CTAL_TM_001 Technical Training - Exams CTAL_TM_001 Torrent

The learning material is open in three excellent formats; ISTQB CTAL_TM_001 dumps PDF, a desktop ISTQB CTAL_TM_001 dumps practice test, and a web-based ISTQB CTAL_TM_001 dumps practice test. ISTQB CTAL_TM_001 dumps is organized by experts while saving the furthest down-the-line plan to them for the ISTQB CTAL_TM_001 Exam. The sans bug plans have been given to you all to drift through the ISTQB certificate exam.

ISTQB Certified Tester Advanced Level - Test Manager Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which of the following is likely to occur if reviewers do not have an adequate level of technical knowledge? [1]

- A. The review is likely to be less efficient.
- B. The review will be shorter because any technical aspect can be skipped.
- C. There will be no impact as long as they have sufficient process knowledge.
- D. There will be no impact as long as they have sufficient business knowledge.

Answer: A

Explanation:

If reviewers do not have an adequate level of technical knowledge, they may not be able to identify and describe anomalies in the

product or project under review¹. They may also not be able to provide constructive feedback or suggestions for improvement². This can result in a less efficient review, as the review objectives may not be met, the review process may take longer, or the review outcome may be of lower quality³. Therefore, option C is the correct answer. Option A is incorrect because having sufficient business knowledge is not enough to perform a technical review, as business knowledge does not cover the technical aspects of the product or project⁴. Option B is incorrect because having sufficient process knowledge is not enough to perform a technical review, as process knowledge does not cover the technical aspects of the product or project⁴. Option D is incorrect because skipping any technical aspect can compromise the quality and completeness of the review, and may lead to defects or risks in the product or project⁵. NEW QUESTION # 23

Which classification information would be most useful to capture for newly identified defects? [2]

- A. The priority that the business assigned to the project that the defect was found in
- B. The number of test steps in the test script that found the defect
- C. The name of the configuration manager who built the system
- **D. The system build that the defect was found in**

Answer: D

Explanation:

Capturing the system build information for newly identified defects is crucial as it helps in tracking the defect back to a specific state of the software. This information is essential for developers to understand the context of the defect and for testers to manage regression testing effectively. It allows for precise identification of when the defect was introduced, aiding in quicker resolution and ensuring that similar issues can be prevented in future builds.

ISTQB Advanced Level Test Manager Syllabus, Section 3.2.1

Defect classification and prioritisation: ISTQB offers a standardised defect classification scheme. The most useful classification information to capture for newly identified defects is the system build that the defect was found in. This is because the system build is the version of the software that is compiled, integrated, and tested together. By capturing the system build for each defect, the test team can track and manage the defects more effectively, and identify the root causes and impacts of the defects. The system build can also help to reproduce and verify the defects, and to measure the quality and progress of the software development. NEW QUESTION # 24

When, at a minimum, should project risks be re-evaluated? [1]

- A. During the creation of the test plan
- B. At the beginning of the test execution phase
- C. Prior to test case creation
- **D. At major project milestones**

Answer: D

NEW QUESTION # 25

Club 65 to 90 is a holiday club for retired people run by a small company, the IT department consists of 1 Designer, 3 Developers and 1 System Tester. Their booking system has been "live" for a number of years and the company has a loyal client base. A variety of automation tools are used for development and testing to improve effectiveness and efficiency.

A new project will introduce a loyalty scheme and both a Business Requirement Specification and a System Design Specification have been produced. A Rapid Application Development (RAD) lifecycle model will be used where time is crucial. In the past there have been problems with updates to the existing system, which has affected existing functionality. Testers have not used representative and realistic operational profiles and data, which has led to significant production problems. The following test policy

statements have been proposed for the project:

a. Testing must be risk based;
b. A Master Test Plan, conforming to IEEE829, must be produced for each test project; c. Test procedures must be run by a tester who did not write the procedure; d. Regression testing should be carried out on all releases; e. The testers are accountable for all defects found in production; f. Time must be given to designing test environments so that they are representative of the live environment.

Which of the following options identifies the three policy statements that would be MOST beneficial for this project?

- A. a, d and f
- B. a, b and e.
- C. b, c and f.
- D. a, d and e.

Answer: A

NEW QUESTION # 26

Which of the following statements correctly describes a 'depth-first approach' to managing risk based testing? SELECT ONE OPTION

- A. The lowest risk tests should only be run once the highest risk tests have passed.
- B. All of the highest-risk tests are run before any lower risk tests, and tests are run in strict risk order.
- C. A sample of tests is selected to ensure coverage of every risk item at least once.
- D. The highest risks are tested in more depth than the lowest risks.

Answer: D

NEW QUESTION # 27

.....

As we all know, Selecting high quality, respected study material will help develop the required skills to pass your CTAL_TM_001 exam test. While, where to find the best valid CTAL_TM_001 practice dumps is an important question. ISTQB CTAL_TM_001 study material will be your good guide. CTAL_TM_001 Questions cover almost all the main topic, which can make you clear about the actual test. I believe, with the confident and our CTAL_TM_001 valid dumps, you will get your CTAL_TM_001 certification with ease.
