

# CCAAK Training Materials: Confluent Certified Administrator for Apache Kafka & CCAAK Exam Preparatory

P.S. Free 2026 Confluent CCAAK dumps are available on Google Drive shared by UpdateDumps: <https://drive.google.com/open?id=1pi8zjAcW7TN62qCJ7NTg2lyC4x-GLiAo>

Confluent certification can be used in different IT Company and it will be your access to the IT elites. But you may find that the CCAAK study materials are difficult for you. You need much time to prepare and the cost of the CCAAK Practice Exam is high, you wonder it will be a great loss for you when fail the exam. It will be bad thing. UpdateDumps will help you to reduce the loss and save the money and time for you.

## Confluent CCAAK Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Apache Kafka® Cluster Configuration: This section of the exam measures skills of a Kafka Administrator and includes configuring broker properties, tuning for performance, managing topic-level settings, and applying best practices for production-grade environments.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Apache Kafka® Fundamentals: This section of the exam measures skills of a Kafka Administrator and covers core concepts such as Kafka architecture, components, and data flow. It assesses the candidate's understanding of topics like topics and partitions, brokers, producers, consumers, and message retention.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Troubleshooting: This section of the exam measures skills of a Kafka Administrator and includes diagnosing common issues in Kafka clusters. It covers problem areas such as performance bottlenecks, message delivery failures, replication issues, and consumer lag, along with techniques to resolve them effectively.</li></ul>

## CCAAK Reliable Study Notes & CCAAK Exam Assessment

I believe that a lot of people working in the IT industry hope to pass some IT certification exams to obtain the corresponding certifications. Some IT authentication certificates can help you promote to a higher job position in this fiercely competitive IT industry. Now the very popular Confluent CCAAK authentication certificate is one of them. Although passing the Confluent certification CCAAK exam is not so easy, there are still many ways to help you successfully pass the exam. While you can choose to spend a lot of time and energy to review the related IT knowledge, and also you can choose a effective training course. UpdateDumps can provide the pertinent simulation test, which is very effective to help you pass the exam and can save your precious time and energy to achieve your dream. UpdateDumps will be your best choice.

## Confluent Certified Administrator for Apache Kafka Sample Questions (Q55-Q60):

### NEW QUESTION # 55

A customer has a use case for a ksqlDB persistent query. You need to make sure that duplicate messages are not processed and messages are not skipped.

Which property should you use?

- A. `ksql.streams auto.offset.reset=latest`
- **B. `processing.guarantee=exactly_once`**
- C. `ksql.fail.on.production.error=false`
- D. `ksql.streams auto.offset.reset=earliest`

**Answer: B**

Explanation:

`processing.guarantee=exactly_once` ensures that messages are processed exactly once by ksqlDB, preventing both duplicates and message loss.

### NEW QUESTION # 56

You want to increase Producer throughput for the messages it sends to your Kafka cluster by tuning the batch size ('batch.size') and the time the Producer waits before sending a batch ('linger.ms').

According to best practices, what should you do?

- **A. Increase 'batch.size' and increase 'linger.ms'**
- B. Decrease 'batch.size' and increase 'linger.ms'
- C. Decrease 'batch.size' and decrease 'linger.ms'
- D. Increase 'batch.size' and decrease 'linger.ms'

**Answer: A**

Explanation:

Increasing `batch.size` allows the producer to accumulate more messages into a single batch, improving compression and reducing the number of requests sent to the broker.

Increasing `linger.ms` gives the producer more time to fill up batches before sending them, which improves batching efficiency and throughput.

This combination is a best practice for maximizing throughput, especially when message volume is high or consistent latency is not a strict requirement.

### NEW QUESTION # 57

In certain scenarios, it is necessary to weigh the trade-off between latency and throughput. One method to increase throughput is to configure batching of messages.

In addition to `batch.size`, what other producer property can be used to accomplish this?

- A. `sendbufferbytes`
- **B. `linger.ms`**
- C. `compression`
- D. `delivery.timeout.ms`

**Answer: B**

Explanation:

The `linger.ms` property sets the maximum time the producer will wait before sending a batch, even if the batch isn't full. By increasing `linger.ms`, you allow more records to accumulate in the batch.

### NEW QUESTION # 58

You are managing a cluster with a large number of topics, and each topic has a lot of partitions. A team wants to significantly

increase the number of partitions for some topics.  
Which parameters should you check before increasing the partitions?

- A. Check if acks=all is being used.
- B. Check the producer batch size and buffer size.
- C. Check if compression is being used.
- **D. Check the max open file count on brokers.**

**Answer: D**

Explanation:

Each Kafka partition maps to multiple log segment files, and each segment results in open file descriptors on the broker. When the number of partitions increases significantly, it can exceed the OS-level limit for open files per broker process, leading to failures or degraded performance. Therefore, it is essential to check and possibly increase the `ulimit -n` (max open files) setting on the broker machines.

### NEW QUESTION # 59

You are using Confluent Schema Registry to provide a RESTful interface for storing and retrieving schemas.  
Which types of schemas are supported? (Choose three.)

- A. gRPC
- **B. Avro**
- C. Thrift
- **D. JSON**
- **E. Protobuf**

**Answer: B,D,E**

Explanation:

Avro is the original and most commonly used schema format supported by Schema Registry.  
Confluent Schema Registry supports JSON Schema for validation and compatibility checks.  
Protocol Buffers (Protobuf) are supported for schema management in Schema Registry.

### NEW QUESTION # 60

.....

Are you one of them? Are you still worried and confused because of the the various exam materials and fancy training courses exam? UpdateDumps is the right choice for you. Because we can provide you with a comprehensive exam, including questions and answers. All of these will help you to acquire a better knowledge, we are confident that you will through UpdateDumps the Confluent CCAAK Certification Exam. This is our guarantee to all customers.
