

100% Pass Quiz 2026 ASET-Ethics-Examination: ASET Ethics Examination-ASET Professional Practice Exam (PPE)–High Pass-Rate Answers Free

BTW, DOWNLOAD part of Exam4PDF ASET-Ethics-Examination dumps from Cloud Storage: https://drive.google.com/open?id=1Sp011CBrjFliPstzo_0AIZPGspCSjMI

Our ASET-Ethics-Examination exam torrent is highly regarded in the market of this field and come with high recommendation. Choosing our ASET-Ethics-Examination exam guide will be a very promising start for you to begin your exam preparation because our ASET-Ethics-Examination practice materials with high repute. Our ASET-Ethics-Examination exam torrent is well reviewed in content made by the professional experts. They will instruct you on efficient points of knowledge to get familiar and remember high-effective. Besides, our ASET-Ethics-Examination study tools galvanize exam candidates into taking actions efficiently. We are sure you will be splendid and get your desirable outcomes by our ASET-Ethics-Examination exam guide. If your mind has made up then our ASET-Ethics-Examination study tools will not let you down.

We are committed to using Exam4PDF ASET ASET-Ethics-Examination Exam Training materials, we can ensure that you pass the exam on your first attempt. If you are ready to take the exam, and then use our Exam4PDF ASET ASET-Ethics-Examination exam training materials, we guarantee that you can pass it. If you do not pass the exam, we can give you a refund of the full cost of the materials purchased, or free to send you another product of same value.

Pdf ASET-Ethics-Examination Braindumps - Reliable ASET-Ethics-Examination Test Cram

Since One of the significant factors to judge whether one is competent or not is his or her ASET-Ethics-Examination certificates. So to get ASET-Ethics-Examination real exam and pass the ASET-Ethics-Examination exam is important. Generally speaking, certificates function as the fundamental requirement when a company needs to increase manpower in its start-up stage. In this respect, our ASET-Ethics-Examination practice materials can satisfy your demands if you are now in preparation for a certificate. We will be your best friend to help you achieve success!

ASET Ethics Examination-ASET Professional Practice Exam (PPE) Sample Questions (Q97-Q102):

NEW QUESTION # 97

An accident occurs at a work site supervised by a regulated member of ASET. The accident has not resulted in harm to any individuals, but some equipment has been seriously damaged. Which of the following should be the member's first step to deal with the accident?

- A. Assess the damage and eliminate any hazards.
- B. Report the accident to the appropriate authorities.
- C. Initiate an internal investigation into the accident.
- D. Preserve evidence of the accident, including taking photographs.

Answer: A

Explanation:

When a workplace incident or accident occurs, the paramount duty of any engineering technologist or supervisor is the immediate protection of human life and safety. This principle is deeply embedded in both the ASET Code of Ethics and provincial Occupational Health and Safety (OHS) legislation. Even if the initial accident only resulted in equipment damage and no individuals were immediately harmed, the structural integrity or operational state of the site may be compromised, posing a latent threat to workers or the public. Therefore, the absolute first step must always be to assess the immediate damage and actively eliminate or isolate any continuing hazards (e.g., shutting off power, closing valves, evacuating the immediate area, or erecting barricades). Initiating investigations, preserving evidence for insurance, or reporting to authorities like OHS are critical subsequent steps, but they must never precede or delay the immediate securing of the site. A professional must ensure the environment is physically stabilized and safe before turning their attention to administrative, legal, or investigative duties.

NEW QUESTION # 98

Which of the following statements best describes what access members of the public have to hearings before the ASET Discipline Committee or ASET Appeal Board?

- A. Hearings are open to the public unless the Committee or Board orders otherwise.
- B. Hearings are closed to the public.
- C. Hearings may be open or closed to the public, depending on the nature of the hearing.
- D. Hearings are open to the public.

Answer: A

Explanation:

Self-regulating professions operate under a social contract where the government grants them the privilege to govern themselves in exchange for prioritizing public protection. A key tenet of this system is transparency. Therefore, under the Engineering and Geoscience Professions Act (EGPA), disciplinary hearings conducted by the ASET Discipline Committee or Appeal Board are, by default, open to the public. This ensures that the public can witness that the profession is holding its members accountable and administering justice fairly. However, this is not an absolute rule. The Committee or Board possesses the legal authority to order a hearing (or portions of it) closed to the public if doing so is necessary to protect highly sensitive information. This exception is typically invoked to protect the identity of a victim of harassment, to protect highly confidential medical records, or to prevent the disclosure of proprietary corporate trade secrets that might be discussed as evidence during the hearing.

NEW QUESTION # 99

Which of the following best defines a profession?

- A. A society that offers benefits to its members
- B. An occupation requiring specialized knowledge
- C. A group of individuals with common interests
- D. A team of professionals working towards a common goal

Answer: B

Explanation:

While earlier questions highlighted the "public service" aspect of a profession, at its most fundamental, definitional level, a profession

is distinguished from a general job or trade by its foundation in complex, specialized intellectual knowledge. This knowledge is not easily acquired through casual observation or basic apprenticeship; it requires rigorous, formal post-secondary education (such as an engineering technology diploma or degree) followed by verifiable, progressive field experience. Society relies on professionals precisely because the layperson lacks this specialized knowledge to properly evaluate the safety, efficacy, or quality of the technical work being performed. This is why the government grants professions the right to self-regulate: because only those who possess this advanced, specialized knowledge are fully equipped to assess the competency and ethical practice of their peers. Therefore, while public service is the ethical core, specialized intellectual knowledge is the foundational, defining characteristic of the occupation itself.

NEW QUESTION # 100

A consultant recommends that a client purchase goods from a company from which the consultant is paid a secret commission. This would be considered which of the following?

- A. A conflict of interest
- B. A breach of contract
- C. A breach of trade secrets
- D. A buyer beware situation

Answer: A

Explanation:

The ASET Code of Ethics unequivocally requires members to act with integrity towards clients and employers and to actively avoid conflicts of interest. A conflict of interest exists when a professional has a personal or financial interest that could inappropriately influence their objective professional judgment. Receiving a "secret commission" or "kickback" from a supplier while advising a client to purchase from that supplier is a textbook and severe conflict of interest. The client trusts the engineering technologist to provide unbiased, optimal technical advice based solely on the client's needs and project specifications. By accepting a secret commission, the consultant is financially incentivized to recommend a product that benefits their own wallet, rather than what might be best or most cost-effective for the client. This deeply violates the professional trust placed in the technologist. To resolve such an issue ethically, any existing financial relationships must be fully disclosed to the client upfront, before any recommendations are made.

NEW QUESTION # 101

Which of the following statements describes the role of a professional regulatory organization?

- A. To coordinate licensing policies and procedures between organizations
- B. To seek employment opportunities for members of the profession
- C. To publish relevant information about the profession
- D. To set the qualifications for admission into the profession

Answer: D

Explanation:

The primary role of a Professional Regulatory Organization (PRO) like ASET is established by provincial legislation (the EGPA) to protect the public. To achieve this mandate, the most fundamental function of a PRO is to set, maintain, and enforce the qualifications for admission into the profession.

This involves evaluating academic credentials, assessing practical work experience, administering professional practice examinations, and ensuring applicants have good character. By acting as the gatekeeper, the PRO ensures that only competent, qualified individuals are legally permitted to use protected titles and practice engineering technology independently. While PROs may occasionally publish relevant information or coordinate with other bodies, these are secondary functions. Crucially, a PRO is not a union or an advocacy group; its purpose is not to seek employment opportunities, negotiate wages, or protect the financial interests of its members (Option C). Its overriding duty is regulatory-ensuring the competency of its practitioners to safeguard public welfare.

NEW QUESTION # 102

.....

Our ASET-Ethics-Examination study question contains a lot of useful and helpful knowledge which can help you find a good job and be promoted quickly. Our ASET-Ethics-Examination test pdf is compiled by the senior experts elaborately and we update them frequently to follow the trend of the times. Before you decide to buy our study materials, you can firstly look at the introduction of our ASET-Ethics-Examination Exam Practice materials on our web. Or you can free download the demo of our ASET-Ethics-
