Apple Device Support Exam Sample Questions (Q97-Q102):

NEW QUESTION # 97

Guillermo is a designer for ACME, Inc. He uses his 12.9-inch iPad Pro to create marketing materials and do color grading. Which iPadOS feature should Guillermo use to allow his 12.9-inch iPad Pro to accurately display colors for common color standards?

- **A. Reference Mode**
- B. True Tone
- C. ColorSync
- D. Display Zoom

Answer: A

NEW QUESTION # 98

Guillermo is a designer for ACME, Inc. He uses his 12.9-inch iPad Pro to create marketing materials and do color grading. Which iPadOS feature should Guillermo use to allow his 12.9-inch iPad Pro to accurately display colors for common color standards?

- **A. Reference Mode**
- B. True Tone
- C. ColorSync
- D. Display Zoom

Answer: A

Explanation:

Reference Mode is a display mode for professional content creation workflows, like color grading, editing, and content review, where accurate colors and consistent image quality are critical. Reference Mode enables the 12.9-inch iPad Pro with Liquid Retina

XDR display to deliver reference color for popular color standards and video formats, such as BT.709, sRGB, HDR10, Dolby Vision, and more. It also disables all dynamic display adjustments for ambient surround, such as True Tone, Auto-Brightness, and Night Shift. Guillermo can use Reference Mode to match the color requirements of his workflow and ensure that his marketing materials and color grading are accurate and consistent. He can also use Reference Mode with Sidecar to use his iPad Pro as a secondary reference display for his Mac. NEW QUESTION # 99

Which wireless feature allows you to use your iPhone to provide wireless internet access to your Mac without a password?

- A. Preferred Networks
- B. Instant Hotspot
- C. Carrier Services
- D. Auto Locations

Answer: B

NEW QUESTION # 100

Which macOS Recovery feature is available ONLY on Mac computers with Apple silicon from the macOS Recovery Utilities menu in macOS?

- A. Share disk
- B. Recovery diagnostics
- C. Startup Security Utility
- D. Recovery log

Answer: A

Explanation:

Share disk is a macOS Recovery feature that allows you to share the internal storage of your Mac with Apple silicon as an external drive with another Mac. This feature is useful for transferring files between two Macs, or for troubleshooting issues with your Mac with Apple silicon. Share disk is only available on Mac computers with Apple silicon, and it requires a Thunderbolt or USB cable to connect the two Macs. To use Share disk, you need to start up your Mac with Apple silicon in macOS Recovery, then choose Utilities > Share Disk. On the other Mac, you can access the shared disk from the Finder or Disk Utility. NEW QUESTION # 101

How many days do you have to recover deleted files from iCloud Drive?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

You can recover files you deleted from iCloud Drive within the last 30 days, whether you deleted them on iCloud.com or another device that has iCloud Drive turned on. However, you can't recover or restore files you permanently remove. To recover files from iCloud Drive, you can use the Recently Deleted folder in iCloud Drive or the Restore Files option in Account Settings on iCloud.com. For instructions, see the references below.
