1Z0-947 Valid Exam Online - 1Z0-947 New Test Camp

In the recent few years, Oracle 1Z0-947 exam certification have caused great impact to many people. But the key question for the future is that how to pass the Oracle 1Z0-947 exam more effectively. The answer of this question is to use DumpsMaterials's Oracle 1Z0-947 Exam Training materials, and with it you can pass your exams. So what are you waiting for? Go to buy DumpsMaterials's Oracle 1Z0-947 exam training materials please, and with it you can get more things what you want.

Oracle GoldenGate 19c Implementation Professional Sample Questions (Q25-Q30):

NEW QUESTION # 25

Table A has (ColA number Primary Key, ColB char(2), ColC varchar(10)) with one record with the following data: (1, 'AB', 'TestData') What will Extract capture by default for an update on ColC?

- A. After Image (1, 'NewValue')
- B. After Image (1, 'AB', 'NewValue')
- C. Before Image (1, 'TestData') + After Image (1, 'NewValue')
- **D. Before Image (1, 'AB', 'TestData') + After Image (1, 'AB', 'NewValue')**

Answer: D

Explanation:

By default, Oracle GoldenGate Extract captures both the before image and the after image of an update, including all key and updated columns, when:

* GETUPDATEBEFORES is enabled (default in many Extract configurations).

* UPDATERECORDFORMAT COMPACT (default) includes both before and after values in a single record.

NEW QUESTION # 26

DDL can be used in conjunction with filter options. What would be the correct DDL parameter if you need DDL for specific objects?

- A. DDL Include All, Exclude ObjName <objectname>
- B. DDL <objectname>
- **C. DDL Exclude All, Include ObjName <objectname>**
- D. DDL Include. <objectname>

Answer: C

Explanation:

This configuration first excludes all DDL operations (EXCLUDE ALL) and then selectively includes DDL for specific objects using INCLUDE OBJNAME. This approach ensures that only the desired DDL operations are replicated, providing precise control over DDL replication.

NEW QUESTION # 27

In Oracle RDBMS sharding architecture, shardgroups checkpoint their data on a shared disk to ensure data integrity.

- **A. FALSE**
- B. TRUE

Answer: A

Explanation:

Shards are independent and don't checkpoint to shared disks.

NEW QUESTION # 28

Using the built-in lightweight filtering facility, the Distribution Server allows you to operate simple transformations while dispatching trail files to the Receiver Server.

- **A. FALSE**
- B. TRUE

Answer: A

Explanation:

Distribution Server only routes data; no transformations.

NEW QUESTION # 29

You can create a macro library that contains one or more macros. By using a macro library, you can define a macro once and use it again and again. What is true about macro libraries?

- A. If a macro is defined in a macro library, you may only call that macro once in a parameter file.
- B. You can invoke the macros in a library only one time in COLMAP in the Replicat parameter file.
- C. You can either have the Extract or the Replicat in the same GoldenGate Home invoke the macros in the library but not from with both Extract and Replicat.
- **D. You can share the macros across parameter files.**

Answer: D

Explanation:

Macro libraries in Oracle GoldenGate allow you to define reusable macros and share them across multiple parameter files, improving consistency and reducing duplication in Extract and Replicat configurations.

NEW QUESTION # 30
