After examining the situation, the Pass4Leader has come with the idea to provide you with updated and actual Amazon CLF-C02 Exam Dumps so you can pass AWS Certified Cloud Practitioner (CLF-C02) test on the first attempt. The product of Pass4Leader has many different premium features that help you use this product with

ease. The study material has been made and updated after consulting with a lot of professionals and getting customers' reviews.

Amazon AWS Certified Cloud Practitioner Sample Questions (Q856-Q861):

NEW QUESTION # 856

A company wants to receive alerts to monitor its overall operating costs for its AWS public cloud infrastructure. Which AWS offering will meet these requirements?

- A. AWS Budgets
- B. Amazon EventBridge
- C. Compute Savings Plans
- D. Migration Evaluator

Answer: A

Explanation:

AWS Budgets is a service that enables you to plan your service usage, service costs, and instance reservations. You can use AWS Budgets to create custom budgets that alert you when your costs or usage exceed (or are forecasted to exceed) your budgeted amount. You can also use AWS Budgets to monitor how close your usage and costs are to meeting your reservation purchases.

NEW QUESTION # 857

A company moves its infrastructure from on premises to the AWS Cloud. The company can now provision additional Amazon EC2 instances whenever the instances are required. With this ability, the company can launch new marketing campaigns in 3 days instead of 3 weeks.

Which benefit of the AWS Cloud does this scenario demonstrate?

- A. Improved operational resilience
- B. Cost savings
- C. Increased business agility
- D. Enhanced security

Answer: C

Explanation:

Explanation

Increased business agility is the benefit of the AWS Cloud that this scenario demonstrates. Business agility refers to the ability of a company to adapt to changing customer needs, market conditions, and competitive pressures. Moving to the AWS Cloud enables business agility by providing faster access to resources, lower upfront costs, and greater scalability and flexibility. By using the AWS Cloud, the company can launch new marketing campaigns in 3 days instead of 3 weeks, which shows that it can respond to customer feedback more quickly and efficiently. For more information, see Benefits of Cloud Computing and [Business Agility].

NEW QUESTION # 858

A developer wants to deploy an application quickly on AWS without manually creating the required resources. Which AWS service will meet these requirements?

- A. AWS CodeBuild
- B. AWS Elastic Beanstalk
- C. Amazon Personalize
- D. Amazon EC2

Answer: B

Explanation:

Explanation

AWS Elastic Beanstalk is a service that allows you to deploy and manage applications on AWS without manually creating and configuring the required resources, such as EC2 instances, load balancers, security groups, databases, and more. AWS Elastic Beanstalk automatically handles the provisioning, scaling, load balancing, health monitoring, and updating of your application, while giving you full control over the underlying AWS resources if needed. AWS Elastic Beanstalk supports a variety of platforms and languages, such as Java, .NET, PHP, Node.js, Python, Ruby, Go, and Docker. You can use the AWS Management Console, the

AWS CLI, the AWS SDKs, or the AWS Elastic Beanstalk API to create and manage your applications. You can also use AWS CodeStar, AWS CodeCommit, AWS CodeBuild, AWS CodeDeploy, and AWS CodePipeline to integrate AWS Elastic Beanstalk with your development and deployment workflows¹²

NEW QUESTION # 859

Which task requires the use of AWS account root user credentials?

- A. The creation of an organization in AWS Organizations
- B. The change to a different AWS Support plan
- C. The deletion of Amazon EC2 instances
- D. The deletion of IAM users

Answer: A

Explanation:

The creation of an organization in AWS Organizations requires the use of AWS account root user credentials.

The AWS account root user is the email address that was used to create the AWS account. The root user has complete access to all AWS services and resources in the account, and can perform sensitive tasks such as changing the account settings, closing the account, or creating an organization. The root user credentials should be used sparingly and securely, and only for tasks that cannot be performed by IAM users or roles⁴

NEW QUESTION # 860

Which of the following acts as an instance-level firewall to control inbound and outbound access?

- A. AWS Trusted Advisor
- B. Security groups
- C. Network access control list
- D. Virtual private gateways

Answer: B

Explanation:

Explanation

The correct answer is B because security groups are AWS features that act as instance-level firewalls to control inbound and outbound access. Security groups are virtual firewalls that can be attached to one or more Amazon EC2 instances. Users can configure rules for security groups to allow or deny traffic based on protocols, ports, and source or destination IP addresses. The other options are incorrect because they are not AWS features that act as instance-level firewalls to control inbound and outbound access. Network access control list is an AWS feature that acts as a subnet-level firewall to control inbound and outbound access. AWS Trusted Advisor is an AWS service that provides real-time guidance to help users follow AWS best practices for security, performance, cost optimization, and fault tolerance. Virtual private gateways are AWS features that enable users to create a secure and encrypted connection between their VPC and their on-premises network. Reference: Security Groups for Your VPC

NEW QUESTION # 861

.....

The pass rate is 98.75% for CLF-C02 learning materials, and we will help you pass the exam just one time if you choose us. In order to build up your confidence for CLF-C02 training materials, we are pass guarantee and money back guarantee, if you fail to pass the exam, we will give you full refund. In addition, you can receive the download link and password within ten minutes for CLF-C02 Training Materials, if you don't receive, you can contact with us, and we will solve this problem for you immediately. We offer you free update for 365 days for you, and the update version for CLF-C02 exam materials will be sent to your email automatically.
