

Free PDF 2026 VMware Latest 2V0-16.25 Download Free Dumps

2026 Latest Prep4SureReview 2V0-16.25 PDF Dumps and 2V0-16.25 Exam Engine Free Share: https://drive.google.com/open?id=1nQCvFk7vnjzpxEw6QCIX6XRm_QZDsYsZ

The 2V0-16.25 exam is the right way to learn new in-demand skills and upgrade knowledge. After passing the VMware vSphere Foundation 9.0 Administrator (2V0-16.25) exam the successful candidates can gain multiple personal and professional benefits with the real VMware 2V0-16.25 Exam Questions. Validation of skills, more career opportunities, increases in salary, and increases in the chances of promotion are some prominent benefits of the VMware 2V0-16.25 certification exam.

The service of 2V0-16.25 test guide is very prominent. It always considers the needs of customers in the development process. There are three versions of our 2V0-16.25 learning question, PDF, PC and APP. You can choose according to your needs. Of course, you can use the trial version of 2V0-16.25 exam training in advance. After you use it, you will have a more profound experience. You can choose your favorite our 2V0-16.25 Study Materials version according to your feelings. I believe that you will be more inclined to choose a good service product, such as 2V0-16.25 learning question.

2026 Accurate 2V0-16.25: VMware vSphere Foundation 9.0 Administrator Download Free Dumps

You can get the authoritative 2V0-16.25 certification exam in first try without attending any expensive training institution classes. The main reason that makes you get succeed is the accuracy of our 2V0-16.25 test answers and the current exam pass guide. We provide you the Latest 2V0-16.25 Dumps Pdf for exam preparation and also the valid study guide for the organized review. You can completely trust our learning materials.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q40-Q45):

NEW QUESTION # 40

An organization uses VMware Cloud Foundation (VCF) Operations to monitor and troubleshoot issues within a VMware vSphere Foundation (VVF) environment.

As part of the root cause analysis following a recent critical event, the administrator determined that specific log messages on a host clearly identified the problem.

What should the administrator implement to provide additional data to help troubleshoot in the future?

- **A. VCF Operations for logs**
- B. VCF Operations Diagnostics
- C. VCF Automation
- D. VCF Operations Management Pack for VCF

Answer: A

Explanation:

When troubleshooting critical events in a VMware vSphere Foundation (VVF) environment, logs are essential for root cause analysis.

- * In the given scenario, the administrator identified that specific log messages on a host clearly pinpointed the issue.
- * To enhance future troubleshooting, the best approach is to implement VCF Operations for Logs.
- * This enables centralized log collection, log-based alerts, and advanced queries, making it easier to correlate issues across infrastructure.

Other options like VCF Operations Diagnostics focus on proactive health checks and findings, while Management Pack for VCF extends observability but does not provide raw log insights. VCF Automation is unrelated to troubleshooting logs.

NEW QUESTION # 41

An administrator has successfully deployed the VMware Cloud Foundation (VCF) Installer appliance to begin a new VMware vSphere Foundation (VVF) deployment. The VMware ESX hosts are powered on and meet all hardware and connectivity prerequisites.

What is the next step to begin deploying vSphere Foundation?

- A. Manually deploy the vCenter Server Appliance.
- **B. Launch the VCF Installer deployment wizard.**
- C. Install SDDC Manager using the VCF Installer.
- D. Enable SSH on all ESX hosts.

Answer: B

Explanation:

After successfully deploying the VCF Installer appliance, and ensuring ESXi hosts are powered on and meet prerequisites, the next steps to:

- * Launch the VCF Installer deployment wizard, which guides administrators through host onboarding, vCenter deployment, and cluster setup for vSphere Foundation.

Other options:

- * A. Enable SSH on all ESX hosts# Not required unless troubleshooting.
- * C. Install SDDC Manager using VCF Installer# Only applies to full Cloud Foundation, not vSphere Foundation deployment.
- * D. Manually deploy vCenter Server Appliance# The Installer wizard automates this.

NEW QUESTION # 42

An administrator is following the concept of least privilege and must configure permissions in a vSphere environment granting members of the group corp\VM-Managers the following abilities:

- * Power on/off virtual machines
- * Open consoles
- * Create snapshots

Which out-of-the-box role satisfies these access control requirements?

- A. Virtual Machine Console User

- B. Administrator
- **C. Virtual Machine Power User**
- D. Virtual Machine User

Answer: C

Explanation:

The requirement is to follow least privilege while granting specific VM operations:

- * Power on/off virtual machines
- * Open consoles
- * Create snapshots

The Virtual Machine Power User role is the correct out-of-the-box role, as it includes all these privileges without granting unnecessary administrative access.

Other roles:

- * Administrator (A): Grants full environment control # too broad.
- * Virtual Machine Console User (B): Limited to console access, cannot power on/off or snapshot.
- * Virtual Machine User (C): Can interact with VMs but lacks snapshot privileges.

NEW QUESTION # 43

An administrator is tasked to create a new view in VMware Cloud Foundation (VCF) Operations to monitor CPU demand on ESX hosts, including the historical and forecast data.

Which view type is appropriate to display such information?

- **A. Trend**
- B. Text
- C. Distribution
- D. Table

Answer: A

Explanation:

In VCF Operations, when monitoring metrics like CPU demand across ESX hosts, including historical usage and forecast data, the best visualization is a Trend view.

- * Trend view displays data over time, showing both past and predicted future behavior.
- * This makes them ideal for capacity planning, performance forecasting, and demand analysis.
- * Table (A) # Shows raw values but lacks predictive visualization.
- * Distribution (B) # Useful for comparing values across objects but not for time-based or forecasted trends.
- * Text (C) # Displays static values or metrics, not historical/forecasting data.

NEW QUESTION # 44

What is the primary purpose of using VMware vSphere Foundation (VVF) Lifecycle Manager for ESX hosts?

- A. To configure network settings for ESX hosts
- **B. To update and maintain the ESX host lifecycle**
- C. To monitor the performance of ESX hosts
- D. To create and manage virtual machines

Answer: B

Explanation:

The primary purpose of vSphere Lifecycle Manager (vLCM) is to:

- * Update, patch, and upgrade ESXi hosts, firmware, and drivers.
- * Manage host consistency across clusters with image-based lifecycle management.

Other options are unrelated:

- * A. Configure network settings# Done through vCenter or host client, not vLCM.
- * B. Monitor performance# Done in vCenter/VCF Operations, not vLCM.
- * C. Create/manage VMs# Managed through vCenter, not vLCM.
