, and small enough to be completed in a single iteration. By doing so, the team can improve the quality, efficiency, and effectiveness of their work, as well as deliver value to the customers and the organization.
