Plat-Dev-210 Latest Exam Testking - Excellect Plat-Dev-210 Pass Rate

With online test engine, you will feel the atmosphere of Salesforce valid test. You can set limit-time when you do the Plat-Dev-210 test questions so that you can control your time in Plat-Dev-210 practice exam. Online version can point out your mistakes and remind you to practice it every day. What's more, you can practice Plat-Dev-210 Pdf Torrent anywhere and anytime.

Salesforce Certified Omnistudio Developer Sample Questions (Q48-Q53):

NEW QUESTION # 48

A developer needs to create a list of cases for an account in a single Datable in a FlexCard. Like the one shown below.

Author	Current Version	Status	Parent	In Child Card	Last Modified	Theme
company.org	1	Inactive			8/14/2020, 1:28 PM	Lightning
Desktop						
Design	Type	Subject	Status	Created	Case Number	Priority
Web	Mechanical	Generator won't start	New	2020-07-22T08:23:42.000Z	00001028	High
Phone	Electrical	Component missing	Escalated	2020-07-22T08:21:41.000Z	00001027	High
Phone	Electrical	Starting generator after second call	Escalated	2020-02-27T22:28:29.000Z	00001000	High
Web	Other	Emergency resolution process	Escalated	2020-01-27T22:28:20.000Z	00001061	Low
Web	Mechanical	Shutting down of generator	Closed	2020-02-27T22:28:20.000Z	00001017	Medium
Phone	Electrical	Control start generator after second call	Escalated	2020-02-27T22:28:20.000Z	00001018	Medium

How can the developer configure the FlexCard to display the case records in this way?

- A. Enable the Repeat Records feature on the FlexCard Setup tab
- B. Disable the Repeat Record feature on the FlexCard setup tab

- C. Enable the record Looping feature on the data table elements
- D. Select the Repeatable Mode property on the data table elements

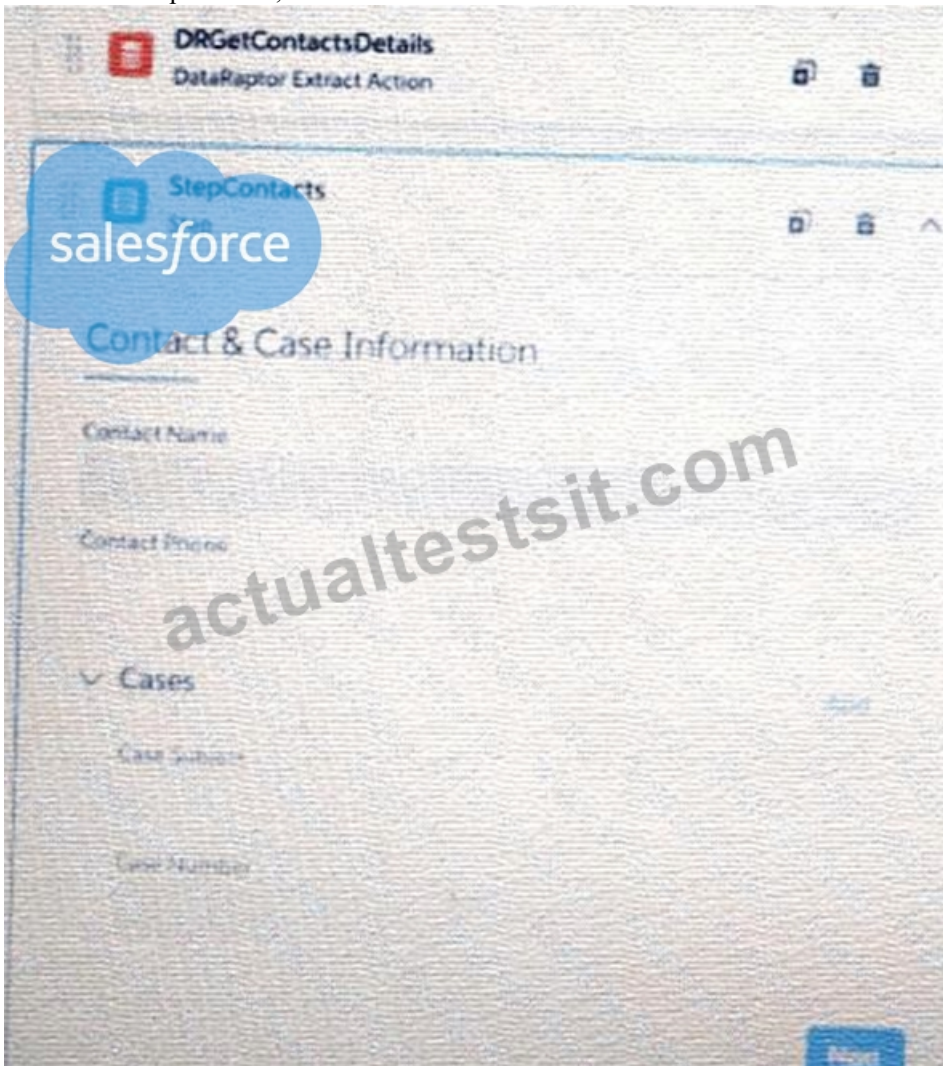

Answer: D

Explanation:

The Repeatable Mode property on the data table elements allows the developer to display multiple records in a single data table. The Repeat Records feature on the FlexCard Setup tab is used to display multiple FlexCards for each record in a data source. The Record Looping feature on the data table elements is used to iterate over a list of records and perform actions on each record. The Overwrite Target for all Null input checkbox on the Account id field is used to overwrite the existing value in the target object with null if the input value is null.

NEW QUESTION # 49

Refer to the exhibit below. What JSON from the DRGetContactDetails action would display all six values correctly shown? BlkCases is a Repeat Block, and the names of the elements are the same as the label names without spaces.

- A.

• B.

• C.

• D.

Answer: D

Explanation:

According to the OmniScript Data JSON page, the OmniScript structure JSON defines the data elements and their properties that are used in an OmniScript. The exhibit shows an OmniScript structure JSON with six elements: ContactName, ContactPhone, ContactEmail, CaseNumber, CaseSubject, and CaseStatus. The DRGetContactDetails action is a DataRaptor Extract action that retrieves data from the Contact and Case objects in Salesforce. The BlkCases element is a Repeat Block that displays a list of cases related to the contact. Therefore, the JSON from the DRGetContactDetails action that would display all six values correctly shown is option A, which has the following structure:

The other options have different structures that do not match the OmniScript structure shown.

NEW QUESTION # 50

Users receive an APEC CPU limit Exceeded error when running an OmniScript in a Salesforce Community. The OmniScript includes an Integration Procedure that contains two DataRaptors.

Which two Location should the developer check to troubleshoot the issue?
Choose 2 answers

- A. Script configuration
- B. DataRaptor configuration
- C. Action Debugger
- D. Community logs

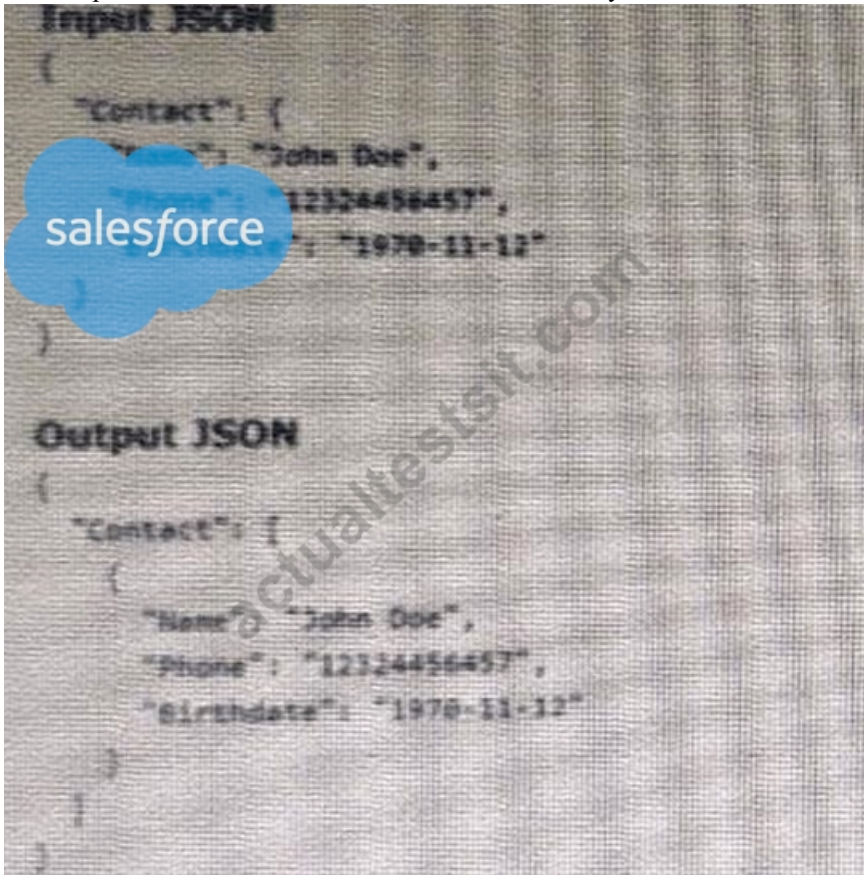

Answer: B,C

Explanation:

According to the Troubleshoot Flow Errors page, one way to troubleshoot errors is to "check the debug logs for the community". Another way is to use the Action Debugger tool, which "lets you test and debug actions in OmniStudio".

NEW QUESTION # 51

A developer needs to transform contact data into a JSON array.

Given the input JSON shown above, what are two ways a developer could configure a DATA Raptor transform to achieve the expected Output JSON? Choose 2 answers

- A. Set the input JSON Path as Contact and the OutPut JSON Path as List (Contact)
- B. Use a formula LIST(Contact), and add the output of the formula as the input in the Transform tab.
- C. Set the Input JSON Path as Contact the out JSON Path as Contact and the output Data type as List.
- D. Set the Input JSON path as List(Contact) and the Output JSON Path as Contact.

Answer: B,C

Explanation:

A DataRaptor Transform can be used to transform data from one format to another, such as JSON, XML, or CSV. The developer can specify the input and output paths for each field in the Transform tab. The developer can also use formulas to manipulate data in the Formula tab. To transform contact data into a JSON array, the developer can use either of these methods:

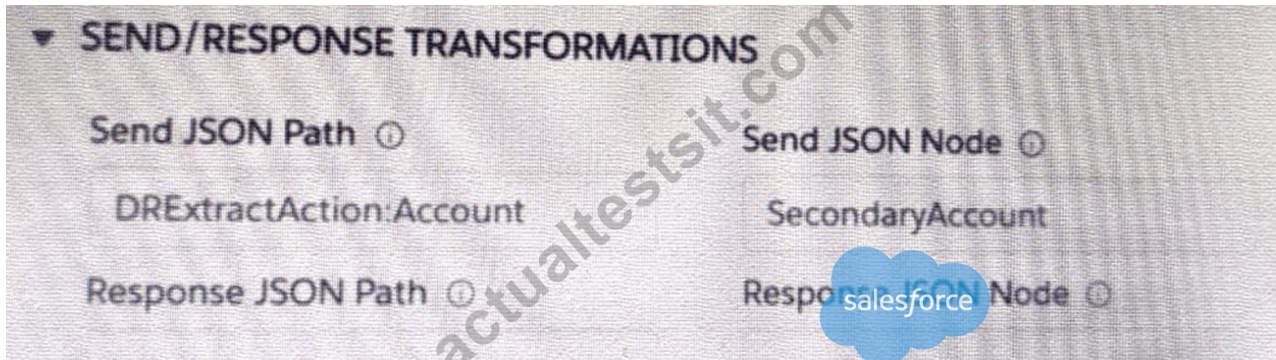

* Use a formula LIST(Contact), and add the output of the formula as the input in the Transform tab. This will create a list of contact objects from the input JSON and output it as a JSON array.

* Set the Input JSON Path as Contact, the Output JSON Path as Contact, and the Output Data Type as List. This will output each

contact object as an element of a JSON array.

NEW QUESTION # 52

Refer to the exhibit.

A developer has configured an integration Procedure element with SEND/RESPONSETRANSFORMATIONS as shown. Alternatively, how could the developer configure Additional input to send exactly the same data? Assume that the developer checked Send Only Additional input.

- A.

- B.

- C.

Answer: C

Explanation:

Option C is the correct way to configure Additional input to send exactly the same data as Input Data. The Additional input should have a key/value pair for each field in Input Data, and the value should be set to `{{InputData.field}}` for each field. This will pass the value of Input Data for each field to Additional input.

NEW QUESTION # 53

.....

If they fail to do it despite all their efforts, so "ActualTestsIT" they can get a full refund of their money according to terms and conditions. The practice material of "ActualTestsIT" is packed with many premium features, and it is getting updated daily according to the real Salesforce Certified Omnistudio Developer (Plat-Dev-210) exam syllabus. The product of "ActualTestsIT" came into existence after consulting with Salesforce Certified Omnistudio Developer (Plat-Dev-210) many professionals and getting their positive reviews.
