CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q118-Q123):

NEW QUESTION # 118

It is not the employer's responsibility to keep the work environment free from hazards and provide training and personal protective equipment to employees where appropriate.

- A. FALSE
- B. TRUE

Answer: A

Explanation:

It is the employer's legal duty (e.g., under UK HSWA 1974) to ensure a hazard-free workplace, provide training, and supply PPE. The CIPS L3M6 module ties this to LO2-environmental hazards (e.g., noise, vibrations) fall under employer responsibility, making the statement false.

NEW QUESTION # 119

Not-for-profit organizations have well-defined procurement policies that uphold the goals of sustainable procurement. Which of the following organizations fall into the not-for-profit definition?

- A. Oxfam
- B. Apple
- C. The Red Cross
- D. The United Nations
- E. Save the Children
- F. Pepsi

Answer: A,C,D,E

Explanation:

Not-for-profit organizations operate without the primary goal of profit, focusing instead on social or environmental missions. From the list:

* Oxfam, Save the Children, The Red Cross, and The United Nations are not-for-profit entities dedicated to humanitarian, developmental, or peacekeeping goals, often with sustainable procurement policies aligned with CSR.

* Apple and Pepsi are for-profit corporations focused on commercial success.

The CIPS L3M6 module highlights not-for-profits as key players in sustainable procurement due to their mission-driven nature.

NEW QUESTION # 120

Energy efficiency in the construction sector can be achieved with the aid of government regulation. What incentives do they use?

- A. Emission targets
- B. Special funding
- C. None of the above
- D. Tax benefits

Answer: A,B,D

Explanation:

Governments play a pivotal role in promoting energy efficiency in the construction sector through regulatory incentives, which are designed to encourage sustainable practices and reduce environmental impact. These include:

* Emission Targets: Governments set mandatory limits on greenhouse gas emissions (e.g., carbon dioxide) for construction projects, pushing organizations to adopt energy-efficient designs and materials to comply. This aligns with international agreements like the Paris Agreement and national sustainability goals.

* Special Funding: Financial support, such as grants or subsidies, is provided to construction firms adopting energy-efficient technologies (e.g., insulation, renewable energy systems). This reduces the upfront cost barrier, making sustainable options more viable.

* Tax Benefits: Tax credits or reductions are offered to incentivize the use of energy-efficient materials and practices, lowering the overall cost of compliance and encouraging long-term investment in green construction.

These incentives are not mutually exclusive but work together to drive environmental responsibility. The CIPS L3M6 module highlights how such government interventions influence procurement decisions in the construction supply chain, aligning with broader sustainability objectives. The option "None of the above" is incorrect as it dismisses these widely recognized mechanisms.

NEW QUESTION # 121

When monitoring CSR in the supply chain, procurement teams should focus on investigating low-risk suppliers first, not ones from industries that are known to face particular challenges, for example, fuels, energy and power, chemicals, plastics, and food.

- A. FALSE
- B. TRUE

Answer: A

Explanation:

Effective CSR monitoring prioritizes high-risk suppliers, particularly those in industries like fuels, energy, chemicals, plastics, and food, which are prone to environmental, labour, or ethical challenges. Focusing on low-risk suppliers first would be inefficient and fail to address critical vulnerabilities. The CIPS L3M6 module advocates a risk-based approach to supply chain monitoring, targeting areas with the greatest potential for CSR issues.

NEW QUESTION # 122

Packaging should be as large as possible while still protecting the finished item.

- A. FALSE

- Answer: A**

Packaging should be appropriately sized to protect the item without being unnecessarily large, as oversized packaging wastes materials, increases shipping costs, and contradicts sustainability goals. The CIPS L3M6 syllabus advocates for efficient, socially responsible packaging that balances protection with resource conservation, making this statement false.
