NIS-2-Directive-Lead-Implementer Valid Test Forum, NIS-2-Directive-Lead-Implementer Reliable Dumps Questions

As you all know that practicing with the wrong preparation material will waste your valuable money and many precious study hours. So you need to choose the most proper and verified preparation material with caution. Preparation material for the NIS-2-Directive-Lead-Implementer exam questions from Itcertking helps to break down the most difficult concepts into easy-to-understand examples. Also, you will find that all the included questions are based on the last and updated NIS-2-Directive-Lead-Implementer Exam Dumps version. We are sure that using Itcertking's PECB Exam Questions preparation material will support you in passing the NIS-2-Directive-Lead-Implementer exam with confidence.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q30-Q35):

NEW QUESTION # 30
To whom should CSIRTs provide information regarding incidents?

- A. CRE authorities

- B. Cyber crisis management authorities
- C. National competent authorities

Answer: C

NEW QUESTION # 31

Scenario 3: Founded in 2001, SafePost is a prominent postal and courier company headquartered in Brussels, Belguim. Over the years, it has become a key player in the logistics and courier in the region. With more than 500 employees, the company prides itself on its efficient and reliable services, catering to individual and corporate clients. SafePost has recognized the importance of cybersecurity in an increasingly digital world and has taken significant steps to align its operations with regulatory directives, such as the NIS 2 Directive.

SafePost recognized the importance of thoroughly analyzing market forces and opportunities to inform its cybersecurity strategy. Hence, it selected an approach that enabled the analysis of market forces and opportunities in the four following areas: political, economic, social, and technological. The results of the analysis helped SafePost in anticipating emerging threats and aligning its security measures with the evolving landscape of the postal and courier industry.

To comply with the NIS 2 Directive requirements, SafePost has implemented comprehensive cybersecurity measures and procedures, which have been documented and communicated in training sessions. However, these procedures are used only on individual initiatives and have still not been implemented throughout the company. Furthermore, SafePost's risk management team has developed and approved several cybersecurity risk management measures to help the company minimize potential risks, protect customer data, and ensure business continuity.

Additionally, SafePost has developed a cybersecurity policy that contains guidelines and procedures for safeguarding digital assets, protecting sensitive data, and defining the roles and responsibilities of employees in maintaining security. This policy will help the company by providing a structured framework for identifying and mitigating cybersecurity risks, ensuring compliance with regulations, and fostering a culture of security awareness among employees, ultimately enhancing overall cybersecurity posture and reducing the likelihood of cyber incidents.

As SafePost continues to navigate the dynamic market forces and opportunities, it remains committed to upholding the highest standards of cybersecurity to safeguard the interests of its customers and maintain its position as a trusted leader in the postal and courier industry.

Based on the scenario above, answer the following question:

Why does the NIS 2 Directive apply to SafePost?

- A. Because the directive applies to entities that offer trust services as defined by EU regulations within the European Union
- B. Because the directive applies only to companies with more than 500 employees that provide postal services within the European Union
- C. Because the directive applies to companies that provide postal services within the European Union

Answer: C

NEW QUESTION # 32

Scenario 8: FoodSafe Corporation is a well-known food manufacturing company in Vienna, Austria, which specializes in producing diverse products, from savory snacks to artisanal desserts. As the company operates in regulatory environment subject to this NIS 2 Directive, FoodSafe Corporation has employed a variety of techniques for cybersecurity testing to safeguard the integrity and security of its food production processes.

To conduct an effective vulnerability assessment process, FoodSafe Corporation utilizes a vulnerability assessment tool to discover vulnerabilities on network hosts such as servers and workstations. Additionally, FoodSafe Corporation has made a deliberate effort to define clear testing objectives and obtain top management approval during the discovery phase. This structured approach ensures that vulnerability assessments are conducted with clear objectives and that the management team is actively engaged and supports the assessment process, reinforcing the company's commitment to cybersecurity excellence.

In alignment with the NIS 2 Directive, FoodSafe Corporation has incorporated audits into its core activities, starting with an internal assessment followed by an additional audit conducted by its partners. To ensure the effectiveness of these audits, the company meticulously identified operational sectors, procedures, and policies. However, FoodSafe Corporation did not utilize an organized audit timetable as part of its internal compliance audit process. While FoodSafe's Corporation organizational chart does not clearly indicate the audit team's position, the internal audit process is well-structured. Auditors familiarize themselves with established policies and procedures to gain a comprehensive understanding of their workflow. They engage in discussions with employees further to enhance their insights, ensuring no critical details are overlooked.

Subsequently, FoodSafe Corporation's auditors generate a comprehensive report of findings, serving as the foundation for necessary changes and improvements within the company. Auditors also follow up on action plans in response to nonconformities and improvement opportunities.

The company recently expanded its offerings by adding new products and services, which had an impact on its cybersecurity program. This required the cybersecurity team to adapt and ensure that these additions were integrated securely into their existing framework. FoodSafe Corporation commitment to enhancing its monitoring and measurement processes to ensure product quality and operational efficiency. In doing so, the company carefully considers its target audience and selects suitable methods for reporting monitoring and measurement results. This incudes incorporating additional graphical elements and labeling of endpoints in their reports to provide a clearer and more intuitive representation of data, ultimately facilitating better decision-making within the organization.

Based on the scenario above, answer the following questions:

Which vulnerability assessment tool did FoodSafe Corporation use?

- A. Network-based
- B. Database scans
- C. Host-based scans

Answer: C

NEW QUESTION # 33

On which of the following critical areas does an organization focus when it promotes a culture of awareness and conducts comprehensive training sessions?

- A. Cyber strategy and governance
- B. Detection and response
- C. Infrastructure and application security

Answer: A

NEW QUESTION # 34

What is the role of a sponsoring senior executive in the supply chain risk management approach?

- A. To diversify suppliers, securing backup options to ensure a steady supply of essential products or services
- B. To identify vital suppliers by referencing BIA results for insights
- C. To allocate resources and support SCRM initiative's advancement

Answer: C

NEW QUESTION # 35

......
