With pass rate reaching 98.75%, Plat-Con-201 exam torrent has received great popularity among candidates, and they think highly of the exam dumps. In addition, Plat-Con-201 exam braindumps are high-quality and accuracy, because we have professionals to

verify the answers to ensure the accuracy. Plat-Con-201 exam dumps have most of knowledge points for the exam, and you can master the major points through practicing. In addition, we have online and offline chat service for Plat-Con-201 Exam Dumps, and they possess the professional knowledge for the exam. If you have any questions about Plat-Con-201 exam materials, you can have a conversation with us.

Salesforce Certified Omnistudio Consultant Sample Questions (Q119-Q124):

NEW QUESTION # 119

A customer needs to create an OmniScript to capture payment information. In the first step of the process, the user selects a payment type such as credit card, debit card, or direct bank account payment. Each payment type should display with a different icon. The process should check to see if the customer has any saved payment information of that type, and if there is, no further action is required. If there is no saved payment information then the user should be allowed to enter the information, and the process should save it.

Which three OmniScript elements should be used to meet these requirements?

Choose 3 answers

- A. DataRaptor Post Action
- B. DataRaptor Transform Action
- C. Radio
- D. DataRaptor Extract Action
- E. Select

Answer: A,C,E

Explanation:

The three OmniScript elements that should be used to meet these requirements are: Select, DataRaptor Extract Action, and DataRaptor Post Action. A Select element can display a dropdown list of options for the user to choose from, such as payment type. A DataRaptor Extract Action can retrieve data from a Salesforce object, such as saved payment information, and store it in an Interface object or a JSON object. A DataRaptor Post Action can write data to a Salesforce object, such as new payment information, and perform insert or update operations.

NEW QUESTION # 120

A company needs to create a new quote estimation process for its services team. This process involves multiple steps. The user needs to enter a variable number of rows of data in order to calculate the correct final price of the quote. The data that needs to be entered in each row includes:

- * Service category
- * Number of hours
- * Hourly rate

The number of hours should be multiplied with the hourly rate to calculate the total for each row.

Which three OmniScript elements should the consultant recommend to meet these requirements?

Choose 3 answers

- A. Input Block
- B. Edit Block
- C. Multi-select
- D. Step
- E. Formula

Answer: A,B,E

Explanation:

To create a new quote estimation process that involves multiple steps and a variable number of rows of data, the consultant should recommend the following OmniScript elements:

* Edit Block: This is an element that allows the user to add, edit, or delete multiple rows of data in a table-like format. It can be used to capture the service category, number of hours, and hourly rate for each row.

* Formula: This is an element that allows the user to perform calculations on data using mathematical expressions. It can be used to calculate the total for each row by multiplying the number of hours with the hourly rate.

* Input Block: This is an element that allows the user to enter data using various input types, such as text, number, date, picklist, etc. It can be used to display the formula result for each row and the final price for the quote.

The elements that are not suitable for this scenario are:

* Multi-select: This is an element that allows the user to select multiple options from a list. It is not relevant for this scenario, as the user needs to enter data in each row, not select from predefined options.

* Step: This is an element that organizes the OmniScript into one or more pages. It is not relevant for this scenario, as it does not capture or display any data.

NEW QUESTION # 121

An auto insurance company has different rates for each state in the country. The company needs to manage the rates separately, but the formula to calculate the premiums is the same. All the input and output are the same; only the values in the rating tables differ. Which OmniStudio tool should the consultant recommend to meet this requirement?

- A. DataRaptor Transform with an interface Map
- **B. Grouped Calculation Matrix**
- C. Class-based Calculation Procedure
- D. Aggregation Steps in a Calculation Procedure

Answer: B

Explanation:

The OmniStudio tool that the consultant should recommend to meet this requirement is Grouped Calculation Matrix. A Grouped Calculation Matrix is a tool that can perform complex calculations based on multiple input variables and output values within groups. The consultant can use a Grouped Calculation Matrix to define the input variables, such as state and other factors, and the output values, such as rates. The Grouped Calculation Matrix can then apply rules and formulas to calculate the rates for each state separately, but using the same formula

NEW QUESTION # 122

A business wants to add typeahead functionality to an existing OmniScript. The business wants the user to begin entering the name of a contact in Salesforce, and allow the user to select the contact once it has found a match. Once the contact has been selected, the OmniScript should retrieve the contact's email address for use in a later step of the process. What data source is needed when using the TypeAhead element?

- A. HTTP Action
- B. DataRaptor Post Action
- C. Integration Procedure Action
- **D. DataRaptor Extract Action**

Answer: D

Explanation:

The data source that is needed when using the TypeAhead element is DataRaptor Extract Action. A TypeAhead element is an element that can display a list of suggestions for the user to select from, as they type in a text field. A DataRaptor Extract Action is an action that can retrieve data from a Salesforce object or invoke a Salesforce API, using SOQL queries or Apex methods. The consultant can use a DataRaptor Extract Action as a data source for the TypeAhead element, to get the contact names from Salesforce and display them as suggestions

NEW QUESTION # 123

Which three functions are performed by Action elements in OmniScript?
Choose 3 answers

- **A. Send DocuSign emails for signature**
- **B. Get and update data in Salesforce**
- C. Display error messages to the user
- D. Organize data into multiple pages
- **E. Get and update data through APIs**

Answer: A,B,E

Explanation:

The three functions that are performed by Action elements in OmniScript are get and update data through APIs, send DocuSign

emails for signature, and get and update data in Salesforce. Action elements are used to perform various operations on data within an OmniScript. Display error messages to the user is not a function of Action elements, but of Error elements. Organize data into multiple pages is not a function of Action elements, but of Page elements.

NEW QUESTION # 124

.....

Our Plat-Con-201 exam materials can help you get the certificate easily. With our Plat-Con-201 study questions for 20 to 30 hours, we can claim that you can pass the exam by your first attempt. And our pass rate of the Plat-Con-201 learning quiz is high as 98% to 100%. You must muster up the courage to challenge yourself. It is useless if you do not prepare well.
